

PointCentral Requirements

PointCentral 10.1 System Requirements

The following minimum requirements are needed to support PointCentral:

Component	Requirement
Processor	Intel Pentium 4 processor, 3.0+ GHz or equivalent processing power
Memory	1GB of RAM (2GB recommended)
Disk space	<ul style="list-style-type: none"> 20GB of available hard disk space (depends on Point data folders configuration) Electronic document storage: 20MB per loan file (on average)

PointCentral 10.1 Software Requirements

The following software is required to support PointCentral:

Component	Version
Operating System	<ul style="list-style-type: none"> Microsoft® Windows Server 2016, with latest service pack IIS 7.0 Microsoft Windows Server 2012, Service Pack 1, with IIS 7.0 and Application Server Role Microsoft Windows Server 2008, (R2 with Service Pack 1, 64 bit required), with IIS 7.0 and Application Server Role
Microsoft .NET Framework	Version 4.6.2
SQL Server Large organizations (>50 users)	<ul style="list-style-type: none"> Microsoft SQL Server® 2016 Standard or Enterprise Edition, with latest service pack Microsoft SQL Server 2014 Standard or Enterprise Edition, with latest service pack Microsoft SQL Server 2012 Standard or Enterprise Edition, with latest service pack Microsoft SQL Server 2008 Workgroup, Standard, or Enterprise Edition, with latest service pack
SQL Server Small organizations (<50 users)	<ul style="list-style-type: none"> Microsoft SQL Server 2016 Express Edition, with latest service pack Microsoft SQL Server 2014 Express Edition, with latest service pack Microsoft SQL Server 2012 Express Edition, with latest service pack Microsoft SQL Server 2008 Express or Express with Tools Edition, with latest service pack
Network Environment	<ul style="list-style-type: none"> Domain name An SSL certificate that matches the domain name, installed on the IIS default web site Static IP address
Client	<ul style="list-style-type: none"> Point, version 9.9 or 10.0 One of the following operating systems: <ul style="list-style-type: none"> Microsoft Windows 10 Microsoft Windows 8 Microsoft Windows 7 Internet Explorer version 11, or later

PointCentral Requirements (continued)

PointCentral Requirements – Additional Information

Important: Calyx does not directly support third-party products, including Microsoft .NET Framework, Internet Information Services (IIS), SQL Server, SQL Server Express, or any other applications mentioned in this information.

- Calyx does not recommend or support the operation of PointCentral on a domain controller or exchange server. Calyx supports PointCentral only with Windows Server Standard, Data Center, or Enterprise editions.
- Calyx does not support the operation of PointCentral on Microsoft Windows Essentials.
- The Calyx Resolver System can provide, if needed, a Calyx-hosted domain name and *wildcard SSL certificate free of charge.
- Microsoft Silverlight is required to use the Rules function in PointCentral versions 9.3 and earlier. It is not required in versions 9.5 and later. If Silverlight is not installed on your system, a link is provided on the Rules page that prompts you to install Silverlight before you can create Rules.

Important Network Information

Point is compatible with Microsoft® peer-to-peer and client-server networks. Calyx does not support the operation of Point or any data hosted on a storage device and RAID Arrays, or the operation of Point on the following networks:

- Novell networks
- Linux environments
- Windows 98
- Windows 2000
- Windows ME
- OS/2
- UNIX
- Any thin-client networks such as Citrix or Microsoft Terminal Services
