Email Technical Support

Inside *Point*, select **Help > Email Technical Support** to email technical support issues with a loan file. If enabled, the user can attach a loan file. A *Save As* button was added to save the loan file to the user's desktop.

Figure 1: Email Support

Note: Auto sending the loan file automatically removes sensitive information (SSN, Account Numbers, etc...).

Chapter 2: ABOUT POINT

The following sections contain important Point application information.

Point File Encryption Levels

The following list contains Point File encryption details:

- Borrower and prospect files are compressed in a proprietary format but are not encrypted.
- Emailed Point compressed files (.PCF) are encrypted with AES 256-bit.
- Emailed Point PDF files are encrypted with a 128-bit encryption level when password protected.
- Most service interface vendors use 128-bit Secure Socket Layer for electronic document requests.

Conventional Data Folder Storage

The following list contains the conventional data folder storage details:

- Data folders can contain approximately 1500 Borrower or prospect files.
- Data folders should contain only two sub folders.
- A Borrower sub-folder housing all Borrower file data.
- A prospect sub-folder housing all prospect file data.

Note: Data folders should contain only necessary configuration settings and index files, such as: Borrower.index (*.index, *.idx) (*.ini, *.usr, *.sec).

Installation

The following information applies only to users upgrading from Point version 7.2 or earlier.

Point contains several fields that may cause data discrepancies if files are shared between versions.

Data from fields in earlier versions transition to the new fields in the updated version when an existing loan file is opened for the first time. Problems can occur when an earlier Point version opens a file after the data was modified in a later version.

Example: The calculations in some Point screens may not match if 9.6 loan file is opened after modified in 9.2.

Note: All Point user in the organization should update to the latest version of Point as soon as possible after release to avoid confusion.

Operating Requirements

Point is designed for use with standard computing systems (laptop and desktop computers). Calyx does not support Point installation on a tablet or convertible device (Surface, Chrome Book, and others), but some Point functionality is available on the devices.

System Requirements

The following system requirements are needed to install and use Point:

Table 3: System Requirements

Component	Version
Processor Speed	800 MHz (or higher)
Memory (RAM)	2 GB minimum
Disk space	Point application: 300MB Microsoft .NET Framework®: up to 4.5 GB Electronic document storage: 20 MB per loan file (on average)

Point software does not support multi-functional printers. Calyx provides limited customer support for multi-functional printer issues when used with Point.

Software Requirements

The following software is required for Point installation and use.

Table 4: Software Requirements

Component	Version
Operating System	One of the following operating systems is required: <ul style="list-style-type: none"> • Microsoft Windows 10 • Microsoft Server 2012 or higher
Web browser	Microsoft Edge®
Microsoft .NET Framework	Version 4.8
Modem/Internet Connectivity	Active Internet connection is required to install Point and access Internet enabled services in Point

Component	Version
Other	Adobe Acrobat Reader© version 11, DC or later is required to open PDF files Microsoft Office® 2016 or 2019

Note: Refer to the System Requirements on the *Calyx Point Product* page for more information about third-party product support.

Install Point

An email notification containing a link and instructions for installing Point is mailed to the end-user assigned a Point seat. The installation is completed per the settings in the assigned installation group.

Note: The Point Administrator is installed, and the default templates and data folders are created If an installation group is not specified.

1. Open the confirmation email from **MyCalyx**.
2. Click the Installation link.
3. Review and accept the *Calyx Software License Agreement* to proceed.
4. Click the **Install** button.

Chapter 3: USER INTERFACE

It is recommended that the User Interface (UI) section of this guide is reviewed prior to processing loans to obtain familiarity with the UI options.

Loan Search Screen Overview

Double-click the **Point** desktop icon to open the *Loan Search* screen. The *Loan Search* screen contains limited options until a loan is created or opened.

The **Navigation Panel** is available on all Point screens.

1. Click the **Navigation X** to collapse the **Navigation** panel.

Figure 3: Collapse Navigation Panel

2. Click any tab to expand the collapsed **Navigation** Panel.

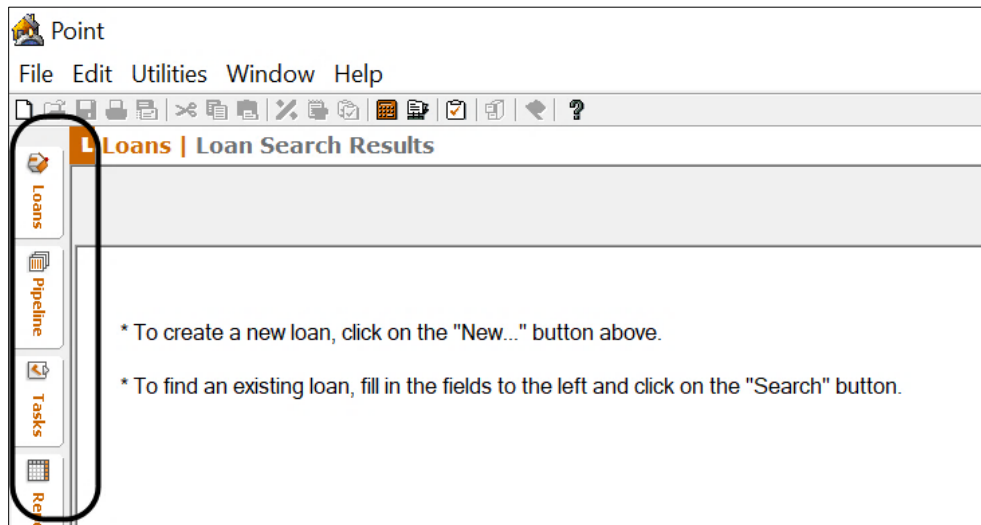

Figure 4: Expand Navigation Panel

Loans Tab

Use the **Loans** tab to access prospect and Borrower loan files in Point and import loan applications from Zip or WebCaster.

The **Loans** tab provides access to Borrower and Loan screens after a loan is opened. The listed screen order changes as screens are selected. Point shuffles the order according to the most frequently used. Many of the screens are also accessible from the **Forms** menu and typically easier to find because the **Forms** menu is static.

Note: Proceed to [Create Loans](#) to create new loans and work with existing loans.

Data Folders

Use the **Data Folder** dropdown list to select where to perform the search. The **Primary Data Folder** is the default data folder and is available immediately after installation. (See [Manage Data Folders](#) for additional details.)

Standard Loan Search

Set the loan search criteria to locate an existing loan. At least one criteria field must be completed to perform the loan search.

1. Click the **Loans** tab.
2. Select the **Data Folder** to be searched from the dropdown. (See [Figure 5](#).)

Note: The *Primary Data Folder* is the default data folder created during installation. See [Manage Data Folders](#) for creating additional folders.

3. Select the **Prospect** or **Borrower** radio button to indicate the loan type to search.
4. Use the **Search By** dropdowns to further refine the search criteria.
5. Enter additional search criteria in the final field when required.

6. Click **Search** to view the *Loan Search Results*.

The screenshot shows the 'Point' application window with the 'Loans | Loan Search Results' tab active. On the left is a 'Navigation Panel' with search options. The main area displays a table of search results.

Delete	Click to delete the selected file.

Move Loan Files

Manage loan files more efficiently by moving prospect and borrower files into data folders to create groupings. Lists do not have to be rebuilt when files are copied or moved.

Note: See [Copy Loan Files](#) for details on copying external files to Point.

1. Select the **Loans** tab from the **Navigation** panel.
2. Perform a loan search.
3. Select the file to move.
4. Click the **Move** button.
5. Select the **Data Folder** on the *Move Borrower* dialog.

Figure 9: Move Borrower Dialog

6. Select the appropriate **As A** radio button.
7. Select the **Filename** option.
8. Click **OK** to complete the move process.
9. Click **Yes** on the *Move Confirmation*.

Pipeline Tab

Use the following steps to open a loan file from the **Pipeline** tab.

Note: The *Pipeline* options can be modified to change active loans displayed in the Pipeline List.

1. Select the **Pipeline** tab.
2. Click **Refresh** to update the *Pipeline List*.

The screenshot shows a software interface with a menu bar (File, Edit, Utilities, Window, Help) and a toolbar. A navigation panel on the left contains 'Loans' and 'Pipeline' tabs, with 'Pipeline' selected. Below the navigation panel are 'Pipeline Setup' and 'Refresh' buttons. The main area displays a table titled 'Pipeline List' with an 'Open' button in the top right corner. The table has the following columns: Borrower, Subject Property, Loan Amount, Note Rate, Cash To Close, Loan Status, Loan Status, Estimated Close, Rate Lock, Con..., and Cleared. The table contains three rows of data:

Borrower	Subject Property	Loan Amount	Note Rate	Cash To Close	Loan Status	Loan Status	Estimated Close	Rate Lock	Con...	Cleared

3. Select the appropriate loan from the list.
4. Click **Open** to open the loan.

Note: See [Pipeline Management](#) for pipeline details.

Tasks Tab

Use the **Task** tab to view and update tasks associated with a loan.

Note: See [Task Management](#) to create and manage loan tasks. Associate tasks to a loan file to archive a permanent task record with the loan file.

Use the following steps to locate and view a task.

1. Select the **Tasks** tab.

2. Select the task status to search from the *Search For* dropdown.

Figure 11: Task Search

3. Select the folder to search from the **In** dropdown.
4. Click **Search**.
5. Double-click a task in the **Search Results** to open.

6. Update the **Status** if applicable.
7. Enter **Comments** if applicable.
8. Click **Print** to print the task.
9. Click **Save** to save the updates.

Note: See [Create Tasks](#) to open a new task.

Reports & Marketing Tab

The **Reports & Marketing** tab contains options for generating:

- Reports
- Mailing labels
- Marketing material

See [Reports Management](#) and [Marketing Management](#) for details.

Templates Tab

The **Templates** tab provides access to pre-created templates.

1. Select the **Templates** tab.
2. Select the appropriate **Template Category** radio button.

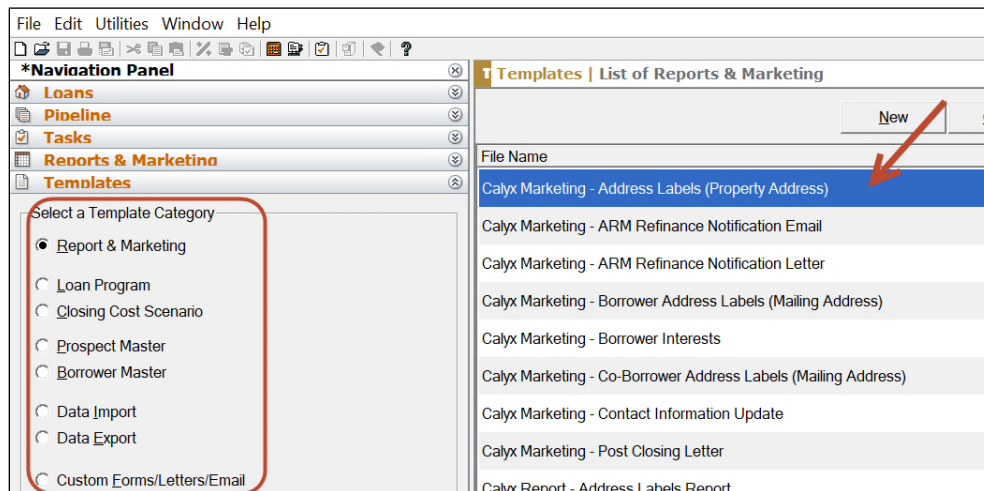

Figure 13: Point Templates

3. Double-click a template in the **Template List** to open a read only template copy.

Note: See [Template Management](#) for details.

Shortcut Toolbar

The **Shortcut** toolbar displays in the **Navigation** panel when a loan file is opened. The **Shortcut** toolbar contains quick access to select forms listed in other Point menus.

The **Shortcut** toolbar is not available when a master template is created. The forms must be selected from the **Forms** menu to include in the template. Use the **First Mtg** and **Second Mtg** buttons to toggle between linked first and second mortgage files. These buttons are visible only after a second mortgage is linked to the first mortgage file.

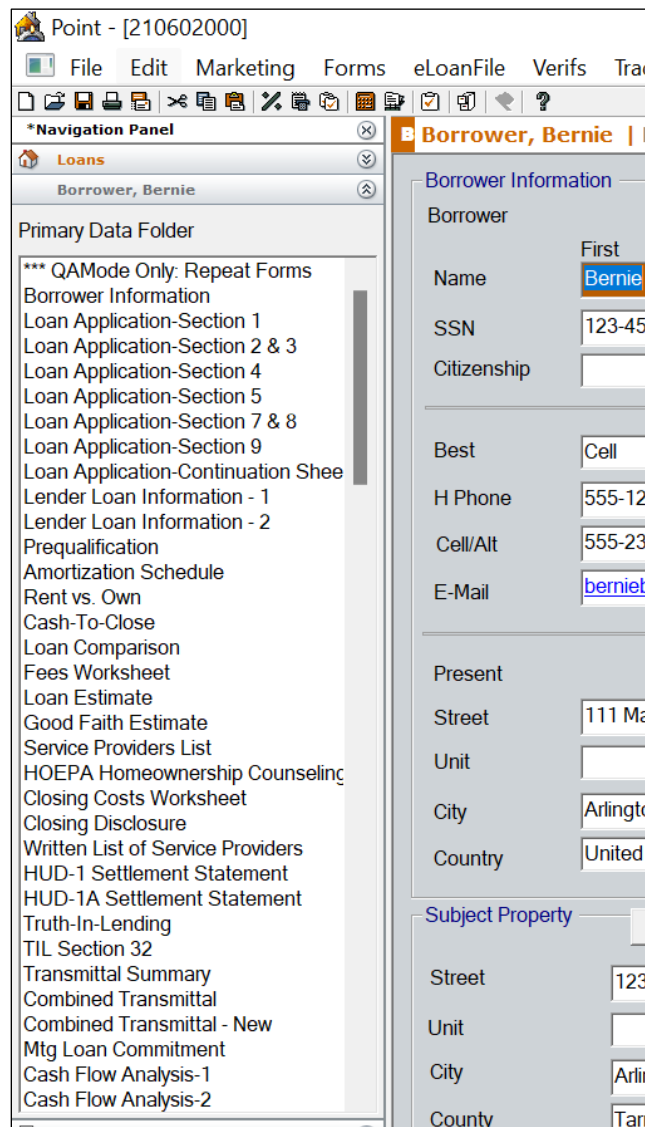

Figure 14: Shortcut Toolbar

Information Bar

The **Information** bar is visible from any screen in an open loan file. The **Information** bar is divided into two sections:

- Current Status
- Loan Checklist

The screenshot shows the Information Bar with two main sections:

Current Status: Includes an "Update Status" button and a status of "Denied (07/21/2021)". Below this is a scrollable list of items:

- QM Find...
- QM Dat...
- Lien First
- Top/Bott... 26.392 / 58.23...
- LTV/CLTV 80.000 / 80.00...
- Gross L... 80%

Loan Checklist: Includes an "Open Detail" button and a table with columns for "Due" and "Item".

Figure 15: Information Bar

Minimize the information bar by clicking the **X** button at the top of the bar.

Current Status

The **Current Status** section includes important loan data such as:

- Qualified Mortgage (QM) finding

- Loan status
- First or second loan
- Amount
- Property address
- Type and purpose
- Payment
- Note and Qual rates
- Payment

The **Update Status** button opens the **Update Status** dialog that imports loan information from the Status and Checklist screen. (See [Figure 330](#).)

Loan Checklist

The **Loan Checklist** shows the status of document deliverables required for the loan.

This checklist tracks the following dates for each item:

- Order Date
- Due Date
- Received Date
- The first two checkboxes indicate if the item was ordered and received.

Hover the mouse over a selected checkbox to display the date the item was completed.

Double-click an item or click the **Open Detail** button to open an information dialog for the selected item. Use this dialog to update the item status.

Information added or updated in this dialog automatically updates the corresponding tracking screen.

Note: See [Track Loan Status](#) for information about adding and updating items listed on the loan checklist and for information about the *Status and Checklist* screen.

Chapter 4: LOAN APPLICATIONS

Point provides a set of files for prospects and a set of files for Borrowers. Use prospect files for potential customers and Borrower files for actual loans being processed.

Prospect files contain most of the marketing tools, preliminary disclosures, and processing forms required. A prospect file is easily converted to a Borrower file after the prospect signs a Loan Application. Borrower files contain the forms required to process the loan from origination through to submission to the underwriter.

Note: Point does not provide closing documents. Point does interface with vendors that provide the closing documents.

Borrower files include the following not included in prospect files:

- Verification Forms
- Submission Forms
- Transmittal Forms
- Access to the Banker Screens
- Additional tracking functions

Entered data in one Point screen automatically populates the same field in other screens and forms.

Create Loans

Point offers multiple options for creating application loan files. The options include:

Table 7: Loan Creation Options

Create Loan Option	Description
Create from Blank File	Create loan file from an empty Point screen
Convert Prospect to Borrower File	Create loan file from an existing prospect file
Create from Template	Create loan file from a Point loan template
Duplicate Existing File	Duplicate an existing loan file
Rename Existing File	Rename an existing loan file
Create Co-Borrower File	Create a Co-Borrower file from and existing prospect or loan application

Note: Select a link in the above table to begin loan application creation.

Create from Blank File

Use the following steps to create a prospect or borrower loan application.

1. Select the **Loans** tab.
2. Click **New**. (See [Figure 5](#).)
3. Select the **New Blank File** radio button.

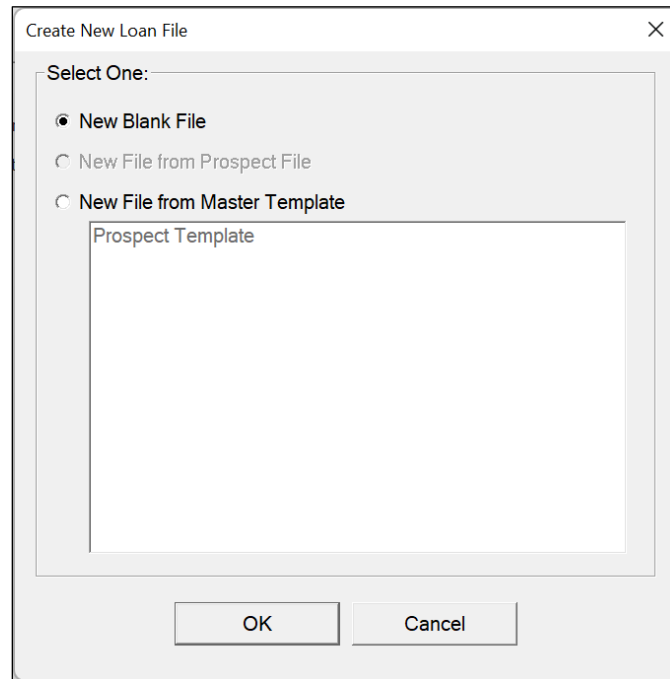

Figure 17: Create New Loan File Dialog

4. Click **OK**.
5. Proceed to [Borrower Information](#) Screen.

Convert Prospect to Borrower File

Use the following steps to convert a prospect file to a borrower file.

Note: Classic URLA loan files cannot be converted to the New URLA format.

1. Select the **Loans** tab.
2. Click **New**. (See [Figure 5](#).)
3. Select the **New File from Prospect** radio button. (See [Figure 17](#).)

- Click **Search** on the *Search Loans* dialog to locate the prospect file to convert.

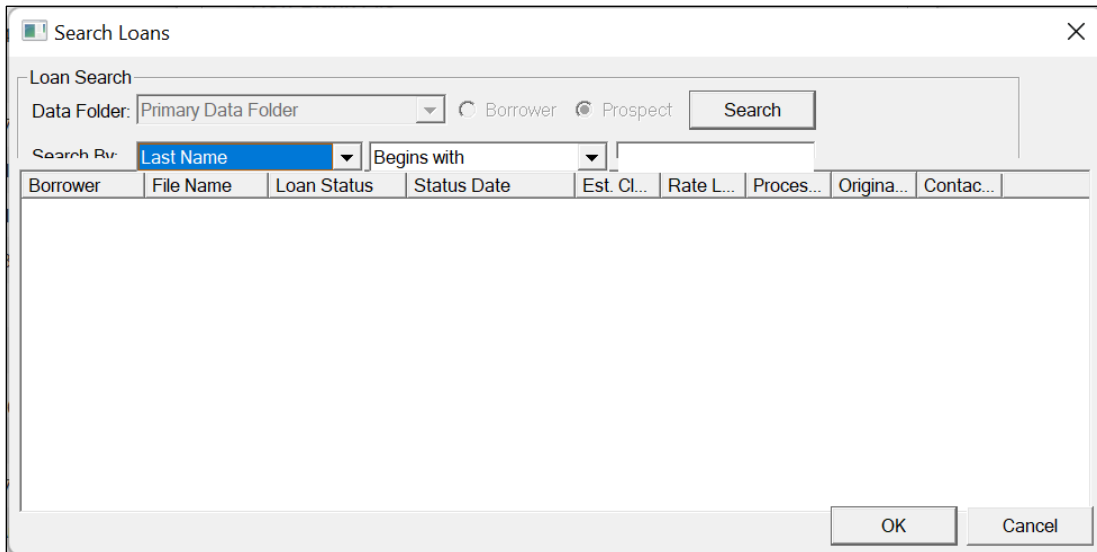

Figure 18: Search Loans Dialog

- Double-click loan from the **Search Results** to select.
- Click **OK**.
- Proceed to Borrower Information Screen.

Create from Template

Use the following steps to create the prospect or Borrower loan files.

- Follow Steps 1 – 2 in [Create from Blank File](#) to access the *Create New Loan File* dialog.
- Select the **New File from Master Template** radio button. (See [Figure 17](#).)
- Click **OK**.
- Proceed to [Borrower Information](#) Screen.

Duplicate Existing File

Three file naming conventions are available when duplicating an existing file:

- **Preserve:** Retains the original file name
- **Auto Filename:** Use the automatic file naming convention specified for the selected data folder
- **Manual Naming:** Manually rename the file when prompted

Use the following steps to duplicate an existing loan file. The duplicate file will remain in the save format as the original file.

1. Click the **Loans** tab.
2. Perform a search for the loan file to copy. (See [Standard Loan Search](#).)
3. Select the loan file to copy.

Figure 19: Copy Loan File

4. Click **Copy**.
5. Select the appropriate **Data Folder** to store the copied loan file.

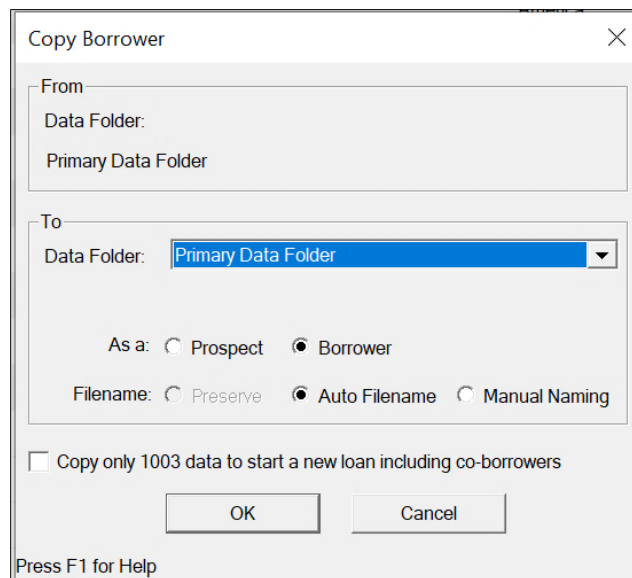

Figure 20: Copy Borrower

6. Select the appropriate **As a** radio button.
7. Select the appropriate **Filename** radio button:
8. Select the **Copy only 1003 data to start a new loan including Co-Borrowers** to copy the loan file plus the following documents:
 - User-defined document requests
 - Due date calculations defined in the *Document Requests* section of the *Status* and *Checklist* screen.
 - The originator identified in the *Borrower Information* screen.
 - The processor identified in the *Borrower Information* screen.

Note: The audit trail log is not copied with the loan data when the checkbox is selected. (See [Audit Trail](#) for details.)

9. Click **Yes** on the *Copy Confirmation* dialog.

Rename Existing File

Use the steps in [Duplicate Existing File](#) to copy and rename an existing file. This option reuses existing information for repeat loans or second mortgages.

Create Co-Borrower File

Co-Borrower files are used for applicants who are not married to each other. A maximum of five Co-Borrowers are allowed per loan. Co-Borrower applications are saved under the primary Borrower file name with the .cb[X] extension. The **X** in the extension denotes the Co-Borrower number.

Example: The extension for the first Co-Borrower on a loan is cb1, the second Co-Borrower, cb2, etc.

1. Click the **Loans** tab.
2. Perform a search for the loan file to copy. (See [Standard Loan Search](#).)

3. Select **Bor/Co-Bor** menu.

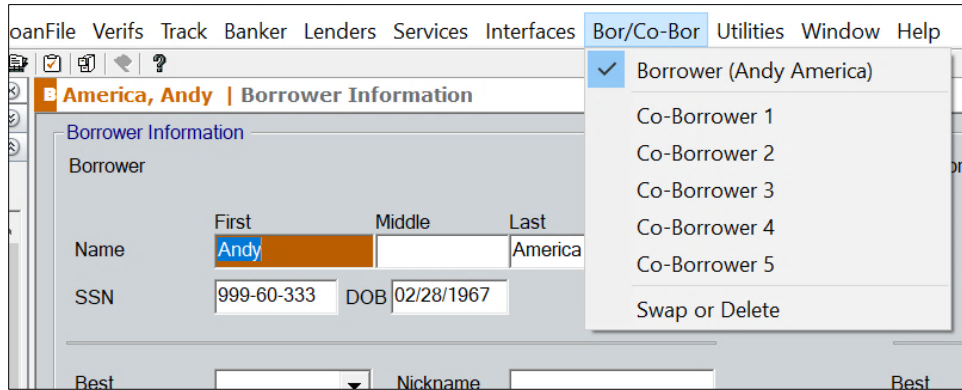

Figure 21: Bor/Co-Bor Menu

4. Select the appropriate **Co-Borrower Number**.

Note: See [Add/Swap/Delete Borrowers & Co-Borrowers](#) for additional information.

Save Loan Files

Use the following methods to save loan files.

Opened Loan File

Click **Save** to save open loan files.

Figure 22: Save Open Files

Files are saved in the following formats:

Prospect Extension: .prs Location: c:\PNTDATA\Prospect\pointfile.prs

Borrower Extension: .brw Location: c:\PNTDATA\Borrower\pointfile.brw

Co-Borrower Extension: .cbx Location: c:\PNTDATA\Borrower\pointfile.cbx

Save File as a Point Compressed File

Save data files in Point Compressed File (pcf) format to email as an attachment when the company email program does not communicate with Point (such as a web-based email account).

1. Open the loan file to save.
2. Select **E-mail** from the **File** menu.
3. Select Point Data File.
4. Enter the Email Password.

Figure 23: Email Point Data File Dialog

5. Click **Save as PCF**.
6. Set the save location on the *Save As* dialog.
7. Enter the filename.
8. Click **Save**.

Note: Send the file as an attachment from the email application. (See [Email Data File](#) for additional details.)

Open Multiple Files

Select the **Keep Open** checkbox in the workspace before opening another file to allow multiple loan files to be opened.

The new file opens to the *Borrower Information* screen without closing the open file. Switch between open files by selecting the file name from the list of open files in the **Window** menu.

The screenshot shows a software interface with various input fields and a 'Keep open' checkbox. A red arrow points to the checkbox, which is currently unchecked. The interface includes fields for 'Ocean Pines #823', 'Mixed-Use Property', 'Manufactured Home', 'No Units', 'Experian/FICO', 'TransUnion/Empirica', 'Equifax/BEACON', and 'Minimum FICO'. At the bottom, there are tabs for 'Mtg Insurance', 'Sub Financing', 'Construction', 'QM', and 'Keep open'.

Figure 24: Keep File Open

Borrower Information Screen

The *Borrower Information* screen captures initial Borrower/Co-Borrower information and subject property details.

Borrower/Co-Borrower Information

Use the following steps to complete the **Borrower/Bo-Borrower Information** fields.

1. Select **Borrower Information** from the *Forms* menu.
2. Enter Borrower **Name**.

The screenshot shows the 'Borrower Information' screen. It is divided into two main sections: 'Borrower' and 'Co-Borrower'. The 'Borrower' section has a 'Copy from Borrower' button. Both sections have fields for Name (First, Middle, Last, Suffix), SSN, and DOB. Below these are fields for Best (dropdown), Nickname, H Phone, B Phone, Cell/Alt, and Fax. At the bottom, there are fields for Present (Own/Rent), No of, Street, Unit, City, State, Zip, and Country.

Loan Comparison

Point provides tools to compare loans that contain the benefits, costs, requirements, and other information used to determine which loan type of loan required for successful financing. Use the *Loan Comparison* screen to compare three loan scenarios side-by-side. The *Loan Comparison* screen provides immediate answers to questions about loan choices when used with the *Loan Program Templates* and the *Closing Cost Scenario Templates*.

The tools enable the following loan comparisons:

- Compare three different loan scenarios
- Comparing a sample FHA versus a conventional loan

Note: It is important to be consistent among the scenarios. Include taxes, insurance etc. in all scenarios when used.

Perform Loan Comparison

Existing loan data from the loan file automatically populates in the *Loan Comparison* fields in the **Prospect Program** column. The *Anti-Steering Disclosure Scenario 1* and **Scenario 2** data populates the *Loan Comparison Scenario 1* and **2** columns.

Note: Only the current loan file data can be edits. Use the *Anti-Steering Disclosure* screen to edit the scenario data.

Tolerance

The **Tolerance** button opens the *Tolerance* screen that displays all the individual fees and the calculations used to determine tolerance.

The *Tolerance* screen contains two comparison tables:

Fees that cannot Change Table

The **Fees that cannot change** table contains zero tolerance fees. Zero tolerance indicates the fees cannot increase from those originally disclosed on the *Loan Estimate*. Lenders are not permitted to charge more than the amounts for fees disclosed unless there is a change of circumstance that would trigger the need for a revised disclosure. Fees that fall in this category are typically for services the lender has control over or access to the actual fee amounts.

The screenshot shows a software interface titled "Tolerance". At the top, there is a "Baseline" label followed by a dropdown menu and a text input field. Below this is a section header "Fees that cannot change" above a table. The table has five columns: "Description", "Closing Di...", "Baseline", "Tolerance", and an empty column. The table is currently empty. In the bottom right corner of the interface, there is a "Total \$" label followed by a text input field.

Figure 167: Fees that cannot Change Table

Fees that fall under this category include:

- Fees paid to the Lender, Mortgage Broker, or Affiliate of either.
- Fees paid to an unaffiliated third-party also apply if the Lender did not permit the Borrower to shop for a third-party service provider for any settlement service.
- Transfer Taxes
- Origination Fees
- The Zero Tolerance fees are in the following sections:
 - Origination Charges.
 - Services You Cannot Shop For, and some of those in section.
 - Services you Can Shop For.

Aggregate of fees that cannot change more than 10%

Description	Closing Di...	Baseline	10%

Total \$ \$ \$

Tolerance \$

Figure 168: Aggregate of Fees

The **Aggregate of fees that cannot change more than 10%** table list the description of:

- Fee(s) that have a 10% tolerance.
- Current fee amount.
- Baseline the fee is being compared to.
- Tolerance coverage

The **Total** fields at the bottom of the table total:

- Overages for the current fees
- Fee baselines
- Amount exceeding the 10% cap.

Any fees that change between the *Loan Estimate* and the *Closing Disclosure* are listed in the table but not looked at on an individual level. The tolerance is calculated by the total sum of the amount increases. There is only a need to cure if total sum has increased by over 10%.

Fees that fall under this category are:

- Recording Fees
- Third-party services not paid to the Lender or Lender Affiliates.
- Services the Borrower can shop for: If the Borrower is allowed to shop for a service, but shops off the Written List of Service Providers, the item will change to the Cannot Shop section on the Closing Disclosure.

The 10% tolerance fees are in the following sections:

- Services You Cannot Shop For
- Services You Can Shop For
- Taxes and Other Government Fees

Reset the Baseline

The fees in the **Baseline** column are listed in either table and are based on the fees from the *Loan Estimate* or the last saved fees from the *Loan Estimate* or *Closing Disclosure* after the baseline has been reset.

Reset the **Baseline** to match the current fees and recalculate the tolerance when the following occurs:

- There is a change of circumstance.
- When the fees change from the disclosure to disclosure.

Note: Resetting Baseline overwrites the fees in the **Baseline** column with the current fees from the *Loan Estimate* or *Closing Disclosure*.

1. Click **Tolerance**.
2. Select the appropriate option from the **Reset Tolerance** dropdown.

Post Consummation Fees

The **Post Consummation Fees** tab opens the *Post Consummation Fees* dialog for construction costs. (See [Post Consummation Fees](#) for details.)

Good Faith Estimate

The *Good Faith Estimate* (GFE) includes an itemized list of fees and costs associated with personal loan. The form is provided within three business days of the loan application.

Many of the fields on the *GFE* are calculated fields containing the total of a group of fees documented on the *Fees Worksheet*. The *GFE* field is automatically updated when a fee field is initially populated or changed on the *Fees Worksheet*.

Edit individual *Fees Worksheet* values on the to modify the aggregate value.

The values in the following fields on the *GFE* form are calculated from values entered on the *Fees Worksheet*:

- Origination Charge
- Title Services and Lender's Title Insurance
- Government Recording Charges
- Transfer Taxes
- Initial Deposit in Escrow Account

Fees marked as paid outside of closing are included in the total calculation if the POC checkbox is selected on the *Fees Worksheet*.

Note: Fields that have a one-to-one correlation with fields on the *Fees Worksheet* are identified when discussed below.

The screenshot shows a web form titled "America, Andy | Good Faith Estimate". It is divided into two main sections: "GFE Disclosures" and "Important Dates".

GFE Disclosures:

- Disclosed Date:** A date input field with a calendar icon.
- Re-disclosed Date:** A date input field with a calendar icon.
- Disclosed Method:** A dropdown menu.
- Re-disclosed Method:** A dropdown menu.

Important Dates:

- Date Prepared:** A date input field with a calendar icon.
- Interest Rate Available Through:** A date input field with a calendar icon, followed by a "Time" field and a dropdown menu.
- Estimate Available Through:** A date input field with a calendar icon, followed by a "Time" field and a dropdown menu.
- Rate Lock Period:** A numeric input field followed by the text "days".
- Days Before Settlement Interest Rate Must Be Locked:** A numeric input field.

Figure 170: GFE Disclosures and Dates

3. Enter the **Re-disclosed Date**.
4. Select **Disclosed Method**.
5. Select the **Re-Disclosed Method**.

6. Enter current date in the **Date Prepared** field.
7. Enter the **Interest Rate Available Through** date and time information.
8. Enter the **Estimate Available Through** date and time information.
9. Enter the number of days the loan must close before the rate guarantee expires in the **Rate Lock Period** field.
10. Enter the minimum number of days the interest rate must be locked before the loan can close in the **Days Before Settlement Interest Rate Must Be Locked** field if applicable.

Summary of Loan

Use the following steps to complete the non-populated **Summary of Loan** fields.

1. Enter the **Base Loan Amount** if not prepopulated.
2. Click the **Monthly Payment** button.
3. Make the necessary adjustments on the *Monthly Payment Settings* dialog and click **OK**. (See [Figure 112](#).)
4. Select the **Can the interest rate rise?** checkbox for an ARM mortgage.

Note: The **It can rise to a maximum of** and **First change will occur in** fields are populated based on information entered in the *Truth-In-Lending* form, *Amortization* screens, and the *Monthly Payment Settings* dialog.

5. Select the **Even if payments are made on time, can the Loan Balance rise?** checkbox if the loan has product features that could cause the loan balance to increase even if the payments are made on time.

Note: The checkbox selection is not required when escrow items paid through the loan are the only cause of the loan balance increasing.

6. Select the **Even if payments are made on time, can the Monthly Principal, Interest, and any MI rise?** checkbox if an increase in the following can occur and increase the monthly payment (even when payments are made on time):
 - Principal
 - Interest
 - Mortgage insurance

Note: The *First Increase Can Be In*, *Monthly Amount Owed Can Rise To*, and *Maximum Amount Can Ever Rise To* fields are calculated based on information entered in the *Truth-In-Lending* form, *Amortization* screen, *Monthly Payment Settings* dialog, and *PMI/MIP/FF/USDA* selections.

7. Select the Loan has a Prepayment Penalty checkbox and enter the maximum amount of the penalty in the Maximum Penalty field if the loan has a prepayment penalty.
8. Select the Loan has a Balloon Payment checkbox if the loan has a balloon payment.

Note: The **Balloon Payment of** and **Due In** years fields are calculated based on information entered in the **Term/Due** fields or on the *Mortgage Loan Disclosure Statement* (MLDS.)

Adjusted Origination Charges

1. Select the This Good Faith Estimate is being provided by Broker checkbox if not selected.

Figure 171: adjusted Origination Charges

Note: The checkbox is selected if setup in the If you completed the Company Information defaults. (See [Display Ratios](#) for details.)

2. Verify and correct any fees on the *Fees Worksheet* that comprise the total origination charges.

Note: The **Origination Charge** field is a calculated field and always disabled. The field reflects the total fees the lender is charging to provide the loan to the Borrower. It also includes the charges for the mortgage Broker, if applicable. The charge does not include the charges for third-party services. The field is populated with the sum of the following fees itemized in the **Our Origination Charge** section on the *Fees Worksheet*:

- Lender's Inspection Fee
- Mortgage Broker Fee
- Processing Fee
- Underwriting Fee
- Wire Transfer
- User-defined fees

3. Select the appropriate option for **Credits or Charge Points** for the specific interest rate chosen.

Note: The **Adjusted Origination Charges** field is populated in the **Summary of Settlement Charges** section. Use the **Tradeoff** table at the screen bottom to create scenarios that show how the settlement fees are affected with a higher or lower interest rate.

All Other Settlement Services Charges

Use this section to itemize fees for services for which the provider is selected and required by the lender or the originator.

1. Enter the estimated charges for required third-party services in **Required Services** empty fields.

2. Enter any user-defined services and estimated charges in the empty fields.

Remaining Fees

Use the following steps to complete the remaining fees.

1. Verify and correct fees on the *Fees Worksheet* that comprise the **Government Recording Charges**.

Figure 174: GFE Remaining Fee Fields

Note: Charges are populated with the recording fees in the **Government Recording Charges** section on the *Fees Worksheet*.

2. Click the **Government Recording Charges Lock** and manually enter the fee.
3. Verify and correct fees on the *Fees Worksheet* that comprise the **Transfer Taxes**.

Note: Taxes are calculated from the **Transfer Taxes** section on the *Fees Worksheet*.

4. Click the **Transfer Taxes Lock** and manually enter the fees.
5. Verify and correct fees that comprise the total initial escrow deposit on the *Fees Worksheet*.

Note: The **Initial Deposit in Escrow Account** field is populated with the sum of the following fees itemized in the **Initial Deposit for Your Escrow Account** section on the *Fees Worksheet*:

- Hazard Insurance Reserves
 - Mortgage Insurance Reserves
 - County Property Tax Reserves
 - School Taxes
 - Flood Insurance Reserves
 - User-defined fees
 - Aggregate adjustment
6. Select the **Includes all property taxes** checkbox if the initial escrow deposit includes payments for all property taxes.

7. Select the **Includes all insurance** checkbox if initial escrow deposit includes all insurance.
8. Select the **Other** checkbox if initial escrow deposit includes payments for some, but not all fees.
9. Enter the included fees in the **Other** field.
10. Enter the number of days that interest is being charged based on the estimated settlement date.
11. Enter the estimated settlement date in the **If Settlement** field.

Note: These fields are populated from the *Fees Worksheet* if the interest information in the **Daily Interest Charges** section is completed.

12. Enter the estimated insurance charges the Borrower is required to pay before the loan closes.

Note: The Hazard Insurance field is automatically populated from the fields in the **Hazard Insurance Premium** section on the *Fees Worksheet*.

13. Enter the flood insurance premium in the **Flood Insurance** field.
14. Enter or select an insurance type and enter the estimated fees if required.

Tradeoff Table

Use the following steps to complete the **Tradeoff** table.

Select the **Display Tradeoff Scenarios** checkbox to include alternate scenarios on the printed GFE.

Tradeoff Table			
<input type="checkbox"/> Display Tradeoff Scenarios	Loan in this GFE	Same loan with lower settlement charges	Same loan with a lower interest rate

Note: Proceed to Step 9 when the second checkbox is selected.

3. Click **Add Provider**.
4. Enter the **Company Name** in the Edit Service Provider dialog. (See [Figure 157.](#))

Note: Use the **Cardex Lookup** button to locate a company listed in Cardex.

5. Enter company representative in the **Name** fields.
6. Complete the remaining company information.
7. Click **Save & Close** to close the dialog.

Note: Click **Save & New** to add another company.

8. Select checkbox for the required service.
9. Enter the **Fee Amount** if the field is enabled.
10. Repeat Steps 4 – 8.
11. Repeat Steps 9 – 11 for remaining enabled services.

GFE Block 5

Use the following steps if **GFE Block 5** is not populated.

1. Enter a value in the **Title Insurance (Owner's)** Fee Amount field.

Figure 177: GFE Blocks 5 & 6

2. Follow Steps 4 – 8 above for remaining fields.

GFE Block 6

Services previously entered on the *Fees Worksheet* are displayed. Values in parentheses represent fees to be paid outside of escrow or fees not being paid by the Borrower.

1. Enter additional services and fees as required. (See [Figure 177](#).)
2. Select the **Shopping Allowed** checkbox for services for which the Borrower can shop.
3. Click **Save** to save form.

Transmittal Summary (1008)

The *Transmittal Summary* form communicates the foundational loan information. The form is required when submitting a loan to underwriting.

IMPORTANT! Complete all other forms prior to the *Transmittal Summary* to enable appropriate data import.

Point has three Transmittal Summaries:

- *Transmittal Summary*: Used for a single Borrower set.
- *Combined Transmittal Summary*: Used for multiple Borrower sets.
- *Combined Transmittal Summary - New*: Used for multiple Borrower sets in the new format.

Note: The select *Transmittal Summary* impacts information included and the form layout.

Transmittal/Combined Transmittal

Many *Transmittal Summary* fields are not enabled when using the Combined Transmittal Summary. The non-enabled values are populated from the primary Borrower/Co-Borrower *Transmittal Summaries*. Modify the individual *Transmittal Summary* to add or change an option.

Use the Transmittal Summary for a single Borrower set, or the first Borrower set on a loan.

1. Select Transmittal Summary from the Forms menu.
2. Select **Transmittal Summary** from the sub-menu.

Borrower and Property Information

Complete the non-populated **Borrower and Property Information** fields.

1. Select the **Property Type** from the dropdown.

Loan Demands

The **Demand** section is used to record certain loan related fees.

1. Click the **Loan Demands** button.

The dialog box titled "Loan Related Fees" contains three rows of input fields:

- Loan Origination: 0.000 % + \$ [] = []
- Loan Discount: 0.000 % + \$ [] = 0.00
- Yield Spread Premium: 0.000 % + \$ [] = 0.00

Below the input fields are three radio buttons: Lender, Broker, and Borrower. At the bottom are "OK" and "Cancel" buttons, and a small text "Press F1 for Help".

Request for Tax Return

Use the *Request for Tax Return* form to provide the Borrower authorization to verify tax information with the Internal Revenue Service.

Form 4506 orders copies of tax returns.

Form 4506-T orders transcripts of tax returns.

Form 4506-C enables Income Verification Express Service (IVES) participants to order tax transcript records electronically for a third-party.

A single screen is used in Point to complete the 4506, 4506-T, and 4506-C forms.

The **Send Return Transcript To** section from the *4506-T* screen is used to print the **IVES Participant Name** and **SOR number** in **Section 5a** of the *4506-C* form.

A separate print package must be created for the *4506-C* form because the *4506-T* and *4506-C* use the same fields to print the **Return Address** on the *4506* form as opposed to the **IVES Participant Name** and **SOR number** for the *4506-C* form.

Note: The IRS instructions to complete and submit the 4506 and 4506-T are provided on page 2 of each form. Select Print Preview with the form open to view the IRS instructions.

Custom Screens/Fields

The Custom Screens/Fields Form menu option is available when user-defined screens are created. (See [Custom Screen Settings](#) for details.)

Chapter 7: eLOANFILE MENU

Point includes a group of screens in the **eLoanFile** menu that compile loan information for electronic submission to vendors or borrowers. The screen fields automatically populate with information from other screens. Remaining fields are manually completed.

Use **eLoanFile Document Management** option to select the documents for submittal to vendors or borrowers and the stacking order the documents are printed.

See [Print Forms](#) for form printing details.

eLoan Document Management

Access the Document Management System from the **eLoanFile** menu. Use the Repository (with the Document Management System) to electronically manage the loan documents generated inside and outside of Point. External documents may include:

- Bank statements
- Pay stubs
- Identification documents, etc.

Each loan file has a separate document repository used to store and manage electronic documents associated with that file. Use the document repository to retain an electronic file of all information associated with the loan.

The document repository facilitates the movement of documents throughout the loan process. Select all the documents from the repository and create a package to send. The Document Management system records the package date and time stamp while printing or emailing.

The document repository is used to send documents to and request documents from borrowers through Zip or WebCaster.

The flow of documents through the document repository is recorded in the audit trail file if your site runs PointCentral and the audit trail is enabled in PointCentral. See [Audit Trail](#) for details.

Note: The audit trail is not available when Point is not connected to PointCentral.

The document repository stores the following types of documents:

- Electronic documents created outside of Point.
- Point-generated forms accessible from the *Borrower Forms* dialog.
- Documents generated using the Point services or interfaces.

A copy of a document requested using one of the Point services is automatically stored in the document repository when received if the Automatic Document Storage option is set in the **Utilities** menu. See [Set Automatic Document Storage](#) for details.

Note: The name of the user who is logged in is automatically populated in the Stored by field. When Point is not running in a secure mode, you can change the name that displays by selecting Change Name from the File menu while in the Loans tab.

Add Documents

Use the following sections to add documents to the Repository and assign document properties.

Add Borrower Forms

Selected forms may be converted to a single PDF document or stored as individual files. Individual files retain the form name. Multiple files stored as a single PDF are named during storage.

1. Open the borrower or prospect file with information to store.
2. Select Document Management from the eLoanFile menu.
3. Click **Add**.

Note: Click **Remove from Checklist** to remove a selected item from the **Loan Checklist**.

11. Repeat Steps 1 – 10 for other list items.

Note: Select a blank field to enter a user-defined item.

Document Requests Status

The **Document Requests** section is a list of various items required from the Borrower to process the loan.

Documents are added to the **Document Request List** when one of the following occurs:

- A document is electronically sent to the Borrower WebCaster account from the document repository requiring a signature.
- A loan condition is added to the *Banker Conditions* screen and then select the **Show in Track Conditions Screen** checkbox on the *Edit Condition* dialog is selected.

Note: Selecting the **Show in Track Conditions Screen** checkbox does not record the loan condition in the **Document Requests** list when editing a previously saved loan condition. The checkbox must be selected at the time of creation to be saved in the **Document Requests** list.

Check Document Status

Point connects directly to WebCaster to check for uploads and documents viewed by the Borrower. Point updates the **Document Requests** list and document repository accordingly after selecting **Send/Retrieve** when a document is not selected from the list.

The *WebCaster* dialog displays with the **Document Description** and the **Notes to Borrower** sections are disabled. Enter login information and click **Send/Retrieve** to initiate the connection to WebCaster to check for uploads and viewed documents.

Send Document Requests

Use the following steps to send a document request to a Borrower WebCaster account.

1. Select the document to send.

Figure 335: Document Requests

2. Click **Send/Retrieve**.
3. Enter a due date in the **Date** field on the *Send/Retrieve* dialog.

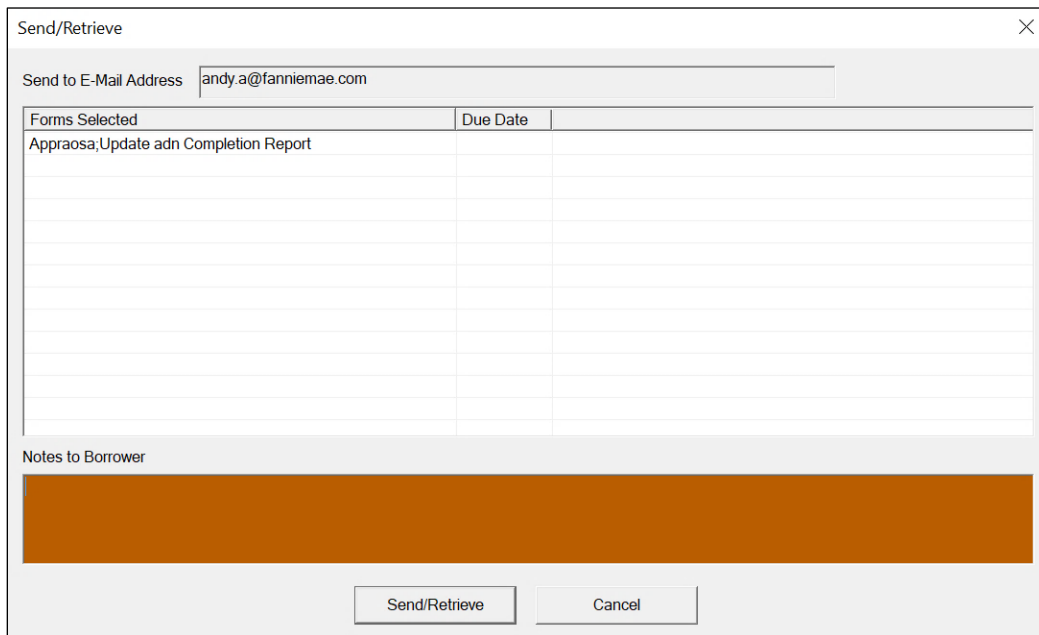

Figure 336: Send/Retrieve Dialog

4. Enter instructions or comments for the Borrower in the **Notes to Borrower** field.

Note: The *Comments* are added to the *Conversation Log* in the Point Borrower file.

5. Complete the *WebCaster Administration Login Information* section if prompted.
6. Select the **Save Password** checkbox to save the login information for future logins.
7. Click the **Send/Retrieve** button.

Note: A *Status* dialog displays with the document descriptions, the action taken, and if the transmission was successful when the transaction is complete.

Edit Document Requests

Use the following steps to edit a document request.

1. Select the document in the **Document Requests** list. (See [Figure 335.](#))
2. Click **Edit**.
3. Make appropriate changes to the request.

Figure 337: Edit Document Requests

4. Click **OK** to save.

Add Document Request

Use the following steps to add a new document request.

1. Double-click an empty row in **Document Requests** list. (See [Figure 335.](#))
2. Click **Edit**.
3. Enter the document request details in the Edit Document Requests dialog. (See [Figure 337.](#))
4. Click **OK** to save.

Track Conditions

The *Conditions* screen itemizes the various conditions of the loan. The fields are populated with conditions from the *Banker Conditions* screen identified by selecting the **Show in Track** checkbox when the condition is added. Use *Track Conditions* to track loan processing and underwriting conditions for which the originator and processor are responsible.

1. Select **Conditions** from the **Track** menu.
2. Select a **Condition** to edit.

Closing Documents

The services for ordering closing documents are like other services except for the following:

- An investor and product must be selected prior to requesting documents
- Request dialog does not require loan information

Note: The loan information required for the request is retrieved from the screens in Point

- Information not part of the loan file in Point may be required by some providers
- An interface is available to submit vendor-specific data for providers requiring the information

- Viewing of loan data analysis is available to determine if the loan is compliant if the analyze feature is configured on the system

Note: Use the [Closing Docs](#) under **Interfaces** option for submitting closing documents directly to vendor websites.

Select Investors & Products

Select the investors and the product prior to ordering closing documents.

Note: Update the *Select Product* dialog regularly to verify the product selection is still available. An error occurs during request submittal if the selected product was discontinued.

1. Select Closing Documents from the Services menu.
2. Choose Select a Product.
3. Click **Update Products** on the *Select Product* dialog to update a provider list with the investors and products they currently offer. (See [Figure 306](#).)

Note: The *Select Product* dialog is empty the first time this screen is accessed.

4. Select a provider from the **Documents Provider** dropdown list on the *Investors and Products Login* dialog.

Figure 498: Investors and Products Login Dialog

Note: Use the provider telephone number and web page links for additional information or to create or update an account.

5. Enter the required Login Information.
6. Click **Submit**.

- Click the **Save Password** checkbox to save the password.

Note: The *Select Product* dialog re-displays with the selected providers investors and products listed. The top of the screen indicates when the last update was made and displays the name of the current provider.

- Click the **+ sign** next to the investor name to expand the product list and enable the **Select Product** button.
- Select the product to order.
- Click Select Product.

Request Closing Documents

Use the following steps to request closing documents after selecting the investor and products.

- Click **Request Documents** to process the request for the documents from the selected investor.

The image shows a dialog box titled "Closing Documents Request" with a close button (X) in the top right corner. The dialog is divided into three main sections:

- Document Provider:** A dropdown menu is set to "GuardianDocs". Below it, the phone number "888-323-3748" is displayed, along with two blue hyperlinks: "Getting Started" and "Administration".
- Document Package Type:** A dropdown menu is set to "Closing Documents Full Pkg (CD) - to Point". Below this is a text input field for "Document eDelivery (separate multiple e-mail addresses by comma or semi-colon)".
- Request Type:** Three radio buttons are present: "Order New Documents" (which is selected), "Redraw Documents", and "Check Status of Pending Order".

At the bottom of the dialog, there is a text input field for "Order Reference Number" containing the value "EDC93A12CC5D428DAE574D527D925489". Below the input field are two buttons: "Submit" and "Cancel". At the very bottom, there is a small text label "Press F1 for help".

4. Click **Add** to move the records to the **Employment Records to Populate** list.
5. Click **Populate**.

Correct Service Request Submission Errors

Request information is verified during transmission after the service request is submitted. A dialog displays containing a list of fields with errors if required data is invalid or is missing from the request.

Use the following steps to correct fields containing invalid or missing data.

1. Double-click the field name to go to the field that caused the error.
2. Add or correct the data as needed to correct the error.
3. Click **Refresh** to remove the corrected fields from the list.
4. Click **Refresh** to close the dialog and return to the request dialog after all fields are corrected.

5. Click **Submit** to resubmit the request.

Check Pending Request Status

Documents are automatically stored in the Document Repository when the request for a service is successful. The ordered and received dates are automatically updated in the loan checklist and third-party documents if those date fields are empty.

Retrieve the status of pending title, escrow, or flood request after opening the loan file.

1. Open the loan file with a pending request.

Note: *Pending Orders* dialog displays if a response was received from the provider. The orders with a response from the provider are listed in the dialog.

2. Select the checkboxes for the services to view.
3. Click **OK**.

Note: Click **Cancel** to go directly to the loan file.

4. Enter login information for the selected provider.
5. Click **OK** to display the view report dialog.

Note: Clicking **Cancel** opens the next provider login dialog. The loan file displays if another provider is not selected.

6. Click **View** to open the report.

Note: Click **Close** to proceed to the next vendor.

View Documents

Retrieve documents from the **Document Repository** to view and print.

1. Select the **View** option for the ordered Service Document to review.
2. Remove the unwanted documents from the list by unchecking the boxes.
3. Select document(s) to view and click **View/Print** to display a PDF file of the selected file(s).
4. Click **Print** to print the file.
5. Click the **Save** icon to save the PDF file to a secured location of choice.
6. Click **Close** when finished with the file.

Chapter 13: INTERFACES MENU

Uniform Collateral Data Portal

The Uniform Collateral Data Portal (UCDP) is used to electronically submit appraisal data (UAD and non-UAD XML) files to Fannie Mae and Freddie Mac. The following XML files are supported:

- MISMO 2.6 GSE
- ACI
- AI Ready

The appraisal XML file to submit to the Government Sponsored Enterprise (GSE) must be stored in the **Document Repository** to access from the **UCDP** screen.

The following table shows the UAD XML and non-UAD XML supported forms.

Table 10: Supported XML Forms

UAD XML	Non-UAD XML
1004/70	1004C/70B
1073/465	1025/72
1075/466	2090
2055/2055	2095

The portal is accessible only in borrower files from the **Interfaces** menu and the **Shortcut** menu.

Set up seller identification and login information in the Point utilities prior to use to avoid entering the data each time you submit an appraisal for a new loan file to Fannie Mae or Freddie Mac in the Uniform Collateral Data Portal. The information is permanently stored and retained for future use. (See [Uniform Collateral Data Portal Setup](#) for details.)

UCDP Submission

Use the following steps to submit an appraisal to Fannie Mae and Freddie Mac through UCDP.

1. Open the borrower file.
2. Select **Uniform Collateral Data Portal** from the *Interfaces* menu.

3. Select a **Form Type** from the dropdown. (See [Table 10: Supported XML Forms](#) for supported forms.)

Figure 512: UCDP Screen

4. Click the **Select** button.
5. Select the **appraisal XML** file from the **Document Management File List**. (See [Figure 299](#).)
6. Click **Select** to display the document in the *Uniform Collateral Data Portal* screen **Appraisal 1** field is populated with the appraisal name.
7. Repeat Steps 3 – 6 for up to two additional appraisals, if applicable.
8. Click the corresponding **Remove** button and click the **OK** button in response to the confirmation prompt to remove an appraisal.

Note: **Appraisal 1** must be replaced another appraisal after the submission is completed to remove.

9. Enter the **Loan Number** if not populated.

Note: Use the **Lock** to change a listed **Loan Number** if required.

10. Select the **Fannie Mae Add to Submission** checkbox if applicable and complete the **Fannie Mae** fields.
11. Select the **Freddie Mac Add to Submission** checkbox if applicable and complete the **Freddie Mac** fields.

12. Click **Submit**.

Note: Submit additional appraisals to the same investor after the original submission or submit the appraisals to a new investor at any time. An investor cannot be removed from the submission after an appraisal is submitted.

13. Click **OK** in response to the *UCDP Submission Results* dialog.

View Hard Stops

The *View Hard Stops* dialog displays if a hard stop occurs. The *View Hard Stops* dialog contains the errors that occurred during the submission of the appraisal.

The **Override Status** and **Override Decision** columns are populated with **APPROVED** and the Override request accepted if the submittal is successful.

Some overrides are performed automatically and approved during submission.

The **Override Allowed** column states **Automatic** when an automatic override occurs.

The **Override Decision** column states **Override automatically** approved.

The **Override Allowed** field states Yes when a manual override is allowed.

The **Override Status** column is blank when a manual override is required.

The **Override Allowed** field states **No** when an override is not allowed.

Note: The must be corrected and the file re-submitted when the **Override Allowed** field states **No**.

Review each message and determine whether a manual override is allowed.

Use the following steps to perform a manual override.

1. Select the **Error**.
2. Click **Create Override** to open the *Edit Override* dialog.
3. Select a **Reason Code** for the override from the dropdown.
4. Enter a Comment for Reason Code Other.

3. Click **OK** on the *List* dialog.

Create Escrow and Title Tables

Use the **Escrow** tables and **Title** tables options to create tables for standard escrow and title fees. The tables are accessed by clicking the **Table** button in the **Title Charges** section on the *Fees Worksheet*. See [Fees Worksheet](#) for details.

Escrow Tables

Create Escrow Table

Use the following steps to create Escrow tables.

1. Select **Escrow Tables** from the **Utilities** menu.
2. Select **Purchase**.

Note: Select **Refinance** to create an **Escrow Refinance** table.

Figure 579: Escrow Purchase Dialog

3. Click the **Add**.

4. Enter a **Table Name** to override the default table name.

Figure 580: Table Dialog

Note: Tables are numbered automatically when they are created.

5. Select one of the following fee calculations from the **Based On** dropdown list:
 - **Sales Price:** Fees are calculated based on the property sale price
 - **Loan Amount:** Fees are calculated based on the loan amount
 - **Appraisal Val:** Fees are calculated based on the property appraised value
6. Select the **Round Up** or **Round Down** radio button.
7. Enter a value in the **To nearest \$** field.
8. Enter the offset amount in the **Offset** field to offset the amount by a specific value.

Add Fee Range

The fees are calculated cumulatively (the base fee from each previous tier is added to the total fees). Subtract the previous tier base fee from the base fee of the tier currently being added to determine the amount to enter in the **Base** field when entering multiple-tiered fees.

Example: Enter \$250 in the **Base** field if the base fee for the first tier of a fee structure is \$250 for a sales price of up to \$250,000. Subtract the first-tier base fee (\$250) from the second-tier base fee (\$500) and enter the result (\$250) in the Base field if the second-tier base fee is \$500 for a sales price between \$250,001 and \$500,000.

1. Click **Add** on the *Table* dialog. (See [Figure 580](#).)

The 'Add Range' dialog box contains the following fields and controls:

- Up to:** A field with a brown background.
- Base:** A text input field.
- Factor:** A text input field.
- Formula:** A label '+ (* Sales Price)' indicating the calculation for the tier.
- Buttons:** 'OK' and 'Cancel' buttons.
- Footer:** 'Press F1 for Help'.

Figure 581: Add Range Dialog

2. Enter the maximum tier amount for selected **Based On** option in the **Up to** field.
3. Enter the base fee for the tier in the **Base** field.
4. Enter the fee percentage for the tier in the **Factor** field.

Note: The fee percentage must be entered in decimal format.

5. Click **OK** after the fee tier is entered.
6. Repeat Steps 2 – 5 for additional tiers.
7. Click **OK** on the *Table* dialog when the fee tiers are complete.

The completed fee table looks like the following figure based on the example:

The 'Fee Table' dialog box displays a table with the following data:

Up to	Base	Factor	Based On
1,000	500.00	750	Sales Price

Additional controls in the dialog include:

- Table ID:** 00000000
- Buttons:** 'Add...', 'Delete', 'OK', and 'Cancel'.
- Footer:** 'Press F1 for Help'.
- Roundings:** Radio buttons for 'Round Up' (selected) and 'Round Down'. Below them, a field 'to nearest \$' contains '1000' and a field 'with offset' contains '0'.

Figure 582: Fee Table

Note: The escrow fee value is not calculated when a sales, loan, or appraisal amount not defined in one of the tiers is entered in the loan application.

Edit Escrow Table

Use the following steps to edit a **Purchase or Refinance Escrow** table.

1. Select Escrow Tables from the Utilities menu.
2. Select **Purchase**.
3. Select the table to edit.

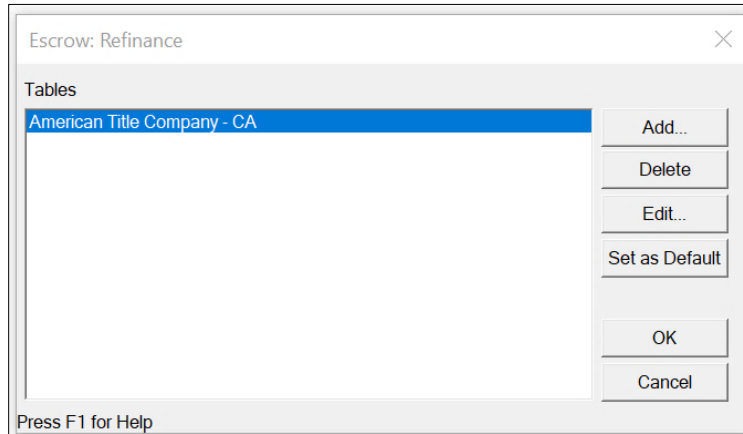

Figure 583: Escrow: Refinance Dialog

4. Click **Edit**.
5. Make appropriate changes on the *Table* dialog.

Figure 584: Edit Refinance Table

6. Click **Add** to add another fee tier.

Note: Select a fee tier and click **Delete** to remove the tier.

7. Click **OK**.
8. Click **Set as Default** on the to make the selected table the default.
9. Click **OK** to save.

Note: Click **Delete** to delete the highlighted table.

12. Enter the **Loan Status Password**.
13. Enter the **Loan Application Login** details.
14. Click **OK**.

Mobile Access

Use the **Mobile Access** utility to enable Point for mobile. The setup may be completed individually by each user on a personal computer, or by the Point Administrator on a single computer functioning as the mobile server for an entire group.

Note: This option is disabled for Point Central users.

The following are required before mobile access can be enabled in Point and the mobile featured used:

- Obtain Point mobile login credentials.
- Mobile user account must be created in MyCalyx.
- New users receive a unique activation ID which identifies the user as a mobile user.
- Connection ID has been received and identifies the computer where the connection is enabled.
- Computer to be used as a server is enabled.
- Borrower auto file naming is required for Point mobile users to save new loan files from their mobile devices.

The following information displays in the **Defined Users List** on the *Mobile Access Configuration* dialog when a user activates the mobile device:

- Point username for each device displays in the **User Name** column.
- Activation key associated with the user mobile device displays in the **Device** column.

Note: See [Auto File Naming](#) for setting the auto file naming.

1. Select **Mobile Access** from the *Utilities* menu.

Figure 595: Mobile Access Configuration

2. Select the Enable Point for Mobile Access checkbox.
3. Change the default lock expiration time if applicable.

Note: The lock expiration time is the amount of time the file remains idle checked out before locking user access.

4. Click **Email Connection ID** to email the Connection ID.

Note: The ID is required to access Point from a mobile device for the first time. An outgoing email message with the **Connection ID** in the body is opened in the default email application.

5. Enter the **Email Addresses** of the recipients using the computer as their mobile server.
6. Click to **Send** to send the email.
7. Click **OK** to activate the cloud connectivity.

Search/Display Settings

Use the following steps to select how search results are displayed when searches are performed on the **Navigation** panel.

Access Search/Display Settings/Pipeline

The following options are available from the *Search/Display Settings/Pipeline Options* dialog:

- Search Loan Settings
 - Auto Display Options
 - Extended Search Options
 - Pipelines
1. Select **Search Display Settings** from the *Utilities* menu.
 2. Select the appropriate link to continue.

8. Repeat Steps 3 – 6 to set up another set up colors.
9. Enter title for the selected options in the **Label 2** field.
10. Select the appropriate **Radio Box** button.
11. Select the appropriate **Checkbox**.
12. Click **OK**.

Web Browser

Use the **Web Browser** option to select the default web browser for Point.

1. Select **Web Browser** from the *Utilities* menu.

2. Click **Browse** to navigate to the web browser executable file.

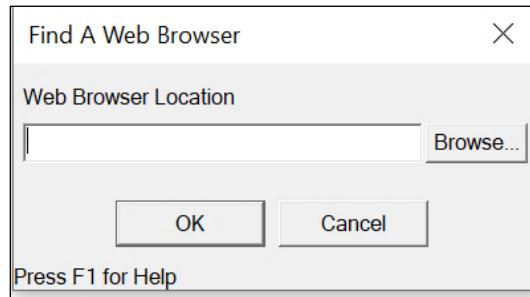

Figure 603: Find a Web Browser Dialog

3. Select the file.
4. Click **OK**.

Auto File Naming

Use the **Auto File Naming** option to enable automatic file naming and specifies the parameters Point uses when the option is enabled. Auto File Naming must be enabled to import batch files into Point.

Borrower auto file naming is required for Point mobile users to save new loan files from mobile devices.

Note: Assigning automatic names to files prevents the accidental overwriting of filenames. Different parameters can be specified for Borrower and prospect files.

1. Select **Auto File Naming** from the *Utilities* menu.
2. Select **Prospect** to set auto naming for prospect files.

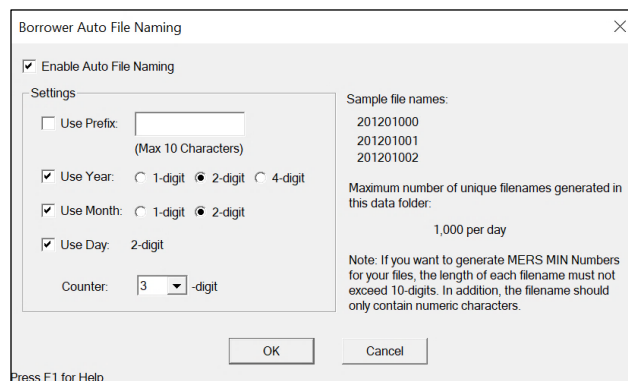

Figure 604: Borrower Auto File Naming Dialog

3. Select the **Enable Auto File Naming** checkbox.
4. Select the **Use Prefix** checkbox.
5. Enter a numeric prefix of up to 10 characters.

6. Select the corresponding checkbox for **Year**, **Month**, and **Day** to use the date or partial date in the file name.
7. Select **1-digit**, **2-digit**, or **4-digit** to specify the format for the year and month.
8. Select the number of digits to append to the file name from the **Counter** dropdown list to enable **Auto File Naming** to function properly.

Note: The file name cannot exceed ten characters to generate automatic Mortgage Electronics Registration (MERS) Mortgage Identification Number (MIN) Numbers for the file. See [Auto MIN Generation](#) for details.

9. Click **OK**.

Auto Save

The **Auto Save** option saves the currently opened file when:

- A change is made.
- Switching between screens.
- Prior to printing.

Note: Enabling this feature removes the ability to abandon changes to the file made in error.

1. Select **Auto Save** from the *Utilities* menu.
2. Select **Yes** to enable *Auto Save*.

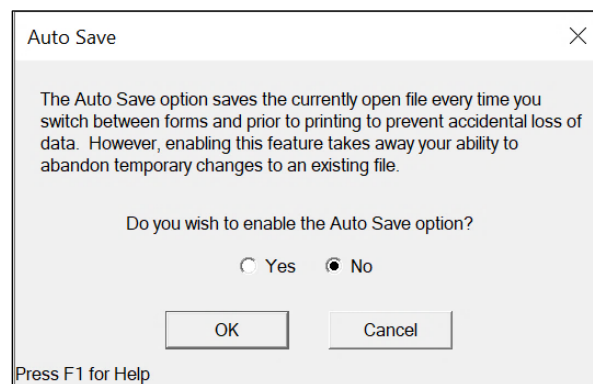

Figure 605: Auto Save Dialog

3. Click **OK**.

Auto MIN Generation

Use the **Auto MIN Generation** option to automatically generate the MIN.

1. Select **Auto MIN Generation** from the *Utilities* menu.

2. Select the Automatically generate MIN checkbox.

Figure 606: MERS Mortgage ID Setting

3. Enter the 7-digit Organizational Identification Number.
4. Click **OK**.

Zip Code Options

Use the **Zip Code** options to enable auto-filling of **City** and **State** fields based on the entered **Zip Code**.

1. Select **Zip Code Options** from the *Utilities* menu.
2. Select the **Automatically fill** checkbox to enable the auto fill option.

Figure 607: Zip Code Options Dialog

3. Select the **Use All Cap** checkbox if applicable.
4. Click **OK**.

Enable Field Pop Up Help

The field Pop Up Help displays when **F1** is pressed when the cursor is placed in a field. Select **Enable Field Pop Up Help** from the **Utilities** menu to turn the option on and off.

Display Field ID

Field IDs are used to:

- Import and export data
- Create custom forms
- Create report templates

Point includes a Microsoft Excel file containing a comprehensive list of field IDs and the screens where they are, in addition to using the **Utilities** functions to identify field IDs.

Note: The **Field ID Directory** spreadsheet is stored in the C:/WINPOINT directory with the file name FieldID.xls.

Select the **Display Field ID** from the **Utilities** menu to display field IDs when the cursor hovers over the field.

Load Field ID

Use the following steps to load the field IDs into the fields of an empty Borrower or prospect file.

1. Select **Load Field ID** from the *Utilities* menu.
2. Close and reopen the Borrower file after saving any necessary changes to return to the field values.

Subordinate Financing

The following information assists with proper calculations when processing a loan with a second mortgage. Information includes processing the following types of second mortgages:

- Primary homes.
- New first mortgages with new or existing second mortgages.
- Second or equity line mortgages on investment or second home properties.

Standalone Second Mortgage

A standalone second mortgage is a second mortgage not used for the specific purpose of buying a property.

1. Open a borrower file.
2. Click **Primary** as the property type and **Second Mtg** to indicate the second lien position from the **Loan Summary** section on the *Borrower Information* screen.

Figure 608: Borrower Information Loan Summary

3. Complete the following fields:
 - Appr Val

- Loan Amt
 - Note Rate
 - Term/Due
4. Leave the **Sales Price** field blank.
 5. Click the **Sub Financing** button to enter the existing first mortgage balance in the *Subordinate Financing Information* dialog.

Figure 609: Subordinate Financing Information

6. For the *4b. Other New Mortgage Loans* section, click on the **Add** button to add new 3rd and 4th mortgage loans (if applicable).

Note: Adding loans to the *4b. Other New Mortgage Loans* will populate the same 4b. table in *Loan Application-section 4*.

7. Click **OK**.
8. Click **HE & Oblig**
9. Enter the first mortgage payments.

Note: The amount of the second is already populated in the **Other Fin** field. Both amounts populate throughout the screens in Point.

Create New from Existing Mortgage

1. Open a borrower file.

2. Click **Primary** as the property type and **First Mtg** from the **Loan Summary** section on the *Borrower Information* screen.
3. Select **Cash-Out Refi** or **No Cash-Out Refi** as the purpose of the loan. (See [Figure 608](#).)
4. Click the **Sub Financing** button at the bottom of the workspace.
5. Click the **2nd Mtg** button.
6. Enter the information about the **second mortgage** and click **OK**.
7. Click the **Sub Financing** button.
8. Select the appropriate **Create Second Mortgage File** option.
9. Enter the **2nd Mtg Amount**.

Figure 610: Create & Link to New Second Mtg

Note: Select **Link to Existing Second Mortgage** from the menu to link to an existing file.

6. Unselect the **Use Auto File Naming** checkbox and name the file if applicable.
7. Click **Save on the Create and Link to New Second Mortgage** dialog.
8. Click **Yes** on the *Second Mortgage File Created Successfully* dialog to immediately open the file.
9. Click **OK** on the *Sub Financing* dialog to close.

Investment or Second Home 2nd Mortgage

Use the following steps to create a second mortgage for an investment property or second home.

1. Open a borrower file and click **Investment** as the property type and **Second Mtg** as the lien position from the **Borrower Information** screen. (See [Figure 608](#).)
2. Enter the applicable values for the property in the **Gross Rent** and **Occ Rate** fields the property type.
3. Complete the following fields:
 - Appr Val
 - Loan Amt
 - Note Rate
4. Complete the **Expenses** section.
5. Enter the first mortgage payment in the **First Mtg** field.

Note: The amount of the second is already populated in the Other Fin field. Both values are also populated in other screens containing these fields

6. Click the following buttons to calculate the fees:
 - HazIns
 - Taxes
 - Mtg Ins
7. Enter the Homeowner Association dues.
8. Enter any other expenses in the **Other** field.
9. Click the **Sub Financing** button to open the *Subordinate Financing Information* dialog.
10. Enter the amount of the first mortgage.
11. Enter other mortgage payments in the **Other Financing Information** section.
12. Click **OK**.
13. Enter the present mortgage payment for the borrower primary residence and additional costs in the **Present Monthly Housing Expense** section of the *Loan Application*.

Create Concurrent Purchase Loans

The first loan is usually for 80% of the value of the home, the second loan is for 10%, and the remaining 10% is the buyer's down payment when using a first and second loan for a purchase.

The down payment includes the second mortgage loan amount combined with the down payment. It does not show on the Loan Application. The monthly payment calculates in the **HE & Oblig** field and transfers to the **Proposed Monthly Housing Expenses** section on page 2 of the *Loan Application*.

Create First Loan

1. Create a new prospect or borrower file.

Note: This example uses a 20% down payment and the **LTV** and the **CLTV** fields both show 80%.

2. Enter the Borrower and Co-Borrower information.
3. Select the following In the Loan Type section:
 - Conventional
 - Primary as the property type
 - First Mtg as the lien position
4. Enter information for the first mortgage in the following fields:
 - Sales Price
 - Appr Value
 - Loan Amt
 - Note Rate
 - Term/Due fields
5. Click the **Sub Financing** button to open the *Subordinate Financing Information* dialog.

Note: The **New First Mortgage** field is not enabled if the open file is the first lien file. The **Closing Costs from New Second Mortgage** field is enabled. The **Closing Costs from New Second Mortgage** field is automatically populated when the new second mortgage is created and the closing costs are entered to match the following fields:

- **Cash From/To Bor** in the **Cash-to-Close** screen.
 - **Total Estimated Funds to Close** field on the *Fees Worksheet*
6. Click the **2nd Mtg** button to open the *Second Mortgage Payment* dialog. (See [Figure 610](#).)
 7. Complete the following fields for the second mortgage:
 - Loan Amount
 - Note Rate
 - Qual Rate
 - Term/Due
 - Interest Only
 8. Click **OK** (assuming **Appraisal Value** and **Sale Price** are the same).

Note: The amount automatically populates the **Other Fin** field in the **Monthly Income and Combined Housing Expense Information** section on the *Loan Application*. The value in the **LTV** field is still **80%**, but the value in the **CLTV** field is now **90%**.

9. Open page 2 of the *Loan Application* and complete the following information:
 - Click **HazIns** to enter the hazard insurance rate in the **Hazard Insurance** dialog or check the lock box to enter a **custom value**
 - Click **Taxes** to enter any tax rates for the property or check the **Lock** to enter a **custom value**
 - Click **Mtg Ins** to enter the mortgage insurance information for the subject property and click **OK** in the **Mortgage Insurance** dialog or check the **Lock** to enter a custom value
10. Open the *Fees Worksheet* and enter the fees for the **First Loan**.
11. Open the **Cash-to-Close** screen and complete the following information:
 - Verify field **J. Subordinate Financing** contains the second mortgage loan amount
 - Enter any other fees and credits in the line **I** fields
12. Save the file.

Create Second Loan

1. Select **Subordinate Financing** from the **File** menu.
2. Select **Create New Second Mortgage**.
3. Enter a file name If **Auto File Naming** is not enabled.
4. Click **Save**.
5. Click **Yes** to open the second mortgage file.
6. Verify the following information on the *Borrower Information* screen.

Appr Value	Same appraised value included in the first mortgage file.
Loan Amt	Second mortgage amount (10% of the sales price).
Note Rate	Rate for the second mortgage.
Term/Due	The Term/Due.
Mth Pmt	Second mortgage monthly payment.

7. Open page 2 of the *Loan Application* and verify the values in the **Proposed Monthly Housing Expenses**, including the **First Mtg, Other Fin, HazIns, Taxes** and **other fee fields** match the values in the first mortgage file.
8. Open the **Cash-to-Close** screen and verify the following information:

Table 14: Page 4 Concurrent Purchase Loans

Field	Value
Purchase Price (a)	Same as the 1st mortgage file
Subordinate financing (j)	Blank
For Sub Financing Only section (This section applies only to the closing costs from the new first mortgage)	
New First Mortgage	First mortgage loan amount.
Closing Costs from New First Mortgage	Sum of costs from the first mortgage. The sum in the Closing Cost box is the total of prepaids, closing costs, I/MIP/Funding Fee, Discount, minus Closing Cost paid by Seller and PMI/MI financed.
Loan Amt, excl. fee financed (m)	Second mortgage amount.
Loan Amount (o)	The total second mortgage amount (m + n).

9. Open the **Fees Worksheet** and enter any fees for the second loan.
10. Open the **Cash-to-Close** screen and enter any other fees on line **L**.
11. Save the file.

Create Concurrent Investment Loan

Use the sample information provided to complete a concurrent loan for an investment property.

Note: The closing costs for the first loan transfer to the **Closing Costs from New First Mortgage** field on the *Fees Worksheet* for the second loan.

Create First Loan

1. Create a **new prospect** or **borrower file** and complete the following information in the *Borrower Information* screen in the **Loan Type** section:
 - Select **Conventional**.
 - Select **Investment** as the property type.
 - Select **First Mtg** as the lien position.
2. Enter the **Gross Rent**.
3. Enter **Occ Rate**.
4. Enter the **first mortgage** information in the following fields:
 - Sales Price
 - Appr Value
 - Loan Amt
 - Interest Rate
 - Term/Due
5. Enter **20%** in the **Down pmt** field.

Note: The *LTV* and the *CLTV* fields should both contain **80%**.

6. Click the **Sub Financing** button to open the *Subordinate Financing Information* dialog.
7. Enter **10%** of the sales price in **the 2nd Mortgage** field.
8. Click **OK**.

Note: The amount automatically populates the **Other Fin** field in the **Monthly Income and Combined House Expense Information** section on page 2 of the *Loan Application*. The value in the **LTV** field is still **80%**, but the value in the **CLTV** field is **90%**.

9. Open page 2 of the *Loan Application*.

10. Click the **Other Fin** button in the **Monthly Income and Combined House Expense Information** section to open the *Second Mortgage Payment* dialog.
11. Enter the **Note Rate**, **Qual Rate**, and **Term/Due** for the second mortgage.
12. Click **OK**
13. Complete the hazard insurance, taxes, and mortgage insurance information.

Note: The amount in the **Total Housing Exp** field represents the **Principal, Interest, Tax and Insurance (PITI)** of the subject property. The amount in the **Net Rental Income** field equals the **Gross Rent** amount times the **Occ Rate**, minus the **PITI**. The **Net Rental** field displays the net rental income. The **Net Rental Income** populates the *1008 Transmittal Summary* if the **Net Rental Income** amount is positive. The **Net Rental Income** amount populates the *1008 Transmittal Summary's Neg Cash Flow* box if negative.

14. Open the **Cash-to-Close** screen and verify that the **Subordinate Financing** field (labeled J) contains the second mortgage loan amount.
15. Open the Fees Worksheet and enter the fees for the first loan.
16. Open an complete the **Cash-to-Close** screen.
17. Do NOT check **Closing Costs Paid** by Seller in the second mortgage file.

Create Second Loan

1. Select File > Subordinate Financing > Create New Second Mortgage from any screen in the first loan file.
2. Enter a file name if Auto **File Naming** is not enabled.
3. Click **Save**.
4. Click **Yes** to open the second mortgage file.

Note: A new file is opened that contains the information for the concurrent second mortgage. The navigation panel contains two buttons to toggle back and forth between the two linked loans.

- Verify the following information on the **Borrower Information** screen.

Table 15: Concurrent Purchase Investment

Field	Value
Purchase Price (a)	Same as the 1st mortgage file
Subordinate financing (j)	Blank
For Sub Financing Only section	
New First Mortgage	First mortgage loan amount
Closing Costs from New First Mortgage	Sum of costs from the first mortgage. The sum in the Closing Cost box equals prepaids, plus closing cost, plus PMI/MIP/Funding Fee, plus Discount, minus Closing Cost paid by Seller and PMI/MI financed.
Loan Amt, excl. fee financed (m)	Second mortgage amount
Loan Amount (o)	The total second mortgage amount (m + n).

- Open page 2 of the Loan Application and verify the **Proposed Monthly Housing Expenses**, including the **First Mtg, Other Fin, HazIns, Taxes** and **other fee** fields, **match** the values in the first mortgage file.
- Verify information in the **Cash-to-Close** screen.

Construction Loans

Three types of construction loans are supported in Point:

- Construction
- Construction-to-permanent
- Construction with Required Reserve

Construction loans do not include a payment schedule on the printed *Truth-in-Lending Disclosure form* based on the terms entered.

The loans state **“Repayment: One payment of principal of [the entire loan amount] on [the end of the amortization period specified]”**.

Refer to **Subpart E (Special Rules for Certain Home Mortgage Transactions)** on the Reg. Z for additional information.

The *Truth-In-Lending Disclosure* reflects the construction loan terms completing the *Loan Application*.

Create Construction Loan

Complete the *Loan Application* as other loans. The following exceptions apply to all construction loans.

1. Select either the **Construction or Construction – Permanent** checkbox on the *Borrower Information* screen.
2. Complete the following fields for the loan:
 - Sales Price
 - Appr Value
 - Loan Amt
 - Note Rate
 - Term/Due

Note: The transaction and the associated fields in the loan file are -processed as a purchase if a value is entered in the **Land** field in the Cash-to-Close screen. The loan is processed as a non-purchase loan if **0** is entered or the field is left empty.

3. Select the **Customize** checkbox on the *Truth-In -Lending Disclosure* to indicate draws in the payment schedule and enter the information there.
4. Click the **Calculate** button again.
5. Open page 1 of the Loan Application and complete the **If Construction Loan** section.
6. Enter the **Estimated Construction Duration**, in months, in the **Period** field.
7. Enter the interest rate and required reserves in the **Int Rate and Req Rsv** fields if the values are known.
8. Complete the Yr Aqd (year acquired), Original Cost, Existing Lien, Lot Value (a), and Impvmts (b) (Improvements) fields.

Note: The Total (a+b) is calculated with these figures

9. Select the **Include MI during the Construction Period** checkbox to include mortgage insurance in the construction phase of the payment schedule
10. Select the **Include Escrow during the Construction Period** checkbox to include the calculated escrow amount in the construction phase of the payment schedule
11. Open the *Fees Worksheet* and enter the loan fees.
12. Open the *Truth-In-Lending* screen and complete the **Date Prepared** and the **1st Pmt Date** fields.

13. Click Calculate.

Construction-to-Permanent Loan

Complete the *Loan Application* as other loans. The following exceptions apply for construction-to-permanent loans

1. Open page 1 of the *Loan Application*.
2. Enter the loan term in months after the construction is complete in the **Term mths** field in the **Type of Mortgage and Terms of Loan** section.

Example: Enter 360 for a 30 -year term. Do not include the construction period as part of the term.

3. Select the **Construction-Permanent** checkbox in the **Purpose of Loan** section.
4. Enter the estimated construction duration, in months, in the **Period** field in the **If Construction Loan** section.
5. Enter the amount of the reserve in the **Req Rsv** field if the loan requires a reserve.

Note: Leave the field blank if a reserve is not required.

Construction Loan Required Reserves

Complete the *Loan Application* as other loans. The following exceptions apply for construction loans requiring reserves.

Note: Required reserves increase the APR calculation.

1. Open **page 1** of the *Loan Application*.
2. enter the loan term in months after the construction is complete in the **Term mths** field in the **Type of Mortgage and Terms of Loan** section.

Example: Enter 360 for a 30 -year term. Do not include the construction period as part of the term.

3. Select the **Construction** checkbox in the **Purpose of Loan** section.
4. Enter the estimated construction duration, in months, in the **Period** field **If Construction Loan** section.
5. Enter the amount of the required reserve in the **Req Rsv** field.

Investment Loans

Use the following steps to complete a loan for investment property:

1. Create a new borrower fil.

2. Complete the Borrower Information screen as normal with the following exceptions:
3. Select Investment in the Purpose of Loan section.
4. Enter the applicable values for the property in the **Gross Rent** and **Occ Rate** fields.
5. Complete the Sales Price, Loan Amt, Note Rate, and Term/Due fields.
6. Complete the **Appr Value** field if the loan is a refinance and leave the **Sales Price** field blank.

Note: The **Net Rent** amount transfers to the **Pos Cash Flow (Subj Property)** field or **Neg Cash Flow (Subj Prop)** in the **Underwriting** section in the *Transmittal Summary (1008)*.

7. Open page 2 of the *Loan Application* and complete the following information in the **Monthly Income and Combined Housing Expense Information** section:

Note: The amount in the **Total** field for the **Housing Expenses** represents the **Principal, Interest, Tax and Insurance (PITI)** of the subject property. The amount in the **Net Rent** field equals the **Gross Rent** field times the **Occ Rate** field minus the **PITI**. The **Net Rent** field shows the positive cash flow or negative cash flow for the subject property.

8. Complete the **Gross Monthly Income** section for the borrower and the coborrower but exclude the **Net Rent** field.

Note: **Net Rent** is populated from the **Schedule of Real Estate Owned** section on page 3 if net rent is a positive amount.

9. Enter the housing expenses for the borrower owner-occupied residence in the **Present** column in the **Monthly Housing Expenses** section regardless of the loan type.

Note: Point calculates the proposed monthly payment

10. Complete the **HazIns, Taxes, and MtgIns** fields.
11. Open page 3 of the *Loan Application* and complete the following information in the **Liabilities** section:
 - Enter an **M** in the **R/L(I)/M** field to calculate the amount as a negative value
 - Mark that an existing mortgage on the investment property is being paid off if applicable
 - Indicate second homes and land loans as liabilities (**L**)
12. Complete the following information on page 3 of the *Loan Application* in the **Schedule of Real Estate Owned** section:
 - The subject property must be listed first if the loan is for a refinance,
 - Enter an occupancy rate (typically 75%) in the Investment **Property Occupancy Rate** field to automatically calculate the net rent for additional rental properties
13. Select the Subject Property.

14. Click **Edit**.
15. Select the property and enter an **R** in the **S/PS/R** field to indicate the property is a rental.
16. Enter the primary residence and any additional real estate.
17. Leave the **S/PS/R** field blank for these properties.

Note: Investment properties are calculated into the ratios by using the amount in the **Net Rent** field in the **Schedule of Real Estate Owned** section on page 3 of the *Loan Application*.

18. Open the *Transmittal Summary (1008)* and verify the following information:
 - The Proposed Monthly Payment column should reflect the borrower primary residence (owner-occupied) regardless of the loan type
 - The amount automatically populates the 1008 from the Present Monthly Housing Expenses section on page 2 of the *Loan Application*
 - The rental income is populated in the Pos Cash Flow (Subj Prop) field if the subject property net rent is positive
 - The negative value populates the **Neg Cash Flow (Subj Prop)** field if the net rent is negative

Note: The calculation comes from the fields accessed by clicking the **Investment** button on a *Borrower Information* or *Prospect Information* screen

19. Open the *Transmittal Summary (1008)* in each co-borrower file and click the **Other Obligations Lock** to enable the fields If non-married co-borrowers are sharing the loan.
20. Delete the information in the **Neg Cash Flow (Subj Prop)** field.

Note: The **Other Prop** field contains the total negative net rents from the REO section of the Loan Application. The **All Other Pmts** field contains a total of all liabilities, except mortgages, from the **Liabilities** section of the *Loan Application*. The **Total Payments** field contains the total monthly payments, including any negative cash flow on rental properties.

9. Click Save.

Import From

Point provides data import options from the **File** menu.

Other App Using Import Template

ASCII data can be imported into new and existing loan files.

Use the following steps to import data using a predefined import template.

An import template with mappings to the fields is required to import the data. See [Template Management](#) for template creation details.

1. Convert the import file to an ASCII delimited file (.txt) before initiating the import.
2. Open or create the loan file to receive the imported data.
5. Select **Import From** on the *File* menu.
6. Select **Other App** (using import template).
7. Use the **Choose a Data Import Template To Use** dialog to browse to and open the appropriate import template.
8. Select a template.
9. Click **Open**.
10. Enter the full file name and path in the **File Name** field (or locate and select the file) on the *Specify an Input Data File* dialog.

Note: The import is automatically initiated when clicking **Open** if an input data file (the file containing the data to be imported) was specified in the selected template.

11. Click **OK** to import that data.

Borrower Master File

Apply master file templates to a new loan file during creation or import the master file template into an existing loan file.

See [Template Management](#) for template creation details.

1. Open a new or existing prospect or borrower file.
2. Select **Import From** on the **File** menu.
3. Select Borrower Master File.

4. Use the **Import Data from Borrower Master File** dialog to browse to and open the appropriate import template.
5. Click **OK** to import that data.

Fannie Mae DO/DU

Only Fannie Mae version 3.0 and 3.2 files (.fnm files) may be imported. A template is not required to convert the files because the field mappings are built into Point.

Note: The social security numbers must match when importing Fannie Mae data into an existing prospect or borrower file.

1. Select **Import From** on the **File** menu.
2. Select Fannie Mae DO/DU.
3. Use the *Import 1003 data from Fannie Mae DO/DU* dialog to browse to the file.
4. Select the file.
5. Click Open to initiate the import process.

Fannie Mae 3.4 MISMO

Importing a Fannie Mae 3.4 file into the Loan Application is possible. Some data components from a Fannie Mae 3.4 file will not import into the New Loan Application due to the introduction of new fields and methods for capturing the information on the 1003 (such as: Employment and Income).

1. Open a New blank loan.

Figure 621: Fannie 3.4 MISMO

2. Select **Import From** on the **File** menu.
3. Select **Fannie Mae 3.4 MISMO**.

- Copy data folders
- Establish data folder access rights for users
- Change the directory where templates are stored
- PointCentral settings

Access Point Administrator

Use the following steps to access the Point Administrator

1. Close Point.
2. Select the Windows **Start** menu.
3. Select All Programs.
4. Select Point Administrator.

Figure 624: Point Administrator Dialog

Manage Data Folders

Use the **Data Folder** function for the following:

- Create new data folders
- Connect existing data folders
- Disconnect existing data folders
- Manage folder owners
- Modify folder properties
- Change the order in which the folders are listed in the dropdown lists

Note: Do not store more than 1500 files in a single data folder. Storing more files causes slower performance during searches.

Setup Data Folders

The following sections discuss setting up the Point Data folders.

Set Primary Data Ownership

Set initial ownership of the **Primary Data** folder to ensure more data security and file control. Click **Setup Data Folders** on the Point Administrator dialog.

Note: The **Owned** column in the *Data Folder Manager* dialog displays a check mark if a data folder has an owner.

1. Select the Primary Data Folder.

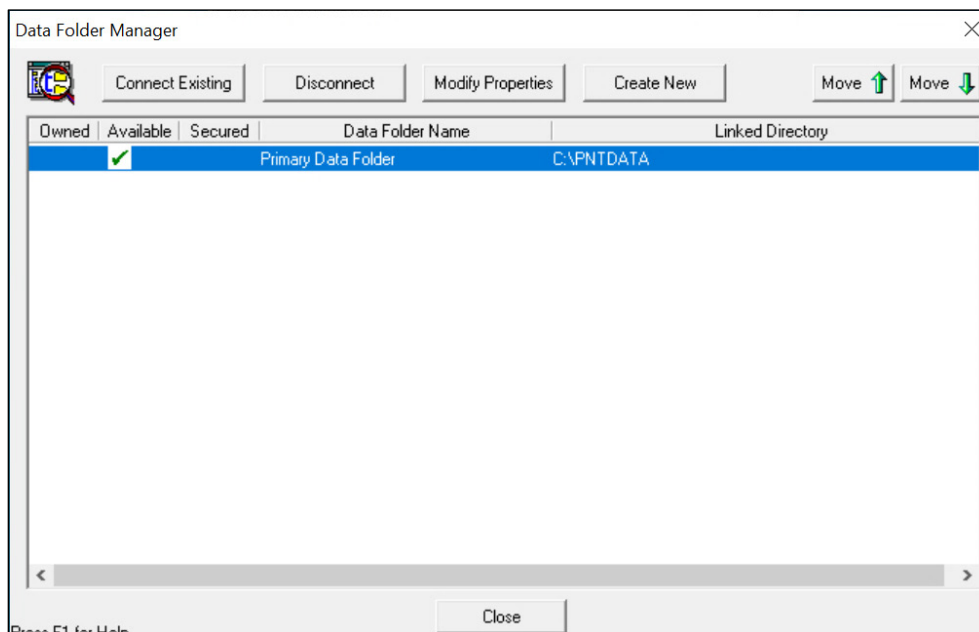

Figure 625: Data Folder Manager Dialog

2. Click Modify Properties.
3. Enter the **Password** on the *Folder Supervisor Login* dialog.

4. Click **OK**.
5. Re-enter the password in the *Password Verification* dialog.
6. Click **Close**.

Create New Data Folder

Create new data folders to manage the loan files and organize your workflow.

1. Open the *Data Folder Manager* dialog. (See [Figure 625](#).)
2. Click Create New.
3. Enter the **Supervisor** password in the **Password** field on the *Verify Password* prompt.
4. Click **OK**.
5. Re-enter the password if prompted.
6. Enter the Directory Name in the Field 1.

Figure 626: Create New Data Folder Dialog

Note: Use the **Browse** button to browse to the folder storage location.

7. Enter Folder Name in Field 2.
8. Select a folder from the **Copy From** dropdown to copy the folder settings.
9. Select the **Include User Security Settings** checkbox to include the security settings.
10. Click **Create**.
11. Proceed to Modify Data Folder Properties to set up the folder properties.

Modify Data Folder Properties

Use the following steps to modify data folder properties.

1. Select the data folder to modify from the *Data Folder Manager* dialog. (See [Figure 625.](#))
2. Click Modify Properties.
3. Enter a **Data Folder Name** if applicable.

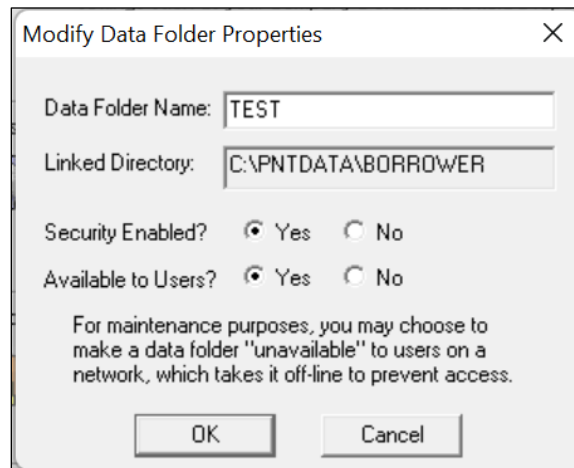

Figure 627: Modify Data Folder Properties

Note: Do not change the **Data Folder Name** if data has already been saved to the folder.

4. Select the **Security Enabled Yes** radio button to require a user password to modify folder contents.
5. Select the **Available to User Yes** radio button to make the available to users on the network.
6. Click **OK**.

Connect Existing Data Folders

Use the following steps to connect an external data folder to the Point data folder.

1. Access the *Data Folder Manager* dialog. (See [Figure 625.](#))
2. Click Connect Existing.

3. Click **Browse** to navigate to the folder to connect.

Figure 628: Connect to Existing Folder Dialog

4. Click **OK** to add the data folder to the *Data Folder Manager* dialog.

Disconnect Data Folders

Use the following steps to remove a data folder from Point. Disconnection from Point does not delete the folder from the original location.

1. Access the *Data Folder Manager* dialog. (See [Figure 625](#).)
2. Select the data folder to disconnect.
3. Click Disconnect.
4. Click **Yes** on the *Disconnect Confirmation* dialog.

Reorder Data Folders

It is possible to arrange the order of folders in the data folder dropdown lists by changing the order in the *Data Folder Manager*.

1. Access the *Data Folder Manager* dialog. (See [Figure 624](#).)
2. Select a data folder.
3. Use the Move arrows to reposition the folder in the list.

Copy Folder Settings

Use the following steps to copy folder settings between data folders.

1. Access the *Point Administrator* dialog. (See [Figure 624](#).)
2. Click Copy Folder Settings.

3. Select the folder to copy **From**.

Figure 629: Copy Data Folder Settings

4. Select the folder to copy **To**.
5. Click **Copy**.

Manage Users

Use the following sections to set up and manage data folder users. The user name must match exactly as it was created in the Processor or Originator dropdown list using the dropdown list utility.

Add Users

Use the following steps to add new data folder users.

1. Access the *Point Administrator* dialog. (See [Figure 624](#).)
2. Click Setup Users.

3. Click **New User**.

Figure 630: User Manager Dialog

4. Enter the user **Full Name** on the *Modify User Properties* dialog.

5. Enter **User ID**.
6. Enter user **Password**.
7. Select the appropriate **Access Mode** radio button.
8. Select the appropriate **Access Rights** radio button.
9. Select the **Access to Financial Information Screens** checkbox to enable access to financial screens.

10. Select the **Access to Secured Area** checkbox to enable access to Point secured folders. (See [Table 17: Point Secure Areas](#) for the Point secure areas.)
11. Click **OK** to add the user to the *User Manager* dialog.
12. Proceed to

Modify Users

Use following steps to modify data folder user access.

1. Access the *User Manager* dialog. (See [Figure 630](#).)
2. Select the user to modify.
3. Click **Modify User**.
4. Make appropriate changes on the *Modify User Properties* dialog.
5. Click **OK**.

Delete Users

Use the following steps to delete a data folder user from Point.

1. Access the *User Manager* dialog. (See [Figure 630](#).)
2. Select the user to delete.
3. Click **Delete**.
4. Click **OK**.

Secure access is required to edit <i>Credit Score</i> fields.	

Copy User Settings

Copy user settings from folder to folder to prevent repeating the setup process for each folder a user can access.

1. Access the *Point Administrator* dialog. (See [Figure 624](#).)
2. Click Copy Users.
3. Enter the **Supervisor** password if prompted.
4. Select the **Data Folder** to copy the settings **From**.

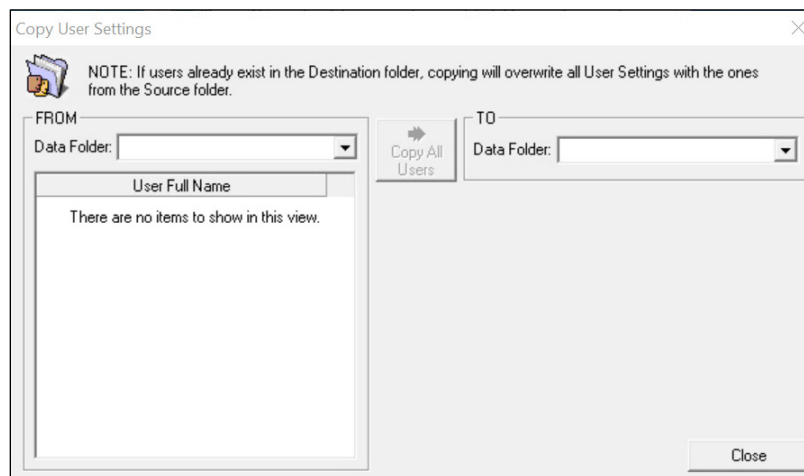

Figure 632: Copy User Settings Dialog

5. Select the **Data Folder** to copy the setting **To**.
6. Click **Copy All Users** to copy all users.
7. Click **Yes** to confirm the copy in the *Copy User Settings Confirmation* dialog.

Outcome: The *Copy User Settings* dialog is displayed with a message the users were copied successfully and click Close.

Modify Data Folder Users

You can modify a user's ID password, and access rights at any time.

1. Access the *User Manager* dialog. (See [Figure 630](#).)

2. Click Setup Users.
3. Enter **Password** on the Folder Supervisor Login dialog.
4. Click **OK**.
5. Click the **User** to modify.
6. Click Modify User.
7. Make the necessary changes and click **OK**.

Remove Data Folder Access

Use the following steps to remove user access to a data folder.

1. Access the *User Manager* dialog. (See [Figure 630](#).)
2. Select the data folder.
3. Select the user to modify.
4. Click Delete User.
5. Click **Yes** on the Delete User Confirmation.

Change Template Location

The default template directory is c:\PNTTEMPL. Use the following steps to change the template directory.

1. Access the *Point Administrator* dialog. (See [Figure 624](#).)
2. Click Change Template Directory.
3. Click **Browse** to navigate to the new template location.
4. Click **OK**.

Point Data Server

PointCentral is the centralized data server that provides access to organization loan files, templates, reports, and Cardex. The Point files are accessible from any location. Generate management reports that include information from different offices and provide a consolidated view of the entire organization loan pipeline.

Configure Client Connection

Use the Point Data Server Settings dialog to configure the client to connect to the PointCentral server.

1. Access the *Point Administrator* dialog. (See [Figure 624](#).)
2. Click **Settings**.
3. Select the **Enable Point Data Server** checkbox.

Figure 633: Point Data Server Settings

4. Enter the PointCentral URL.
5. Enter the PointCentral Security Key.
6. Click **Test Connection** to verify the parameters are correct and network connectivity to the PointCentral server is functioning.
7. Click **OK** to save the configuration.

Combined Field IDs

Point includes the most common fields in the Field Name dropdown on the *Reports Template* screen. The **Field ID** column is automatically populated with the field ID when the field name is selected. Enter the field name and ID manually when not available from the dropdown.

Individual user controls, such as checkboxes and radio buttons, are each assigned unique field IDs. Field IDs for groups of controls are established running macros that extract the selected option and insert it into the report.

Field IDs with macros were also created to extract information from a single screen containing multiple fields for the same information.

To include this type of data in the report, you must use the ID assigned to that group of fields or controls rather than the unique ID for the selected field or option.

Data Import

Text Files Batch Import

Use batch importing to import multiple files from a single txt file. The loan files must be contained in a single ASCII delimited text file before import.

The **Auto File Naming Utility** must be enabled to import batch files. (See [Auto File Naming](#) for details.)

An import template is required to import txt files. (See [Template Management](#) for details.)

1. Click the **Templates** tab. (See [Figure 13](#).)
2. Select the **Data Import** radio button.
3. Select the import template to use.
4. Click **Open**.
5. Select <custom ASCII format> from the Import Format dropdown.
6. Click the Advanced button to open the Advanced Import Format Settings dialog.

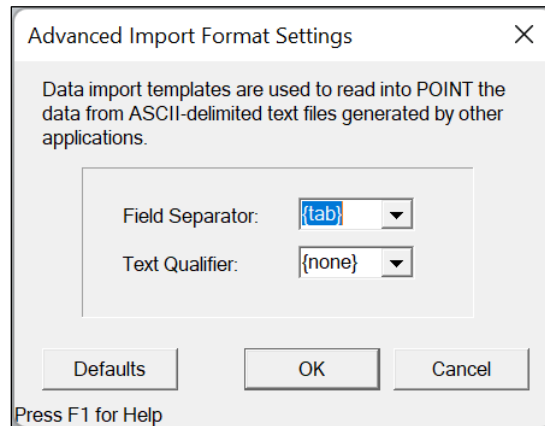

Figure 634: Advanced Import Format Settings

7. Select the Field Separator:
 - **Tab:** Uses a tab as the field delimiter
 - **Comma** Uses a comma as the field delimiter
8. Select the **Text Qualifier** to indicate the text contained within the qualifier characters is imported as one value:
 - **None:** No text qualifier is used
 - **Double quotation mark:** Uses double quotation marks as the text qualifier (Text contained within double quotation marks is considered one value)

- **(single quotation mark):** Uses single quotation marks as the text qualifier (Text contained within single quotation marks is considered one value)
9. Select the **Field Name Header in First Row** checkbox if the file to be imported has column headers in the first row.
 10. Select the **Update Existing Files** checkbox to overwrite any existing files with the same name.
 11. Click Batch Import.

Note: The *Batch Data Import* dialog is displayed if the **Update Existing Files** checkbox is not selected.

12. Select Prospect or Borrower.
13. Click **OK**.
14. Navigate to the directory containing the txt file to import or enter the file name in the *Specify an Input Data File* dialog.
15. Click **Open** to initiate the import process.

Import Multiple Fannie Mae Files

Use batch import to import multiple Fannie Mae files, including Fannie Mae .

The **Auto File Naming Utility** must be enabled to import batch files. (See [Auto File Naming](#) for details.)

1. Click the **Templates** tab. (See [Figure 13](#).)
2. Select **Data Import**.
3. Select the import template to use.
4. Click **Open**.
5. Select the appropriate **Fannie Mae file format** from the **Import Format** dropdown.
6. Click **Batch Import**.

Note: Fannie Mae 3.4 MISMO XML files can be batch imported into Point.

7. Click on the **Browse** button.
8. Navigate to the directory containing the files to import.
9. Enter the file name to import.

Note: Use an asterisk (*) as a wild card and the file extension (*.fnm) to import all files in that directory with the fnm extension.

10. Select the **Loan Type**.
11. Click **Start Import** to import the files.

Import Fannie Mae 3.2 File

The Fannie Mae 3.2 file captures data components from the *Classic Loan Application (1003)*. The *New Loan Application* mandated for March 1, 2021 introduces new fields and methods that do not exist in Fannie Mae 3.2 classic files.

Importing a Fannie Mae 3.2 file into the New Loan Application is possible. Some data components from a Fannie Mae 3.2 file do not import into the *New Loan Application* due to the introduction of new fields and methods for capturing the information on the 1003 (such as: Employment and Income).

Use the following steps to import the Fannie Mae 3.2 file to a *New Loan Application*.

1. Select the **Loan** tab.
2. Click **New**.
3. Select the **New** radio button on the *Create New Loan File* dialog. (See [Figure 17](#).)
4. Select **Import From** on the **File** menu.
5. Select Fannie Mae DO/DU.
6. Browse to the **Fannie Mae 3.2** file.
7. Complete the import.
8. Update the following information when the import is complete:
 - *Borrower Information Screen*: **Monthly Housing Expenses** information
 - *Loan Application Section 1*: **Citizenship, Employment, and Income** information
 - *Loan Application Section 2 – 3*: **Assets, Liabilities, and Owned Properties** information
 - *Lender Loan Information Pg 2*: Closing Costs and Credits (such as: cash deposit on sales contract)

Chapter 18: PIPELINE MANAGEMENT

The pipeline provides a view of the latest status of active loans in a single screen.

The pipeline setup is either Automated or Manual. The *Pipeline* screen is updated by clicking the **Refresh** button.

Pipeline Descriptions

Automated

The **Pipeline** includes the loans with the most recent loan status that match the defined the criteria. Loans are automatically added to the Pipeline after meeting the defined criteria.

Manual

Manual setup includes selecting the loans to include in the **Pipeline**.

Pipeline Change

The following sections provide information for what occurs when the pipeline status changes.

Manual to Automated

- Pipeline displays only the loans that meet the automated selection criteria.
- Loans in the Manual pipeline are preserved, but not displayed in the automated pipeline.
- Manual pipeline loans are visible again when **Manual** is selected from the *Pipeline Setup* dialog.

Automated to Manual

- loans in the Automated pipeline are removed from the pipeline.
- Loans with the specified criteria are displayed in the pipeline after switching back to automated.
- The loans in the previous Manual pipeline are displayed.

Pipeline Setup

The following sections provide details for setting up pipelines.

Automated Pipeline Setup

1. Select the **Pipeline** tab. (See [Figure 10](#))
2. Click **Pipeline Setup**.

Figure 635: Pipeline Setup

3. Select the **Set Pipeline as Default View** checkbox to set the **Pipeline** view as the default view.

Note: Default views opens the **Pipeline** tab when Point is launched.

4. Select the **Automated** radio button.
5. Select the **Data Folders** containing the loan files to include in the pipeline.

Note: Local folders are not displayed for PointCentral users.

6. Select the **Statuses** to include the pipeline.
7. Select **Other Status** to include all loans with a custom status set in the *Track Status* screen.
8. Select **Loan Originator/Processors** to provide pipeline access.
9. Click **OK**.

Manual Pipeline Setup

1. Select the **Pipeline** tab. (See [Figure 10](#).)

2. Click **Pipeline Setup**. (See [Figure 635](#).)
3. Select the **Set Pipeline as Default View** checkbox to set the **Pipeline** view as the default view.
4. Select the **Manual** radio button.
5. Click **OK** on the *Proceed with caution to rebuild the index* dialog to acknowledge the message if the dialog opens.

Note: Rebuilding the index prevents Point users who have not updated to version 8.0 (or later) from accessing the data folders indexed.

6. Click the **Loans** tab.
7. Perform a search to locate the loan files to include in the pipeline.
8. Select the files to add to the pipeline.
9. Click Add to Pipeline.
10. Click **YES** in the *Add to Pipeline* dialog.
11. Click **OK** to close the confirmation dialog.
12. Select the **Pipeline** tab to view the loans in the pipeline.

Remove Loans from Pipeline

Only loans in a manually created pipeline can be removed.

1. Select the **Pipeline** tab. (See [Figure 10](#).)
2. Select the files to remove from the pipeline.
3. Click Remove from Pipeline.
4. Click **Yes** on the *Remove from Pipeline* dialog to confirm the removal.

Chapter 19: TASK MANAGEMENT

The Task Manager is accessible from the **Tasks** tab in the **Navigation** panel. Use tasks to document actions required to process loans. A permanent record of the task is kept with the loan file.

Create Tasks

Tasks are created from the **Tasks** tab or while in a loan file. Both methods require association to a loan file.

Use the following steps to create tasks.

1. Select the **Tasks** tab. (See [Figure 11](#).)
2. Click **New** to access the *Create New Task* dialog.

Figure 636: Create New Task Dialog

Note: Access the *Create New Task* dialog from an open loan file by clicking the **New Task** icon or selecting **Show Tasks** from the **Utilities** menu and clicking the **New** button.

3. Enter a brief task description (60 characters or less) in the **Subject** field.
4. Select Created by.
5. Select the person responsible for completing the task from the **Assign To** dropdown.

Note: The **Created by** and **Assign To** fields automatically populate from the originator and processor lists established in the dropdown list utility in an unsecured environment.

6. Select the task **Due Date**.
7. Select the Task Priority.
8. Enter **Comments** if applicable.
9. Click **Browse** to locate the loan file to associate with the task.

Note: Skip Step 9 when creating the task from an open loan file.

10. Select the **Remind Me** options to enter reminder criteria.
11. Click to **Save** the task.

Task Reminders

The *Reminders* dialog displays as a task reminder according to the **Remind Me** options set during task creation.

The *Reminders* dialog remains open until all reminders are dismissed.

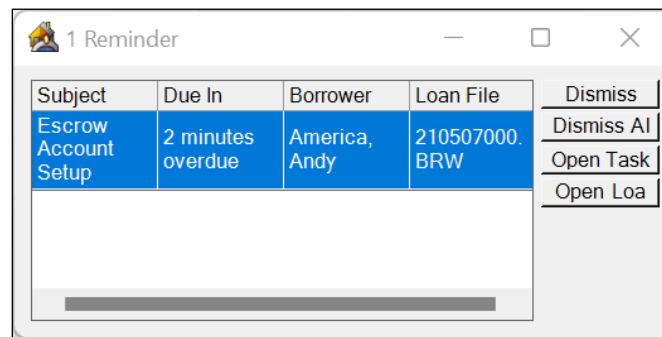

Figure 637: Manage Task Reminders

The following options are available for managing tasks:

- **Dismiss:** Removes the selected reminder from the dialog and clears the reminder from the *Task Details* dialog for the selected task. The *Reminders* dialog closes after dismissing the last reminder.
- **Dismiss All:** Closes the *Reminders* dialog and clears the reminders from the *Task Details* dialog for all tasks in *Reminders* dialog.
- **Open Task:** Opens the *Task Details* dialog. Edit the reminder or any task data as needed. Click **Close** to return to the *Reminders* dialog.
- **Open Loan:** Opens the loan associated with the selected task.

Search Tasks

Use the **Search** function to locate tasks.

Basic Search

A basic task search locates open or overdue tasks in the selected data folder or all data folders.

1. Select the **Tasks** tab. (See [Figure 11.](#))
2. Select the appropriate **Search For** from the dropdown.

Note: The current folder is determined by the folder selected in the **Data Folder** dropdown on the **Loans** tab. Change the **Loans** tab selection in the **Data Folder** dropdown.

3. Select All Folders or Current Folder from the in-dropdown list and click Search.

Advanced Search

Use the **Advanced Search** function to define more specific search criteria to further refine the search.

1. Select the **Tasks** tab. (See [Figure 11.](#))
2. Click the **Advanced Search** button.
3. Select the **Data Folders** checkboxes to search.

Figure 638: Advanced Task Search Dialog

4. Select the **Assigned To checkboxes** next to the names of the agents whose tasks are being searched.

5. Select the **Statuses** to search.
6. Select the **Priorities** to search.
7. Enter the **Date Ranges**.
8. Enter Borrower Information.
9. Enter Sorting Information.
10. Click **Search**.

Edit Tasks

Use the following steps to edit a task.

1. Select the **Tasks** tab. (See [Figure 11.](#))
2. Select the task to edit.
3. Click **Open** to open the *Task Details* dialog.
4. Edit task details appropriately.

Chapter 20: REPORTS MANAGEMENT

The report functions are accessible from the **Reports & Marketing** tab.

Use reports to manage day-to-day business events and clients. Use marketing documents to assist with loan marketing loans.

Verify the time and date settings on the computer are correct. The following options indicate where the data is to be retrieved when the report is generated:

Select All/Deselect All: Toggles between Select All or Deselect All when selecting data folders. Only the data folders to which you have access are displayed.

Prospect/Borrower: Specifies the file type from which you generate the report. You can select both file types as well as co-borrowers.

Point contains predefined report and marketing document templates to simplify business. Create custom templates that meet other specifications.

Standard Reports

The *Report & Marketing* template files are divided into Report files and Marketing documents.

Report Templates

Use the predefined reports included in Point for tracking and printing options.

HMDA Reports

HMDA requires lending institutions to report public loan data for monitoring purposes.

The 2017 and 2018 screens are not running archives of loan data for each year. The 2017 tracking option reflects the CFPB's 48 data points for 2017. The 2018 tracking option reflects the updated 110 data point for 2018. Generate a report to view current and previous year HMDA data.

The HMDA Reporting (2018) screen is available from the Tracking menu in every prospect and borrower file. This screen contains most of the information the CFPB requires for HMDA reporting.

The report can be generated after the HMDA Reporting (2018) screen is completed.

Note: The maximum number of characters allowed in a file name is 25. Point truncates any file names exceeding the limit.

1. Select the **Reports & Marketing** tab.

- Cash-to-Close
- Loan Comparison
- Rent vs. Own
- Prequalification

Note: The *Company Information* dialog must be completed o include the company information on a printed form. (See [Company Information](#) for dialog details.)

Chapter 22: TEMPLATE MANAGEMENT

Use templates in Point to create boilerplate loan files and loan information to reuse multiple times.

The following types of templates can be created:

- Reports & Marketing
- Loan program
- Closing cost scenarios
- Prospect and borrower files
- Importing and exporting data
- Forms, letters, and emails

See [Reports Management](#) for custom reports.

See [Marketing Management](#) for customer marketing document.

Note: Do not change the file extension of templates. File names cannot contain any of the following characters: \ / : * ? " < > .

Loan Program Templates

PointCentral users with Calyx Pricer enabled cannot use loan program templates. Click the **Loan Program** button to directly access to Calyx Pricer without populating a loan program template.

Use loan programs templates to populate detailed loan information on the following screens:

- Amortization
- Debt Consolidation
- CA MLDS, Non-Traditional
- Fees Worksheet
- Loan Comparison
- Prequalification
- Prospect Information/Borrower Information
- Truth-in-Lending

Populate screens with a loan program template by clicking the **Loan Prog/Loan Prg** button and selecting a loan program from the list of templates.

1. **Templates** tab. (See [Figure 13](#).)
2. Select **Loan Program** radio button. See [Figure 657](#).)
3. Select the appropriate loan program template.
4. Click **New**.

5. Name the template in the **Loan Program Name** field.

Note: The name displays in the **List of Loan Programs**.

Figure 661: Loan Program Template

6. Complete the applicable fields.
7. Select **Save** from the **File** menu when complete.
8. Close the template.

Closing Cost Scenario Templates

Closing costs are calculated on the *Fees Worksheet*. Use a closing cost scenario template to avoid repeat data entry for regular loan costs. Closing cost scenario templates are useful for marketing loans to prospects.

Access the templates by clicking the **CC Scen/CC Scenario** buttons after creating the templates.

Closing cost scenarios are available in prospect and borrower files in the following screens:

- Debt Consolidation
- Fees Worksheet
- Loan Comparison
- Prequalification

- Prospect Information/Borrower Information

Changes made to one screen populate the others. Point re-calculates all figures and ratios automatically. The template is immediately available to apply to Point files and populate the GFE or the MLDS after creation.

1. **Templates** tab. (See [Figure 13](#).)
2. Select **Closing Cost Scenario** radio button. See [Figure 657](#).)
3. Select the appropriate closing costs template.
4. Click **New**.

8. Select Paste from the **Edit** menu.

Data Export Templates

Point interfaces applications used by the following types of companies:

- Credit
- Document preparation
- Other mortgage service companies

Use export templates to export data from multiple files.

Note: The **File Export** function exports data from one file at a time. (See [Export To](#) for details.)

The data export function sends Point data to lenders that offer automated underwriting systems. Point includes a data export template (called sample) containing more than 70 of commonly used fields for data export. Use this template as the base for building new data export templates.

A sample export template is provided with Point. You can use this template as a base for creating new templates.

Note: The default name and path for the output data file is C:\WINPOINTWORK\pointexp.dat.

1. Select the **Templates** tab. (See [Figure 13](#).)
2. Select **Data Export**. See [Figure 657](#).)
