**Note:** Auto sending the loan file automatically removes sensitive information (SSN, Account Numbers, etc...).

## Chapter 2: ABOUT POINT

The following sections contain important Point application information.

### Point File Encryption Levels

The following list contains Point File encryption details:

- Borrower and prospect files are compressed in a proprietary format but are not encrypted.
- Emailed Point compressed files (.PCF) are encrypted with AES 256-bit.
- Emailed Point PDF files are encrypted with a 128-bit encryption level when password protected.
- Most service interface vendors use 128-bit Secure Socket Layer for electronic document requests.

### Conventional Data Folder Storage

The following list contains the conventional data folder storage details:

- Data folders can contain approximately 1500 Borrower or prospect files.
- Data folders should contain only two sub folders.
- A Borrower sub-folder housing all Borrower file data.
- A prospect sub-folder housing all prospect file data.

**Note:** Data folders should contain only necessary configuration settings and index files, such as: Borrower.index (\*.index, \*.idx) (\*.ini, \*.usr, \*.sec).

### Installation

The following information applies only to users upgrading from Point version 7.2 or earlier.

Point contains several fields that may cause data discrepancies if files are shared between versions.

Data from fields in earlier versions transition to the new fields in the updated version when an existing loan file is opened for the first time. Problems can occur when an earlier Point version opens a file after the data was modified in a later version.

**Example:** The calculations in some Point screens may not match if 9.6 loan file is opened after modified in 9.2.

**Note:** All Point user in the organization should update to the latest version of Point as soon as possible after release to avoid confusion.

## Operating Requirements

Point is designed for use with standard computing systems (laptop and desktop computers). Calyx does not support Point installation on a tablet or convertible device (Surface, Chrome Book, and others), but some Point functionality is available on the devices.

## System Requirements

The following system requirements are needed to install and use Point:

**Table 3: System Requirements**

Component	Version
Processor Speed	800 MHz (or higher)
Memory (RAM)	2 GB minimum
Disk space	Point application: 300MB Microsoft .NET Framework®: up to 4.5 GB Electronic document storage: 20 MB per loan file (on average)

Point software does not support multi-functional printers. Calyx provides limited customer support for multi-functional printer issues when used with Point.

## Software Requirements

The following software is required for Point installation and use.

**Table 4: Software Requirements**

Component	Version
Operating System	One of the following operating systems is required: <ul style="list-style-type: none"><li>• Microsoft Windows 10</li><li>• Microsoft Server 2012 or higher</li></ul>
Web browser	Microsoft Edge®
Microsoft .NET Framework	Version 4.8
Modem/Internet Connectivity	Active Internet connection is required to install Point and access Internet enabled services in Point

Component	Version
Other	Adobe Acrobat Reader© version 11, DC or later is required to open PDF files Microsoft Office® 2016 or 2019

**Note:** Refer to the System Requirements on the *Calyx Point Product* page for more information about third-party product support.

## Install Point

An email notification containing a link and instructions for installing Point is mailed to the end-user assigned a Point seat. The installation is completed per the settings in the assigned installation group.

**Note:** The Point Administrator is installed, and the default templates and data folders are created. If an installation group is not specified.

1. Open the confirmation email from **MyCalyx**.
2. Click the Installation link.
3. Review and accept the *Calyx Software License Agreement* to proceed.
4. Click the **Install** button.

## Chapter 3: USER INTERFACE

It is recommended that the User Interface (UI) section of this guide is reviewed prior to processing loans to obtain familiarity with the UI options.

### Loan Search Screen Overview

Double-click the **Point** desktop icon to open the *Loan Search* screen. The *Loan Search* screen contains limited options until a loan is created or opened.

Figure 2: Loan Search Screen

The following sections provide an overview of the *Loan Search* screen options.

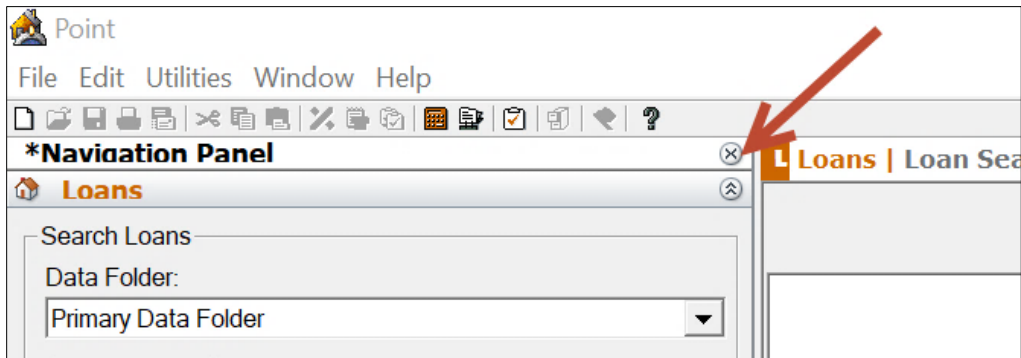

**Table 5: Loan Search Screen**

D. Loan Search Results	<p>Displays the currently selected item or search results after performing a search</p>

## Navigation Panel

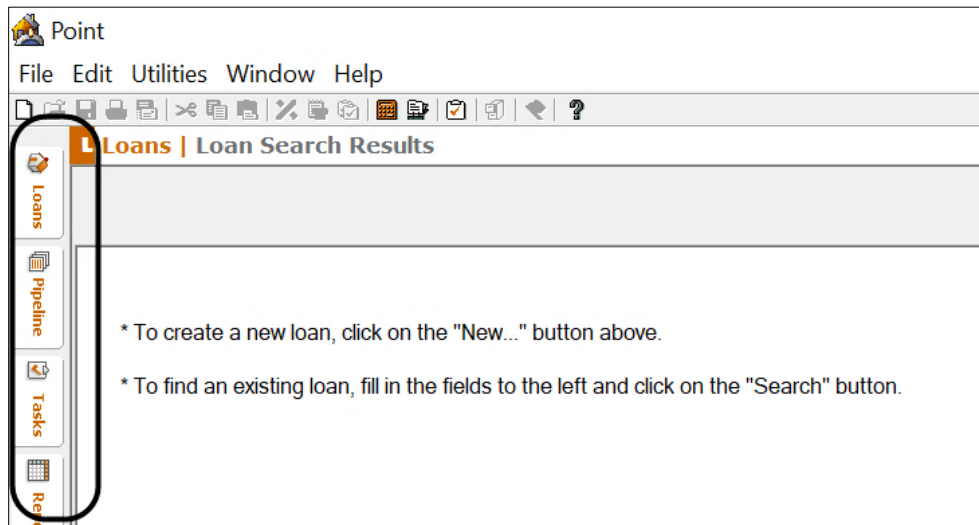

The **Navigation Panel** is available on all Point screens.

1. Click the **Navigation X** to collapse the **Navigation** panel.

**Figure 3: Collapse Navigation Panel**

2. Click any tab to expand the collapsed **Navigation** Panel.

**Figure 4: Expand Navigation Panel**

## Loans Tab

Use the **Loans** tab to access prospect and Borrower loan files in Point and import loan applications from Zip or WebCaster.

The **Loans** tab provides access to Borrower and Loan screens after a loan is open. The listed screen order changes as screens are selected. Point shuffles the order according to the most frequently used. Many of the screens are also accessible from the **Forms** menu and typically easier to find because the **Forms** menu is static.

Figure 5: Loans Tab

**Note:** Proceed to [Create Loans](#) to create new loans and work with existing loans.

## Data Folders

Use the **Data Folder** dropdown list to select where to perform the search. The **Primary Data Folder** is the default data folder and is available immediately after installation. (See [Manage Data Folders](#) for additional details.)

## Standard Loan Search

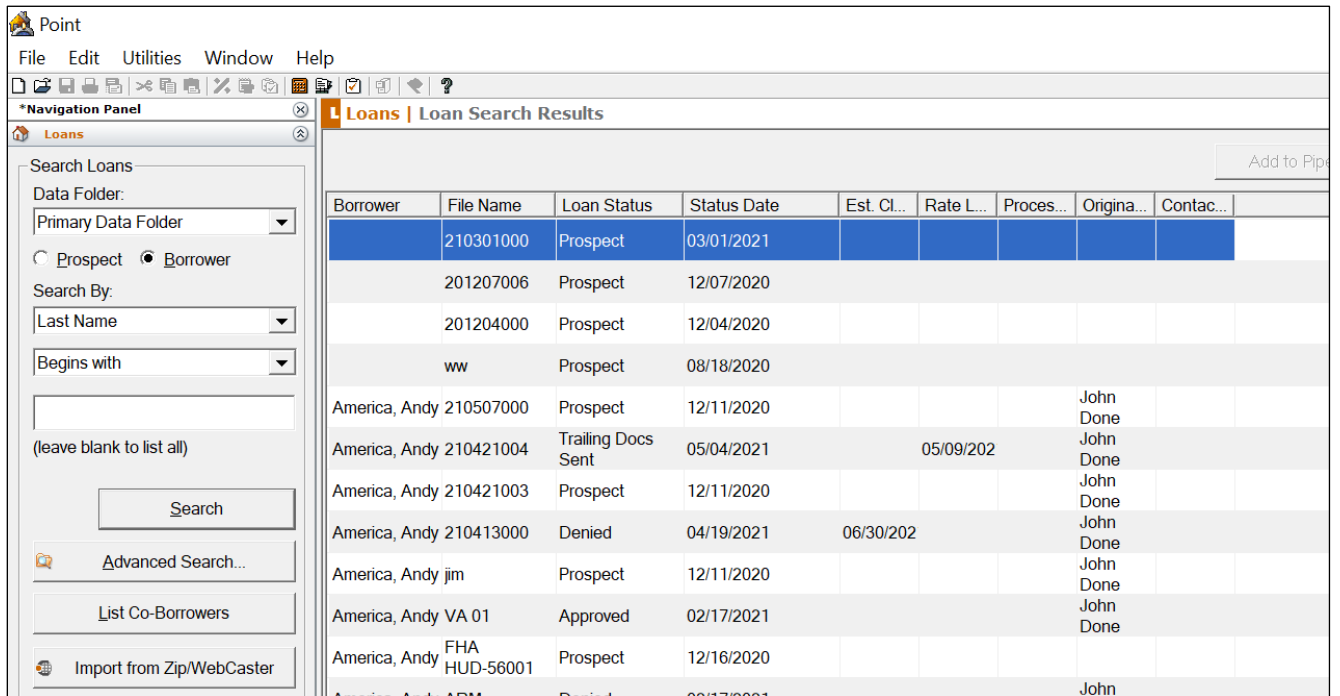

Set the loan search criteria to locate an existing loan. At least one criteria field must be completed to perform the loan search.

1. Click the **Loans** tab.
2. Select the **Data Folder** to be searched from the dropdown. (See [Figure 5](#).)

**Note:** The *Primary Data Folder* is the default data folder created during installation. See [Manage Data Folders](#) for creating additional folders.

3. Select the **Prospect** or **Borrower** radio button to indicate the loan type to search.
4. Use the **Search By** dropdowns to further refine the search criteria.
5. Enter additional search criteria in the final field when required.

6. Click **Search** to view the *Loan Search Results*.

The screenshot shows the 'Point' software interface. The 'Navigation Panel' on the left is active, displaying the 'Loans' tab. Under 'Search Loans', the 'Data Folder' is set to 'Primary Data Folder'. The 'Search By' dropdown is set to 'Last Name', and the 'Begins with' dropdown is set to 'ww'. The 'Search' button is highlighted. The main window displays the 'Loans | Loan Search Results' table.

## Advanced Loan Search

Use the Advanced Search dialog to refine the search criteria and search in multiple data folders.

1. Click the **Loans** tab.
2. Click **Advanced Search**. (See [Figure 5](#).)

3. Select the **Data Folders** to search.

**Figure 7: Advanced Search Dialog**

**Note:** *Ctrl+Click* multiple folders to include in the search. Click *Select All* to search all data folders.

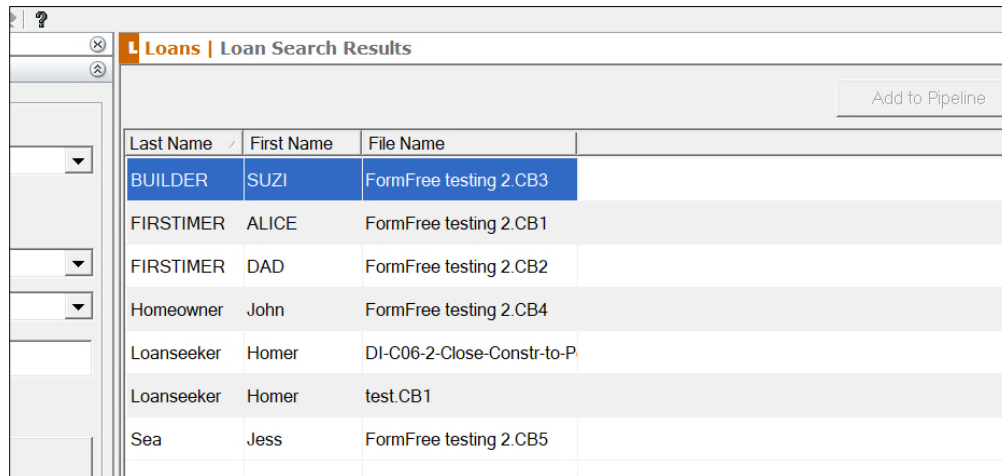

4. Select one or both radio buttons for loan type to search.
5. Select the **Search By** criteria.
6. Click **Search** to view the *Loan Search Results*. (See [Figure 6](#).)

## List Co-Borrowers

Use **List Co-Borrowers** option to search by Co-Borrowers in the selected data folder.

1. Click the **Loans** tab.
2. Select the appropriate **Data Folder**. (See [Figure 5](#).)

- Click **List Co-Borrowers** to retrieve the Co-Borrowers search results.

## Import from Zip/Webcaster

See [Import From](#) for details on importing or copying and moving files.

## Loan Files

The following sections provide information for moving and deleting existing loan files.

Table 6: Loan File Options

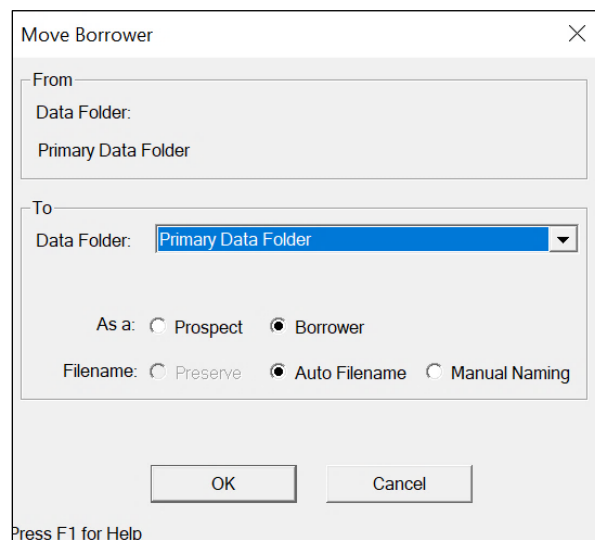

Option	Description
Add to Pipeline	Click to add the selected loan to the pipeline
New	See <a href="#">Create Loans</a> for details
Open	Click to open the selected loan
Copy	See <a href="#">Copy Loan Files</a> for details
Move	See <a href="#">Move Loan Files</a> for details
Delete	Click to delete the selected file

## Move Loan Files

Manage loan files more efficiently by moving prospect and borrower files into data folders to create groupings. Lists do not have to be rebuilt when files are copied or moved.

**Note:** See [Copy Loan Files](#) for details on copying external files to Point.

1. Select the **Loans** tab from the **Navigation** panel.
2. Perform a loan search.
3. Select the file to move.
4. Click the **Move** button.
5. Select the **Data Folder** on the *Move Borrower* dialog.

**Figure 9: Move Borrower Dialog**

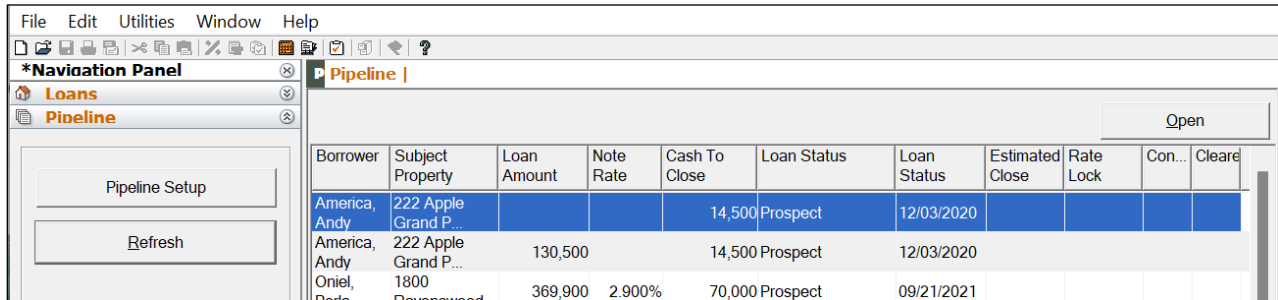

6. Select the appropriate **As A** radio button.
7. Select the **Filename** option.
8. Click **OK** to complete the move process.
9. Click **Yes** on the *Move Confirmation*.

## Pipeline Tab

Use the following steps to open a loan file from the **Pipeline** tab.

**Note:** The **Pipeline** options can be modified to change active loans displayed in the **Pipeline List**.

1. Select the **Pipeline** tab.
2. Click **Refresh** to update the *Pipeline List*.

The screenshot shows the 'Pipeline' tab in the software. On the left is a 'Navigation Panel' with 'Loans' and 'Pipeline' tabs. The 'Pipeline' tab is active, showing a 'Pipeline Setup' section with a 'Refresh' button. The main area displays a table of loan data. The table has columns: Borrower, Subject Property, Loan Amount, Note Rate, Cash To Close, Loan Status, Loan Status, Estimated Close, Rate Lock, Con..., and Cleared. The data is as follows:

Borrower	Subject Property	Loan Amount	Note Rate	Cash To Close	Loan Status	Loan Status	Estimated Close	Rate Lock	Con...	Cleared
America, Andy	222 Apple Grand P...			14,500	Prospect	12/03/2020

Figure 10: Pipeline List

3. Select the appropriate loan from the list.
4. Click **Open** to open the loan.

**Note:** See [Pipeline Management](#) for pipeline details.

## Tasks Tab

Use the **Task** tab to view and update tasks associated with a loan.

**Note:** See [Task Management](#) to create and manage loan tasks. Associate tasks to a loan file to archive a permanent task record with the loan file.

Use the following steps to locate and view a task.

1. Select the **Tasks** tab.

2. Select the task status to search from the *Search For* dropdown.

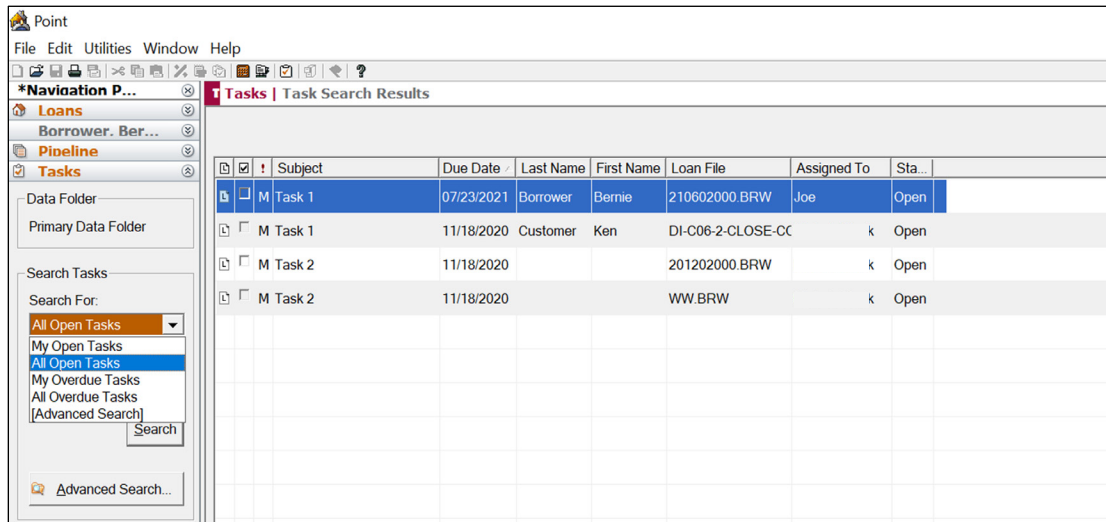

Figure 11: Task Search

3. Select the folder to search from the **In** dropdown.
4. Click **Search**.
5. Double-click a task in the **Search Results** to open.

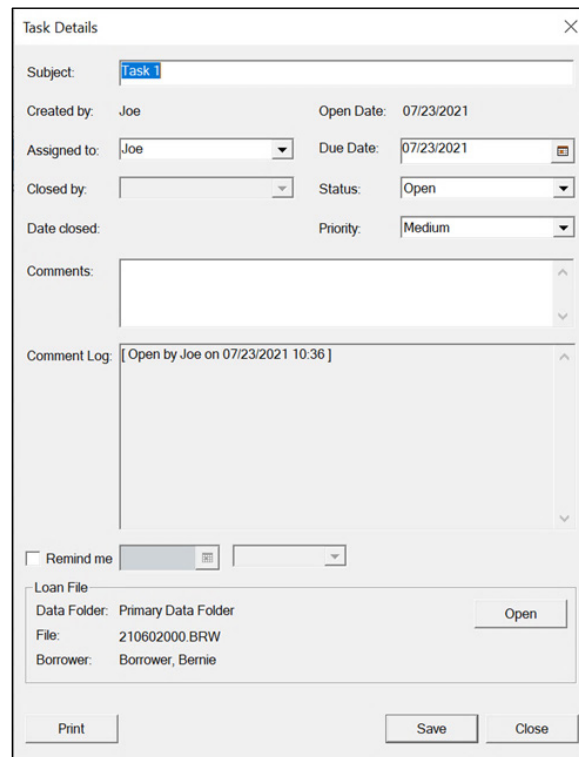

Figure 12: Task Details Dialog

6. Update the **Status** if applicable.
7. Enter **Comments** if applicable.
8. Click **Print** to print the task.
9. Click **Save** to save the updates.

**Note:** See [Create Tasks](#) to open a new task.

## Reports & Marketing Tab

The **Reports & Marketing** tab contains options for generating:

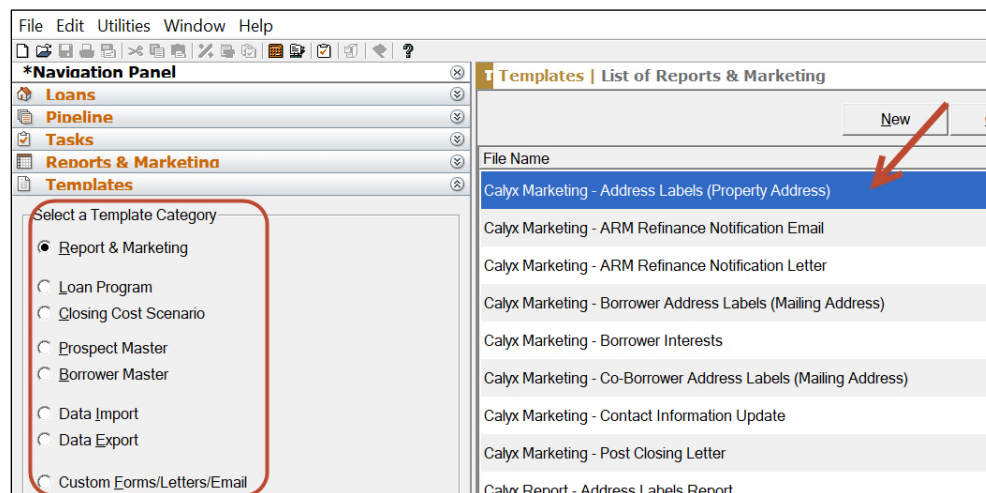

- Reports
- Mailing labels
- Marketing material

See [Reports Management](#) and [Marketing Management](#) for details.

## Templates Tab

The **Templates** tab provides access to pre-created templates.

1. Select the **Templates** tab.
2. Select the appropriate **Template Category** radio button.

**Figure 13: Point Templates**

3. Double-click a template in the **Template List** to open a read only template copy.

**Note:** See [Template Management](#) for details.

## Shortcut Toolbar

The **Shortcut** toolbar displays in the **Navigation** panel when a loan file is opened. The **Shortcut** toolbar contains quick access to select forms listed in other Point menus.

The **Shortcut** toolbar is not available when a master template is created. The forms must be selected from the **Forms** menu to include in the template. Use the **First Mtg** and **Second Mtg** buttons to toggle between linked first and second mortgage files. These buttons are visible only after a second mortgage is linked to the first mortgage file.

**Figure 15: Information Bar**

Minimize the information bar by clicking the **X** button at the top of the bar.

## Current Status

The **Current Status** section includes important loan data such as:

- Qualified Mortgage (QM) finding

- Loan status
- First or second loan
- Amount
- Property address
- Type and purpose
- Payment
- Note and Qual rates
- Payment

The **Update Status** button opens the **Update Status** dialog that imports loan information from the Status and Checklist screen. (See [Figure 326](#).)

## Loan Checklist

The **Loan Checklist** shows the status of document deliverables required for the loan.

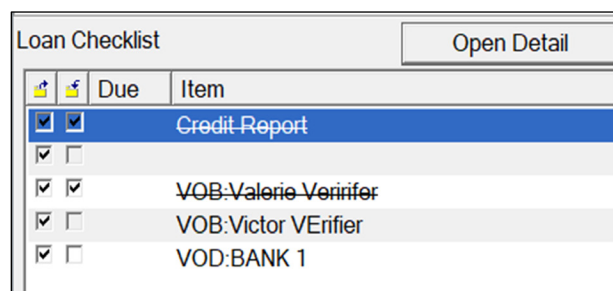

This checklist tracks the following dates for each item:

- Order Date
- Due Date
- Received Date
- The first two checkboxes indicate if the item was ordered and received.

Hover the mouse over a selected checkbox to display the date the item was completed.

Double-click an item or click the **Open Detail** button to open an information dialog for the selected item. Use this dialog to update the item status.

Information added or updated in this dialog automatically updates the corresponding tracking screen.

**Figure 16: Loan Checklist**

**Note:** See [Track Loan Status](#) for information about adding and updating items listed on the loan checklist and for information about the *Status and Checklist* screen.

## Chapter 4: LOAN APPLICATIONS

Point provides a set of files for prospects and a set of files for Borrowers. Use prospect files for potential customers and Borrower files for actual loans being processed.

Prospect files contain most of the marketing tools, preliminary disclosures, and processing forms required. A prospect file is easily converted to a Borrower file after the prospect signs a Loan Application. Borrower files contain the forms required to process the loan from origination through to submission to the underwriter.

**Note:** Point does not provide closing documents. Point does interface with vendors that provide the closing documents.

Borrower files include the following not included in prospect files:

- Verification Forms
- Submission Forms
- Transmittal Forms
- Access to the Banker Screens
- Additional tracking functions

Entered data in one Point screen automatically populates the same field in other screens and forms.

### Create Loans

Point offers multiple options for creating application loan files. The options include:

**Table 7: Loan Creation Options**

Create Loan Option	Description
<a href="#">Create from Blank File</a>	Create loan file from an empty Point screen
<a href="#">Convert Prospect to Borrower File</a>	Create loan file from an existing prospect file
<a href="#">Create from Template</a>	Create loan file from a Point loan template
<a href="#">Duplicate Existing File</a>	Duplicate an existing loan file
<a href="#">Rename Existing File</a>	Rename an existing loan file
<a href="#">Create Co-Borrower File</a>	Create a Co-Borrower file from an existing prospect or loan application

**Note:** Select a link in the above table to begin loan application creation.

## Create from Blank File

Use the following steps to create a prospect or borrower loan application.

1. Select the **Loans** tab.
2. Click **New**. (See [Figure 5](#).)
3. Select the **New Blank File** radio button.

Figure 17: Create New Loan File Dialog

4. Click **OK**.
5. Proceed to [Borrower Information](#) Screen.

## Convert Prospect to Borrower File

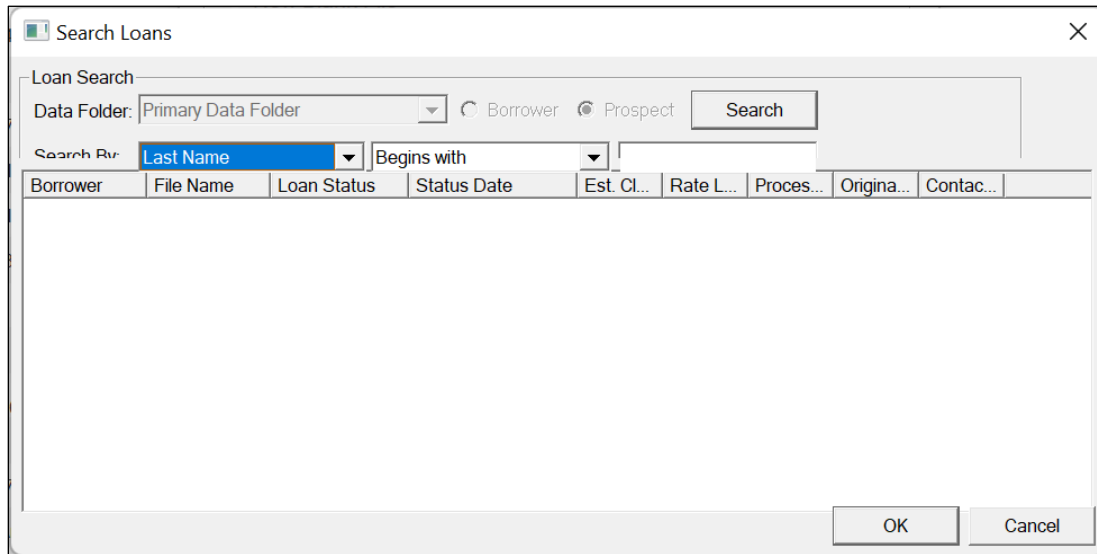

Use the following steps to convert a prospect file to a borrower file.

**Note:** Classic URLA loan files cannot be converted to the New URLA format.

1. Select the **Loans** tab.
2. Click **New**. (See [Figure 5](#).)
3. Select the **New File from Prospect** radio button. (See [Figure 17](#).)

4. Click **Search** on the *Search Loans* dialog to locate the prospect file to convert.

**Figure 18: Search Loans Dialog**

5. Double-click loan from the **Search Results** to select.
6. Click **OK**.
7. Proceed to Borrower Information Screen.

## Create from Template

Use the following steps to create the prospect or Borrower loan files.

1. Follow Steps 1 – 2 in [Create from Blank File](#) to access the *Create New Loan File* dialog.
2. Select the **New File from Master Template** radio button. (See [Figure 17](#).)
3. Click **OK**.
4. Proceed to [Borrower Information](#) Screen.

## Duplicate Existing File

Three file naming conventions are available when duplicating an existing file:

- **Preserve:** Retains the original file name
- **Auto Filename:** Use the automatic file naming convention specified for the selected data folder
- **Manual Naming:** Manually rename the file when prompted

Use the following steps to duplicate an existing loan file. The duplicate file will remain in the save format as the original file.

1. Click the **Loans** tab.
2. Perform a search for the loan file to copy. (See [Standard Loan Search](#).)
3. Select the loan file to copy.

Figure 19: Copy Loan File

4. Click **Copy**.
5. Select the appropriate **Data Folder** to store the copied loan file.

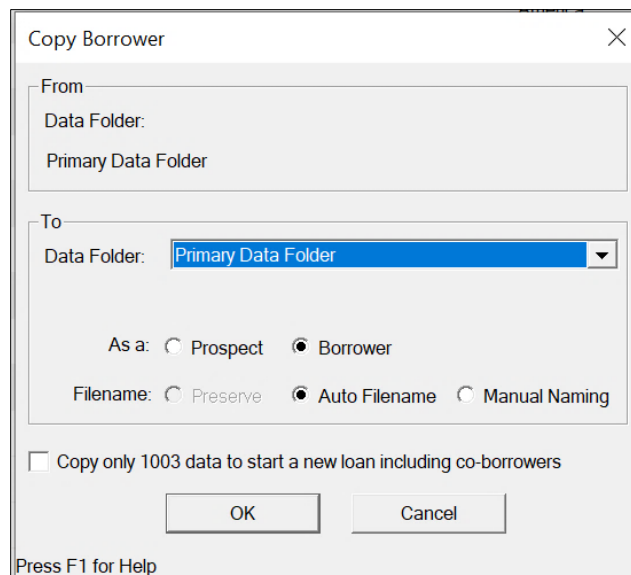

Figure 20: Copy Borrower

6. Select the appropriate **As a** radio button.
7. Select the appropriate **Filename** radio button:
8. Select the **Copy only 1003 data to start a new loan including Co-Borrowers** to copy the loan file plus the following documents:
  - User-defined document requests
  - Due date calculations defined in the *Document Requests* section of the *Status* and *Checklist* screen.
  - The originator identified in the *Borrower Information* screen.
  - The processor identified in the *Borrower Information* screen.

**Note:** The audit trail log is not copied with the loan data when the checkbox is selected. (See [Audit Trail](#) for details.)

9. Click **Yes** on the *Copy Confirmation* dialog.

## Rename Existing File

Use the steps in [Duplicate Existing File](#) to copy and rename an existing file. This option reuses existing information for repeat loans or second mortgages.

## Create Co-Borrower File

Co-Borrower files are used for applicants who are not married to each other. A maximum of five Co-Borrowers are allowed per loan. Co-Borrower applications are saved under the primary Borrower file name with the .cb[X] extension. The **X** in the extension denotes the Co-Borrower number.

**Example:** The extension for the first Co-Borrower on a loan is cb1, the second Co-Borrower, cb2, etc.

1. Click the **Loans** tab.
2. Perform a search for the loan file to copy. (See [Standard Loan Search](#).)

3. Select **Bor/Co-Bor** menu.

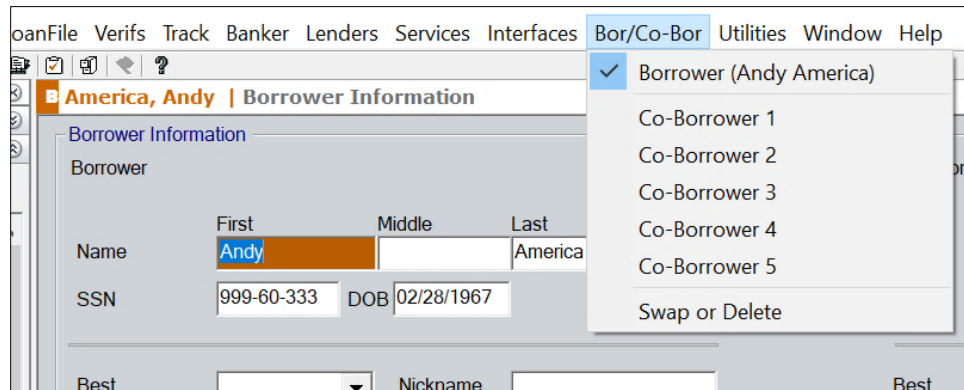

Figure 21: Bor/Co-Bor Menu

4. Select the appropriate **Co-Borrower Number**.

**Note:** See [Add/Swap/Delete Borrowers & Co-Borrowers](#) for additional information.

## Save Loan Files

Use the following methods to save loan files.

### Opened Loan File

Click **Save** to save open loan files.

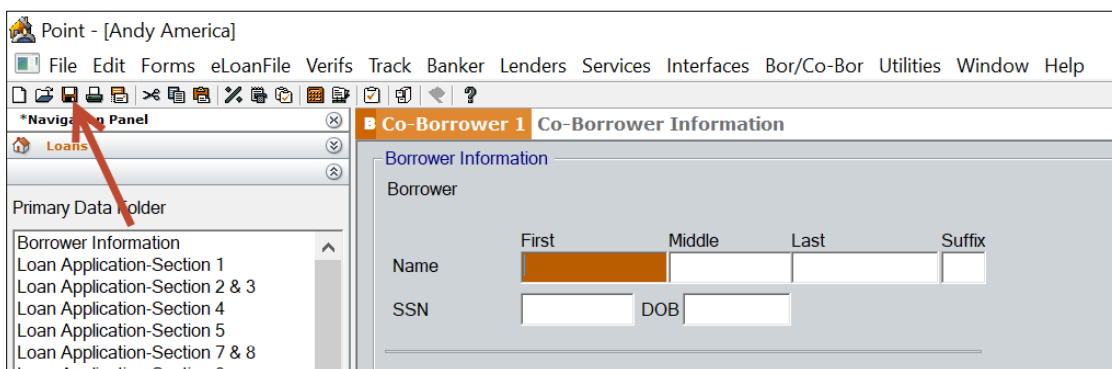

Figure 22: Save Open Files

Files are saved in the following formats:

**Prospect Extension:** .prs Location: c:\PNTDATA\Prospect\pointfile.prs

**Borrower Extension:** .brw Location: c:\PNTDATA\Borrower\pointfile.brw

**Co-Borrower Extension:** .cbx Location: c:\PNTDATA\Borrower\pointfile.cbx

## Save File as a Point Compressed File

Save data files in Point Compressed File (pcf) format to email as an attachment when the company email program does not communicate with Point (such as a web-based email account).

1. Open the loan file to save.
2. Select **E-mail** from the **File** menu.
3. Select Point Data File.
4. Enter the Email Password.

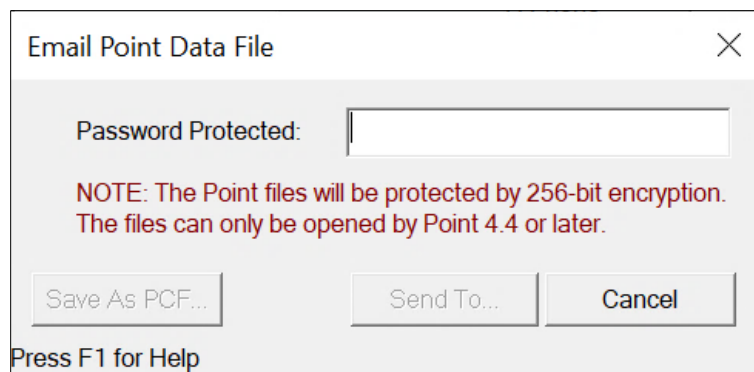

Figure 23: Email Point Data File Dialog

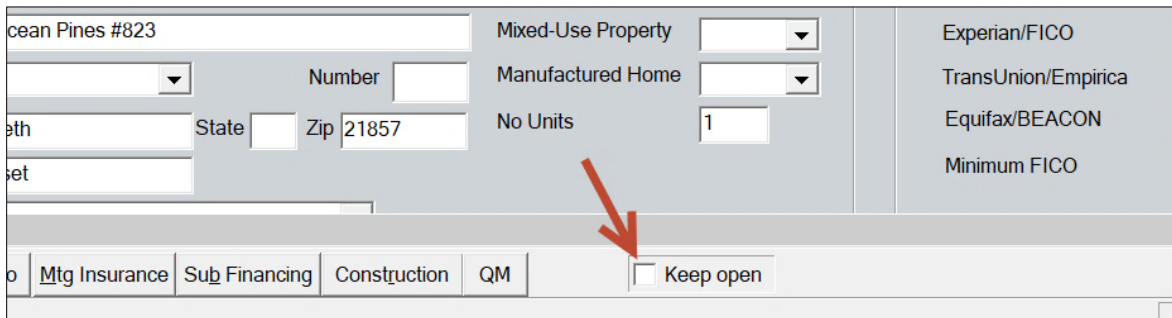

5. Click **Save as PCF**.
6. Set the save location on the *Save As* dialog.
7. Enter the filename.
8. Click **Save**.

**Note:** Send the file as an attachment from the email application. (See [Email Data File](#) for additional details.)

## Open Multiple Files

Select the **Keep Open** checkbox in the workspace before opening another file to allow multiple loan files to be opened.

The new file opens to the *Borrower Information* screen without closing the open file. Switch between open files by selecting the file name from the list of open files in the **Window** menu.

The screenshot shows the Borrower Information screen. At the bottom, there is a row of tabs: "Mtg Insurance", "Sub Financing", "Construction", "QM", and "Keep open". A red arrow points to the "Keep open" checkbox, which is currently unchecked.

Figure 24: Keep File Open

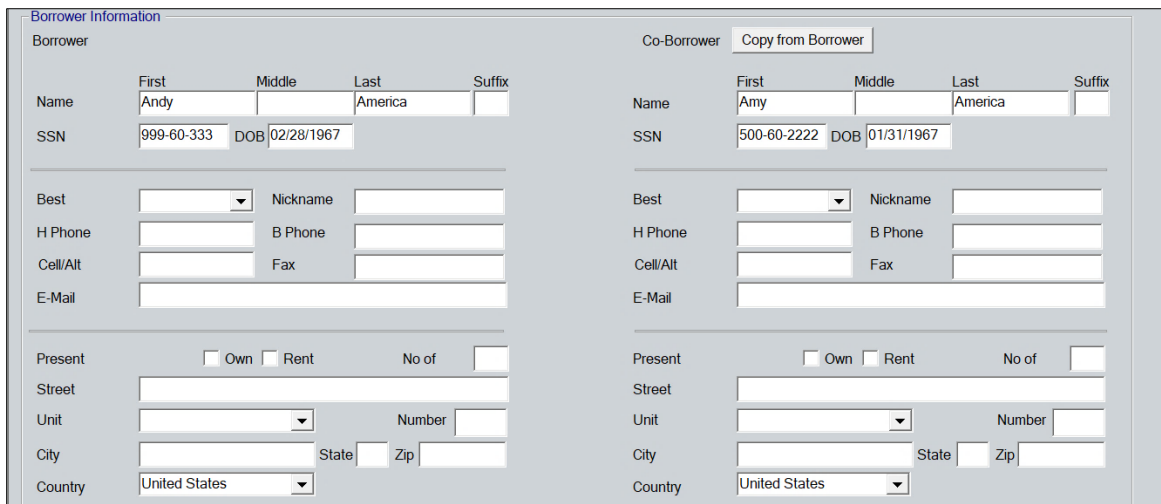

## Borrower Information Screen

The *Borrower Information* screen captures initial Borrower/Co-Borrower information and subject property details.

### Borrower/Co-Borrower Information

Use the following steps to complete the **Borrower/Bo-Borrower Information** fields.

1. Select **Borrower Information** from the *Forms* menu.
2. Enter Borrower **Name**.

The screenshot shows the Borrower/Co-Borrower Information screen. It is divided into two main sections: "Borrower" and "Co-Borrower". Each section has a "Copy from Borrower" button. The "Borrower" section includes fields for Name (First, Middle, Last, Suffix), SSN, DOB, Best (dropdown), Nickname, H Phone, B Phone, Cell/Alt, Fax, E-Mail, Present (Own/Rent), No of, Street, Unit, City, State, Zip, and Country. ## Chapter 5: MARKETING MENU

The **Marketing** menu provides access to loan marketing screens.

### Amortization Schedule

The *Amortization Schedule* produces a projected payment schedule for the entered loan program. Use the amortization schedule option to show prospects and borrowers the proposed monthly payments for following loan types:

- Fixed rate
- ARM
- Bi-weekly
- GPM
- Negative amortization
- Construction

Use loan program templates to run amortization schedules for prospects under various loan programs. Start the *Amortization Schedule* by selecting a preset loan program after creating the templates. Manually enter the data when a template is not available.

### Access Amortization Schedule

Use the following steps to access the *Amortization Schedule*.

1. Open the applicable loan.
2. Select Amortization Schedule from the Marketing menu.
3. Select a link for assistance with creating the associated *Amortization Schedule*:

## Debt Consolidation Worksheet

The *Debt Consolidation Worksheet* consolidates consumer debt for a refinance. The worksheet is most beneficial when used in conjunction with a credit interface provider or a credit service in Point. Use the *Debt Consolidation Worksheet* to save the step of manually entering liabilities.

Debts entered on the *Loan Application Page 3* or from an ordered *Credit Report* populate the *Debt Consolidation Worksheet*.

**Note:** Change the current monthly mortgage payment to reflect only the principal and interest when it includes taxes and insurance.

## Review Worksheet

Review the worksheet information and adjust as required.

1. Select Debt Consolidation Worksheet from the Marketing menu.

2. Verify populated field information.

## Loan Comparison

Point provides tools to compare loans that contain the benefits, costs, requirements, and other information used to determine which loan type of loan required for successful financing. Use the *Loan Comparison* screen to compare three loan scenarios side-by-side. The *Loan Comparison* screen provides immediate answers to questions about loan choices when used with the *Loan Program Templates* and the *Closing Cost Scenario Templates*.

The tools enable the following loan comparisons:

- Compare three different loan scenarios
- Comparing a sample FHA versus a conventional loan

**Note:** It is important to be consistent among the scenarios. Include taxes, insurance etc. in all scenarios when used.

## Perform Loan Comparison

Existing loan data from the loan file automatically populates in the *Loan Comparison* fields in the **Prospect Program** column. The *Anti-Steering Disclosure* **Scenario 1** and **Scenario 2** data populates the *Loan Comparison* **Scenario 1** and **2** columns.

**Note:** Only the current loan file data can be edits. Use the *Anti-Steering Disclosure* screen to edit the scenario data.

## Tolerance

The **Tolerance** button opens the *Tolerance* screen that displays all the individual fees and the calculations used to determine tolerance.

The *Tolerance* screen contains two comparison tables:

### ***Fees that cannot Change Table***

The **Fees that cannot change** table contains zero tolerance fees. Zero tolerance indicates the fees cannot increase from those originally disclosed on the *Loan Estimate*. Lenders are not permitted to charge more than the amounts for fees disclosed unless there is a change of circumstance that would trigger the need for a revised disclosure. Fees that fall in this category are typically for services the lender has control over or access to the actual fee amounts.

The screenshot shows the 'Tolerance' window. At the top, there is a 'Baseline' dropdown menu and a text input field. Below this is the 'Fees that cannot change' section, which contains a table with the following columns: 'Description', 'Closing Di...', 'Baseline', 'Tolerance', and an empty column. The table has multiple rows, some of which are highlighted in light blue. At the bottom right of the table, there is a 'Total \$' label and a text input field.

**Figure 165: Fees that cannot Change Table**

Fees that fall under this category include:

- Fees paid to the Lender, Mortgage Broker, or Affiliate of either.
- Fees paid to an unaffiliated third-party also apply if the Lender did not permit the Borrower to shop for a third-party service provider for any settlement service.
- Transfer Taxes
- Origination Fees
- The Zero Tolerance fees are in the following sections:
  - Origination Charges.
  - Services You Cannot Shop For, and some of those in section.
  - Services you Can Shop For.

[illegible]

The **Aggregate of fees that cannot change more than 10%** table list the description of:

- The **Total** fields at the bottom of the table total:

- Any fees that change between the *Loan Estimate* and the *Closing Disclosure* are listed in the table but not looked at on an individual level. The tolerance is calculated by the total sum of the amount increases. There is only a need to cure if total sum has increased by over 10%.

- Recording Fees
- Third-party services not paid to the Lender or Lender Affiliates.
- Services the Borrower can shop for: If the Borrower is allowed to shop for a service, but shops off the Written List of Service Providers, the item will change to the Cannot Shop section on the Closing Disclosure.

- Services You Cannot Shop For
- Services You Can Shop For
- Taxes and Other Government Fees

## Reset the Baseline

The fees in the **Baseline** column are listed in either table and are based on the fees from the *Loan Estimate* or the last saved fees from the *Loan Estimate* or *Closing Disclosure* after the baseline has been reset.

Reset the **Baseline** to match the current fees and recalculate the tolerance when the following occurs:

- There is a change of circumstance.
- When the fees change from the disclosure to disclosure.

**Note:** Resetting Baseline overwrites the fees in the **Baseline** column with the current fees from the *Loan Estimate* or *Closing Disclosure*.

1. Click **Tolerance**.
2. Select the appropriate option from the **Reset Tolerance** dropdown.

## Post Consummation Fees

The **Post Consummation Fees** tab opens the *Post Consummation Fees* dialog for construction costs. (See [Post Consummation Fees](#) for details.)

## Good Faith Estimate

The *Good Faith Estimate* (GFE) includes an itemized list of fees and costs associated with personal loan. The form is provided within three business days of the loan application.

Many of the fields on the *GFE* are calculated fields containing the total of a group of fees documented on the *Fees Worksheet*. The *GFE* field is automatically updated when a fee field is initially populated or changed on the *Fees Worksheet*.

Edit individual *Fees Worksheet* values on the to modify the aggregate value.

The values in the following fields on the *GFE* form are calculated from values entered on the *Fees Worksheet*:

- Origination Charge
- Title Services and Lender's Title Insurance
- Government Recording Charges
- Transfer Taxes
- Initial Deposit in Escrow Account

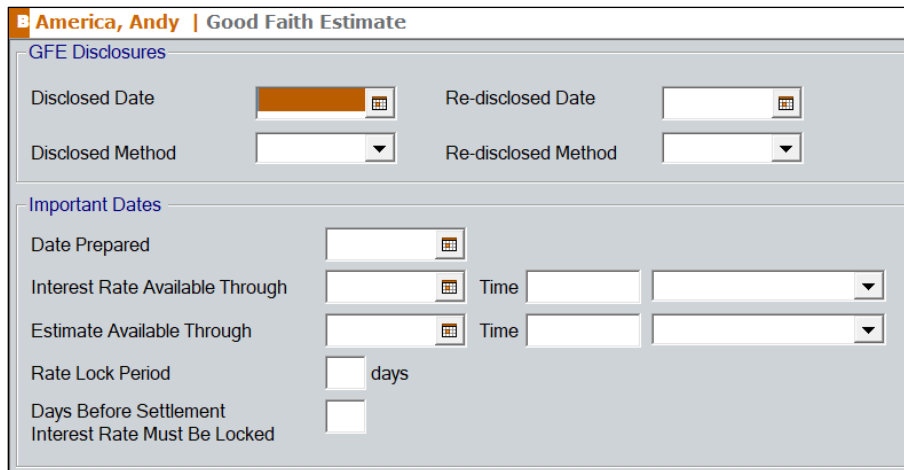

Fees marked as paid outside of closing are included in the total calculation if the POC checkbox is selected on the *Fees Worksheet*.

**Note:** Fields that have a one-to-one correlation with fields on the *Fees Worksheet* are identified when discussed below.

4. Select the **Can the interest rate rise?** checkbox for an ARM mortgage.

**Note:** The **It can rise to a maximum of** and **First change will occur in** fields are populated based on information entered in the *Truth-In-Lending* form, *Amortization* screens, and the *Monthly Payment Settings* dialog.

5. Select the **Even if payments are made on time, can the Loan Balance rise?** checkbox if the loan has product features that could cause the loan balance to increase even if the payments are made on time.

**Note:** The checkbox selection is not required when escrow items paid through the loan are the only cause of the loan balance increasing.

6. Select the **Even if payments are made on time, can the Monthly Principal, Interest, and any MI rise?** checkbox if an increase in the following can occur and increase the monthly payment (even when payments are made on time):
  - Principal
  - Interest
  - Mortgage insurance

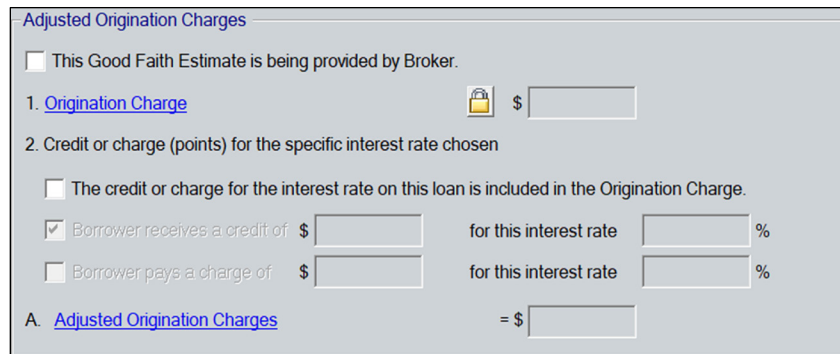

**Note:** The *First Increase Can Be In*, *Monthly Amount Owed Can Rise To*, and *Maximum Amount Can Ever Rise To* fields are calculated based on information entered in the *Truth-In-Lending* form, *Amortization* screen, *Monthly Payment Settings* dialog, and *PMI/MIP/FF/USDA* selections.

7. Select the Loan has a Prepayment Penalty checkbox and enter the maximum amount of the penalty in the Maximum Penalty field if the loan has a prepayment penalty.
8. Select the Loan has a Balloon Payment checkbox if the loan has a balloon payment.

**Note:** The **Balloon Payment of** and **Due In** years fields are calculated based on information entered in the **Term/Due** fields or on the *Mortgage Loan Disclosure Statement* (MLDS.)

## Adjusted Origination Charges

1. Select the This Good Faith Estimate is being provided by Broker checkbox if not selected.

**Figure 169: adjusted Origination Charges**

**Note:** The checkbox is selected if setup in the If you completed the Company Information defaults. (See [Display Ratios](#) for details.)

2. Verify and correct any fees on the *Fees Worksheet* that comprise the total origination charges.

**Note:** The **Origination Charge** field is a calculated field and always disabled. The field reflects the total fees the lender is charging to provide the loan to the Borrower. It also includes the charges for the mortgage Broker, if applicable. The charge does not include the charges for third-party services. The field is populated with the sum of the following fees itemized in the **Our Origination Charge** section on the *Fees Worksheet*:

- Lender's Inspection Fee
- Mortgage Broker Fee
- Processing Fee
- Underwriting Fee
- Wire Transfer
- User-defined fees

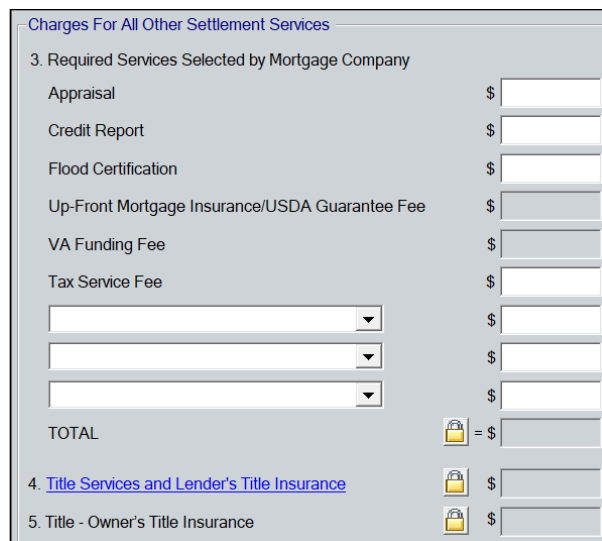

3. Select the appropriate option for **Credits or Charge Points** for the specific interest rate chosen.

**Note:** The **Adjusted Origination Charges** field is populated in the **Summary of Settlement Charges** section. Use the **Tradeoff** table at the screen bottom to create scenarios that show how the settlement fees are affected with a higher or lower interest rate.

## All Other Settlement Services Charges

Use this section to itemize fees for services for which the provider is selected and required by the lender or the originator.

1. Enter the estimated charges for required third-party services in **Required Services** empty fields.

**Figure 170: GFE Charges for Settlement Services**

**Note:** The **Up-Front Mortgage Insurance/USDA Guarantee Fee** and **VA Funding Fee** fields are disabled calculated values. These fields are populated with information entered in the *PMI/MIP/FF/USDA* dialog.

2. Verify and correct any fees on the *Fees Worksheet* that comprise the **Total Title Services** and **Lenders Title Insurance Fees**, including the following fields:
  - Closing/Escrow Fee
  - Document Preparation Fees
  - Notary Fees
  - Attorney Fees
  - Lender's Title Insurance
  - User-defined fees
3. Click the **TOTAL Lock** and manually enter the value.

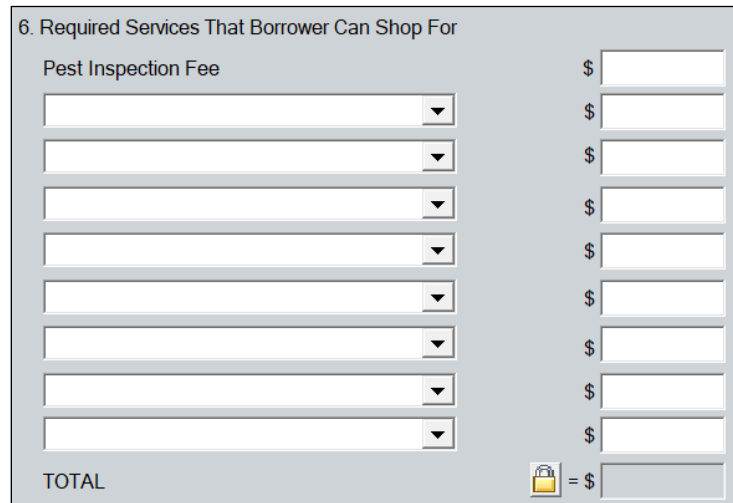

4. Click the **Title Services Lock** and manually enter the value.
5. Click the **Lenders Title Insurance Fees Lock** manually enter the value.
6. Click the **Owner's Title Insurance Lock** and manually enter the value.

**Note:** The **Owner's Title Insurance** is not included in the finance charge or APR.

## Services Borrower Can Shop For

6. Select the **Includes all property taxes** checkbox if the initial escrow deposit includes payments for all property taxes.

7. Select the **Includes all insurance** checkbox if initial escrow deposit includes all insurance.
8. Select the **Other** checkbox if initial escrow deposit includes payments for some, but not all fees.
9. Enter the included fees in the **Other** field.
10. Enter the number of days that interest is being charged based on the estimated settlement date.
11. Enter the estimated settlement date in the **If Settlement** field.

**Note:** These fields are populated from the *Fees Worksheet* if the interest information in the **Daily Interest Charges** section is completed.

12. Enter the estimated insurance charges the Borrower is required to pay before the loan closes.

**Note:** The Hazard Insurance field is automatically populated from the fields in the **Hazard Insurance Premium** section on the *Fees Worksheet*.

13. Enter the flood insurance premium in the **Flood Insurance** field.
14. Enter or select an insurance type and enter the estimated fees if required.

## Tradeoff Table

Use the following steps to complete the **Tradeoff** table.

Select the **Display Tradeoff Scenarios** checkbox to include alternate scenarios on the printed GFE.

Tradeoff Table

**Note:** The loan in this **GFE** column shows the total settlement charges based on the terms of the current loan being processed.

Perform on of the following:

**Show Borrower accepting a higher interest rate will lower settlement costs:**

1. Enter an interest rate lower than the proposed loan rate in the **Initial Interest Rate** field in the **Same loan with lower interest rate column**.
2. Enter the **credit** (as a percentage) the **lender pays** for the higher interest rate in the **Change in Amount Paid at Settlement** field in the **Same loan with lower settlement charges** column.

**Show the Borrower that paying higher settlement charges can lower their interest rate:**

3. Enter an interest rate lower than the proposed loan rate in the **Initial Interest Rate** field in the **Same loan with lower interest rate column**.
4. Enter the discount (as a percentage) the lender charges the Borrower to buy down the interest rate in the **Change in Amount Paid at Settlement** field in the **Same loan with a lower interest rate column**.
5. Click **Calculate** to calculate the totals.
6. Click **Save** to save form.

8. Select checkbox for the required service.
9. Enter the **Fee Amount** if the field is enabled.
10. Repeat Steps 4 – 8.
11. Repeat Steps 9 – 11 for remaining enabled services.

## GFE Block 5

Use the following steps if **GFE Block 5** is not populated.

1. Enter a value in the **Title Insurance (Owner's)** Fee Amount field.

**Figure 175: GFE Blocks 5 & 6**

2. Follow Steps 4 – 8 above for remaining fields.

## GFE Block 6

Services previously entered on the *Fees Worksheet* are displayed. Values in parentheses represent fees to be paid outside of escrow or fees not being paid by the Borrower.

1. Enter additional services and fees as required. (See [Figure 175](#).)
2. Select the **Shopping Allowed** checkbox for services for which the Borrower can shop.
3. Click **Save** to save form.

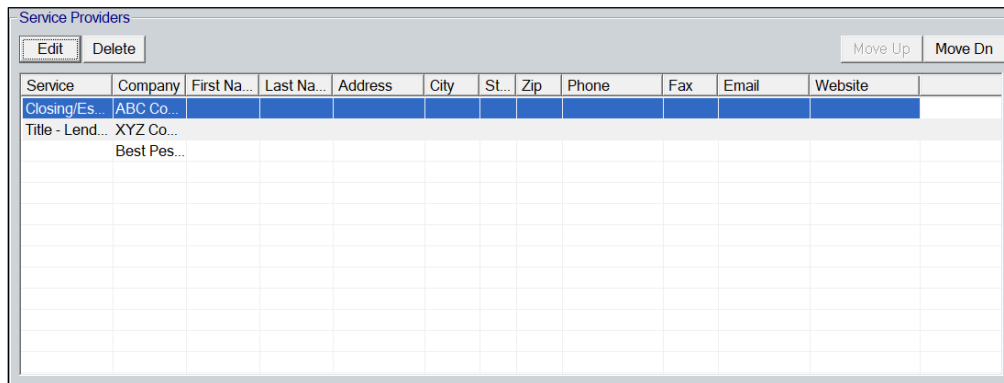

## Service Providers

The **Service Providers** list is built as Providers are added in the GFE sections on the form. Edit or delete the listed providers as required.

## Edit Provider

Use the following steps to edit a listed provider.

1. Select the **Provider** to edit.

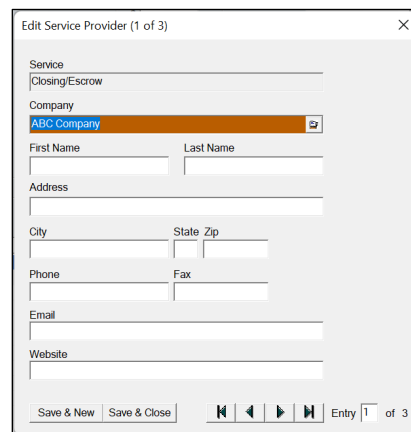

The image shows a window titled "Service Providers" with a table of providers. The table has columns: Service, Company, First Na..., Last Na..., Address, City, St..., Zip, Phone, Fax, Email, and Website. The first row is highlighted in blue and contains the text "Closing/Es..." in the Service column and "ABC Co..." in the Company column. Below this row, there are several other rows with partial text visible: "Title - Lend...", "XYZ Co...", and "Best Pes...". At the top of the window, there are buttons for "Edit", "Delete", "Move Up", and "Move Dn".

## Transmittal Summary (1008)

The *Transmittal Summary* form communicates the foundational loan information. The form is required when submitting a loan to underwriting.

**IMPORTANT!** Complete all other forms prior to the *Transmittal Summary* to enable appropriate data import.

Point has three Transmittal Summaries:

- *Transmittal Summary*: Used for a single Borrower set.
- *Combined Transmittal Summary*: Used for multiple Borrower sets.
- *Combined Transmittal Summary – New*: Used for multiple Borrower sets in the new format.

**Note:** The select *Transmittal Summary* impacts information included and the form layout.

## Transmittal/Combined Transmittal

Many *Transmittal Summary* fields are not enabled when using the Combined Transmittal Summary. The non-enabled values are populated from the primary Borrower/Co-Borrower *Transmittal Summaries*. Modify the individual *Transmittal Summary* to add or change an option.

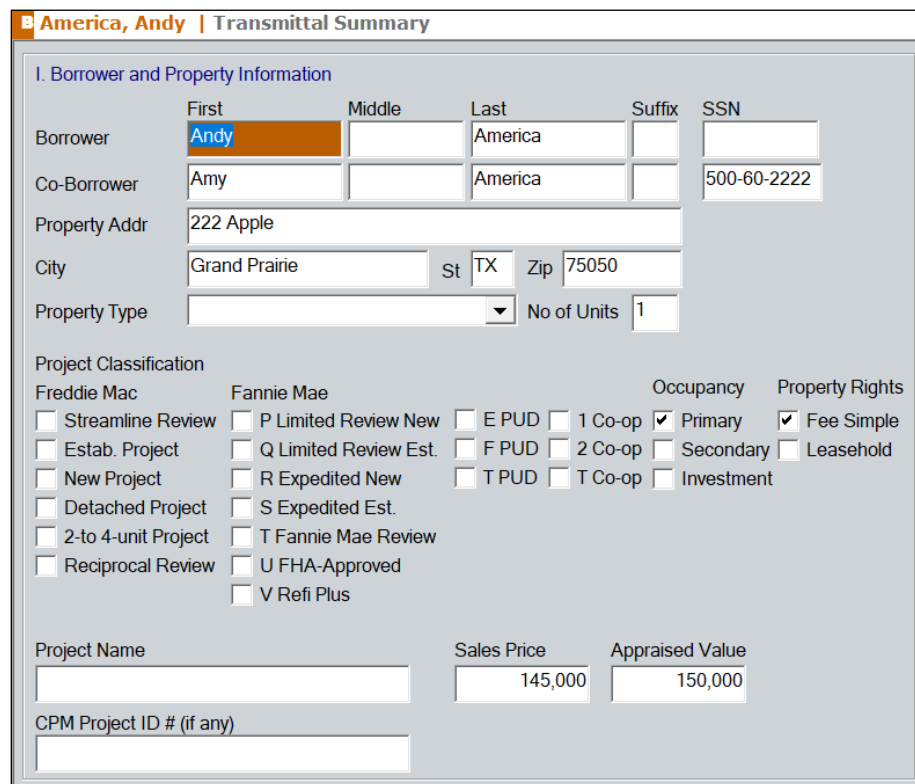

Use the Transmittal Summary for a single Borrower set, or the first Borrower set on a loan.

1. Select Transmittal Summary from the Forms menu.
2. Select **Transmittal Summary** from the sub-menu.

## Borrower and Property Information

Complete the non-populated **Borrower and Property Information** fields.

1. Select the **Property Type** from the dropdown.

**Note:** Enter the actual balance and the credit limit in **Sub Financing** if the loan is a **Home Equity Line of Credit (HELOC)**.

3. Select the **Purpose of Refi** when loan is for refinance.
4. Select the applicable **Mortgage Originator** checkbox(es).
5. Enter the Broker/Correspondent Name and Company Name if applicable.
6. Select the owner of the first mortgage from the **If Second Mortgage Owner of First Mtg** option.
7. Enter the original loan amount in the **If Second Mortgage** column.

**Note:** The **Init P & I** is different from the *Loan Application* when the **Note Rate** is different than the **Qualifying Rate**. The **P & I** on the *Loan Application* is the **Note Rate**. The **P & I** on the *1008* is the **Qualifying Rate**.

## Underwriting Information

Income data in the **Stable Monthly Income** section is populated from *Loan Application* page 2.

The total for the **Proposed Monthly Payments/Borrower's Primary Residence** section reflects the Borrowers current housing expenses if the subject property is an investment or secondary residence.

The total for the **Proposed Monthly Payments/Borrower's Primary Residence** section reflects the Borrowers proposed housing expenses if the subject property is for a primary residence.

The **Other Obligations** section populates liabilities and properties the borrower owns from the *Loan Application* sections 2-3.

Use the following steps to complete the unpopulated **Underwriting Information** section.

1. Select the **Underwriter's Name** from the dropdown.

## Qualifying Ratios and Risks

The **POS (Positive) Cash Flow (Subj Prop)** from **Underwriting Information** and the **Other Obligations** from the **Qualifying Ratios** section are automatically populated from the *Schedule of Real Estate Owned* section.

1. Click the **Other Obligations Lock** and enter the new positive or negative cash flow from the **Pos Cash Flow (Subj Prop)** or **Neg Cash Flow (Subj Prop)** that results from the purchase or refinance re-finance of a non-owner-occupied property.

**Note:** The **P & I** on the *Loan Application* is the **Note Rate**. The **P & I** on the *1008* is the **Qualifying Rate**.

**Figure 181: Qualifying Ratios & Risks**

2. Verify the following fields are correct to adjust the **Top** and **Bottom Debt-to-Income** ratios:
  - All income fields
  - Housing Expenses
3. Use **Mortgage Payments** fields to adjust the loan-to-value (LTV) and combined loan-to-value (CLTV) ratios in the *Borrower* or *Prospect Information* screen.

**Note:** Display the **Ratios** dialog for the current loan file by selecting **Display Ratios** from the **Utilities** menu.

4. Select **the** appropriate checkbox to indicate if the value is above or below **Note Rate**, **Bought Dn Rate**, or **Other**.

**Note:** The **Qual Rate** field is automatically populated from the *Loan Application*.

5. Enter the **HCLTV/HLTV** if applicable.

**Note:** The HLTV is the combined LTV based on the maximum credit limit of the equity line.

6. Complete the **Risk Assessment** section. (See [Figure 181](#).)

**Note:** Risks are typically not required to be completed by the Broker. The **Debt-to-Housing Gap Ratio (Freddie)** field, required for Freddie Mac loans, is the difference between the monthly debt-to-income ratio and the monthly expense-to-income ratio.

7. Enter **Underwriter Comments** if applicable.
8. Complete the Seller, Contract, And Contact Information section.
9. Click **Save** to save form.

## Anti-Steering Disclosure

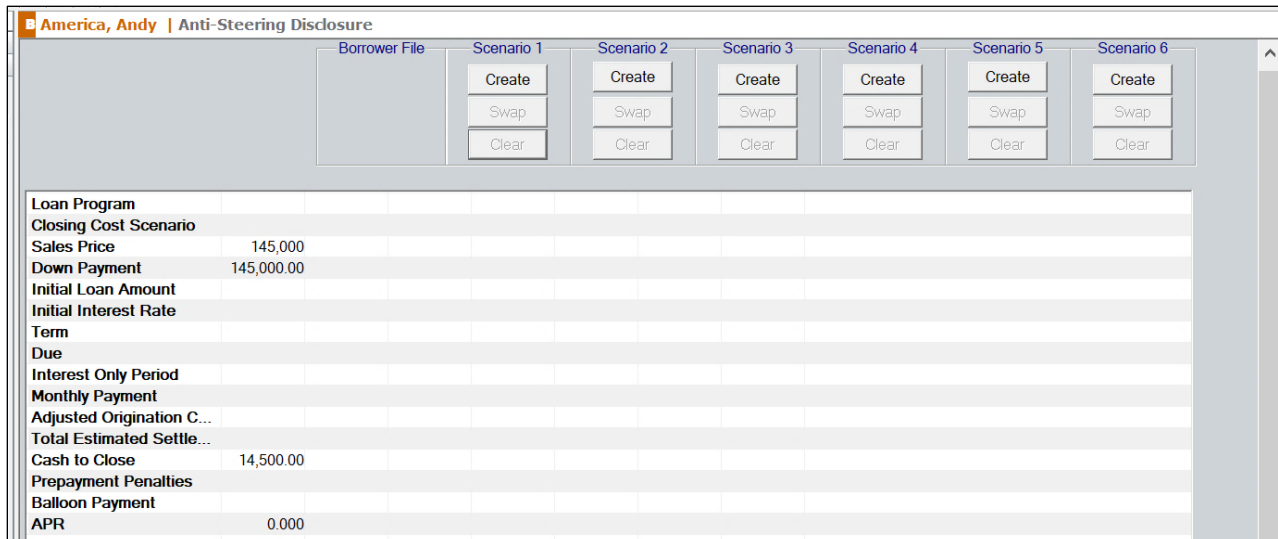

Loan originators are required to present an *Anti-Steering Disclosure* to borrowers to comply with the Federal Truth-In-Lending Act (TILA) and Regulation Z (Reg Z). The disclosure includes the available options for each loan type in which the borrower has expressed an interest.

### Scenarios

Use the **Scenario** section to create loan scenarios to include in the *Anti-Steering Disclosure*.

The first column shows the current loan information from the Borrower file. Create additional scenarios to display Borrower loan options.

## Request for Tax Return

Use the *Request for Tax Return* form to provide the Borrower authorization to verify tax information with the Internal Revenue Service.

Form 4506 orders copies of tax returns.

Form 4506-T orders transcripts of tax returns.

Form 4506-C enables Income Verification Express Service (IVES) participants to order tax transcript records electronically for a third-party.

A single screen is used in Point to complete the 4506, 4506-T, and 4506-C forms.

The **Send Return Transcript To** section from the 4506-T screen is used to print the **IVES Participant Name** and **SOR number** in **Section 5a** of the 4506-C form.

A separate print package must be created for the 4506-C form because the 4506-T and 4506-C use the same fields to print the **Return Address** on the 4506 form as opposed to the **IVES Participant Name** and **SOR number** for the 4506-C form.

**Note:** The IRS instructions to complete and submit the 4506 and 4506-T are provided on page 2 of each form. Select Print Preview with the form open to view the IRS instructions.

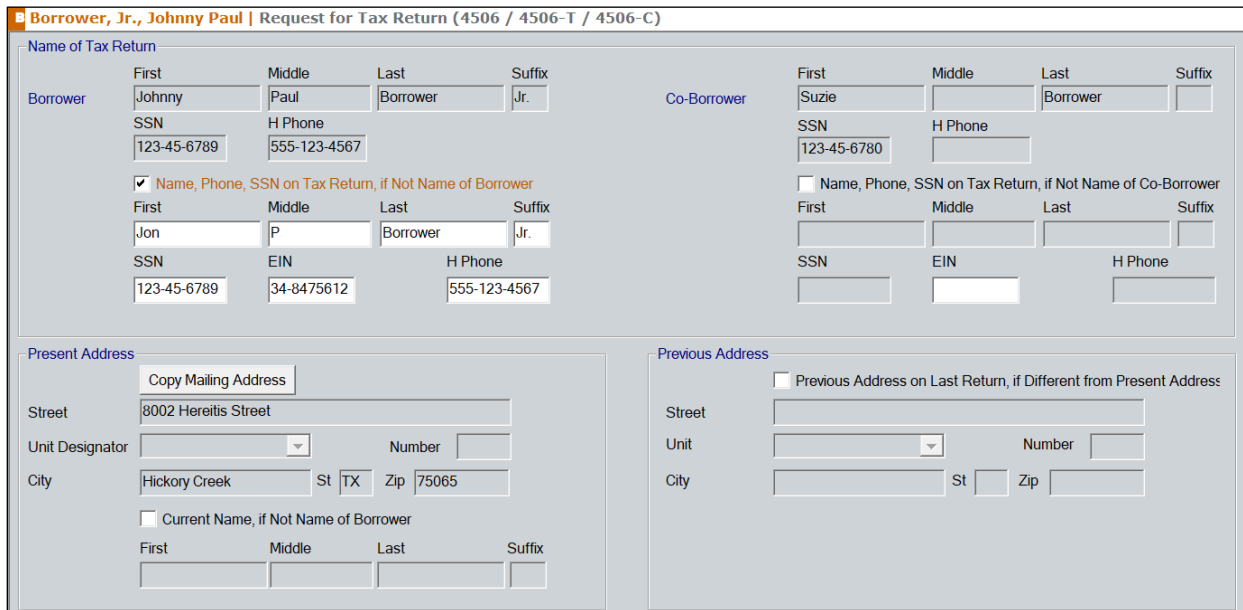

## Name of Tax Return

The initial tax return fields are populated from other screens.

1. Select Request for Tax Return (4506/4506-T/4506-C) from the Forms menu.

**Note:** The Borrower and Co-Borrower fields are automatically populated and disabled for changes.

2. Select the Borrower Name, Phone, SSN on Tax Return, if Not Name of Borrower checkbox if applicable.

## Certificate of Eligibility Request

Use the *VA Request for Certificate of Eligibility (26-1880)* to determine whether a veteran is eligible for a loan and the amount of available entitlement. Veterans or lenders may submit the form. The subsequent *Certificate of Eligibility* must be received prior to loan closing to ensure a veteran is eligible and possesses sufficient entitlement for a VA loan.

1. Select Veterans Administration (VA) from the Forms menu.
2. Select VA Request for Certificate of Eligibility (26-1880).

3. Verify the populated information.

The screenshot shows a web form titled "America, Andy | VA Request for a Certificate of Eligibility (26-1880)". The form is divided into several sections:

- Veteran Information:** Fields for First Name (Andy), Middle, Last Name (America), Suffix, Date of Birth (02/28/1967), and SSN.
- Name used:** A checkbox for "Served under a different name?" with an adjacent text field.
- Contact Information:** Fields for Daytime Phone and E-Mail.
- Address:** Fields for Street (111 Apple), City (Grand Prairie), State (TX), and Zip (75050). There is also a "Certificate Mailing" section with a "Copy From Mailing Address" button and fields for Street, City, State, and Zip.
- Disabilities:** A checkbox for "Discharged / have any service-connected disabilities" and a field for "VA Claim Number".
- Military Service:** A checkbox for "Currently on active duty?" and a checkbox for "Purple Heart recipient?".
- Active Service Table:** A table with columns for Active Service, Branch, Date Entered, Date Separated, Officer, and Service No. It contains three rows of input fields.
- Reserve or National Guard Table:** A similar table with columns for Reserve or National Guard, Branch, Date Entered, Date Separated, Officer, and Service No. It also contains three rows of input fields.

4. Complete the Veteran's Information.
5. Complete the Certification Questions.

## Custom Screens/Fields

The Custom Screens/Fields Form menu option is available when user-defined screens are created. (See [Custom Screen Settings](#) for details.)

## Chapter 7: eLOANFILE MENU

Point includes a group of screens in the **eLoanFile** menu that compile loan information for electronic submission to vendors or borrowers. The screen fields automatically populate with information from other screens. Remaining fields are manually completed.

Use **eLoanFile Document Management** option to select the documents for submittal to vendors or borrowers and the stacking order the documents are printed.

See [Print Forms](#) for form printing details.

### eLoan Document Management

Access the Document Management System from the **eLoanFile** menu. Use the Repository (with the Document Management System) to electronically manage the loan documents generated inside and outside of Point. External documents may include:

- Bank statements
- Pay stubs
- Identification documents, etc.

Each loan file has a separate document repository used to store and manage electronic documents associated with that file. Use the document repository to retain an electronic file of all information associated with the loan.

The document repository facilitates the movement of documents throughout the loan process. Select all the documents from the repository and create a package to send. The Document Management system records the package date and time stamp while printing or emailing.

The document repository is used to send documents to and request documents from borrowers through Zip or WebCaster.

The flow of documents through the document repository is recorded in the audit trail file if your site runs PointCentral and the audit trail is enabled in PointCentral. See [Audit Trail](#) for details.

**Note:** The audit trail is not available when Point is not connected to PointCentral.

The document repository stores the following types of documents:

- Electronic documents created outside of Point
- Point-generated forms accessible from the *Borrower Forms* dialog
- Documents generated using the Point services or interfaces

A copy of a document requested using one of the Point services is automatically stored in the document repository when received if the Automatic Document Storage option is set in the **Utilities** menu. See [Set Automatic Document Storage](#) for details.

**Note:** The name of the user who is logged in is automatically populated in the Stored by field. When Point is not running in a secure mode, you can change the name that displays by selecting Change Name from the File menu while in the Loans tab.

## Add Documents

Use the following sections to add documents to the Repository and assign document properties.

## Add Borrower Forms

Selected forms may be converted to a single PDF document or stored as individual files. Individual files retain the form name. Multiple files stored as a single PDF are named during storage.

1. Open the borrower or prospect file with information to store.
2. Select Document Management from the eLoanFile menu.
3. Click **Add**.

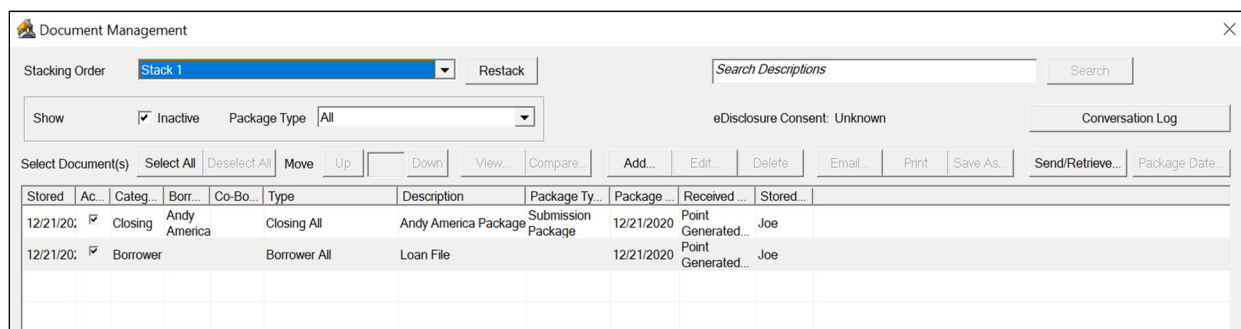

Figure 288: Document Management Dialog

4. Select **Add Point Form** on the *Add Selection* dialog.

12. Click **OK**.

## Add Zip & WebCaster Documents

5. Click **Send/Retrieve** documents with no document selected to automatically retrieve documents uploaded to the *Zip & WebCaster* sites. (See [Figure 288](#).)

## Non-Point Document Supported Formats

The category must be Closing, and the document type must be one of the following to enable export to UCD XML for this document:

- **Closing Disclosure:** Standard
- **Closing Disclosure:** Alternative
- **Closing Disclosure:** Borrower Only

Default category and type lists are provided. Add and change the lists from **Document Categories/Types** on the **Utilities** menu.

Add documents in the following supported formats:

- PDF (pdf)
- Images (jpeg, jpg, gif, bmp, tif, tiff)
- Microsoft Word (doc, docx)
- Text (txt)
- Rich text (rtf)
- HTML (html, htm)
- UAD XML and non-UAD appraisal XML files only (xml)

## Drag and Drop Documents

Drag and drop an existing document or Outlook email attachment to the document repository. Documents in a supported format are converted to PDF during storage.

1. Open a loan file.
2. Select Document Management from the eLoanFile menu.
3. Locate the document on the computer or in an email.
4. Drag the file to *Document Management* dialog.

5. Respond **Yes** *Add Confirmation* prompt to confirm the addition.

15. Select the **package** to include the document from the **Package** dropdown list.
16. Enter who is to receive the package in the **To** field and specify a **Date and Time**.

17. Review the document.
18. Click **Add** to add it to the repository. New and extracted documents are highlighted.
19. Close the Document Information Preview dialog.

## Browse and Add Documents

Documents in a supported format are converted to PDF during storage. Use the following steps to browse for a document to add to the Repository.

1. Open the borrower or prospect file containing the information to store.
2. Select Document Management from eLoanFile menu.
3. Click **Add**.
4. Select **Add File from Computer** on the *Add Selection* dialog. (See [Figure 289](#).)
5. Click **OK**.
6. Browse to the stored file.
7. Select the file.
8. Click **Open**.
9. Use Steps 5 – 18 in Drag and Drop Documents to assign document properties.

## View Documents

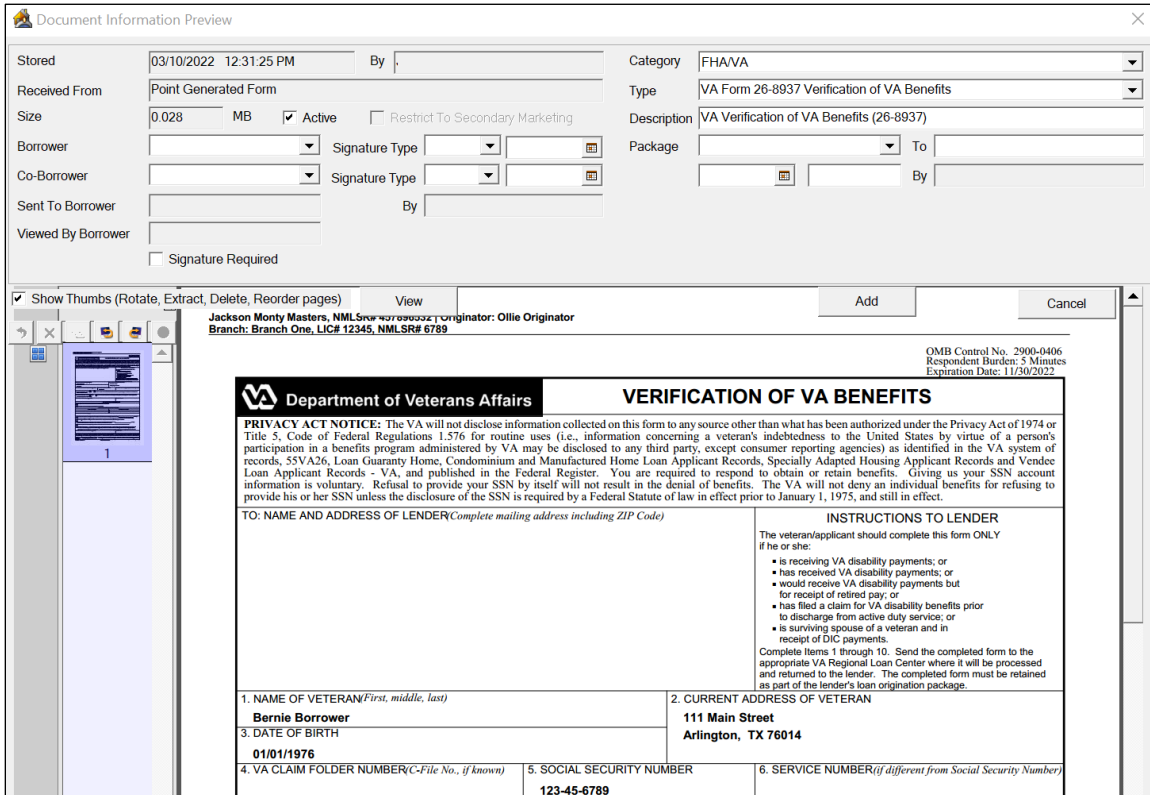

Use the controls above the document preview to scroll through the pages or to enlarge the view.

**Note:** The Extract icon and the thumbnails are disabled for users without access to secured areas.

Use the following steps to open and view Repository Documents.

1. Select Document Management from the eLoanFile menu.
2. Select the document to view. (See [Figure 288](#).)
3. Double-click to view in the **Document Viewer**.

#### 4. Review the document information in **Document Details** pane.

9. Click on the **Order Type** drop-down menu and select an option.
10. Enter an **Order Reference Number**.
11. Add any additional information.
12. Click the **Submit** button at the bottom of the screen

## Order Status

**Retrieve:** Clicking the Retrieve button generates a request for getting previous results. The Order Status table will store a description when the title company sends the user back a document. In an instance, this document is unavailable in the loan. Then the user can select the document in the table and re-downloaded the document by clicking the Retrieve button.

**View Status:** The View Status button exists to view the full description of each successful response stored in the Order Status table.

**View Documents:** The View Documents button is unavailable by default (grayed out). When enabled, the user can view the documents that returned from the interface.

## Verifications

Verification Services include:

### [Request Verifications](#)

**View Report:** Available after receiving the verification document (See [View Documents](#) for details.)

- Populate Employment (1003): Available after receiving the verification document

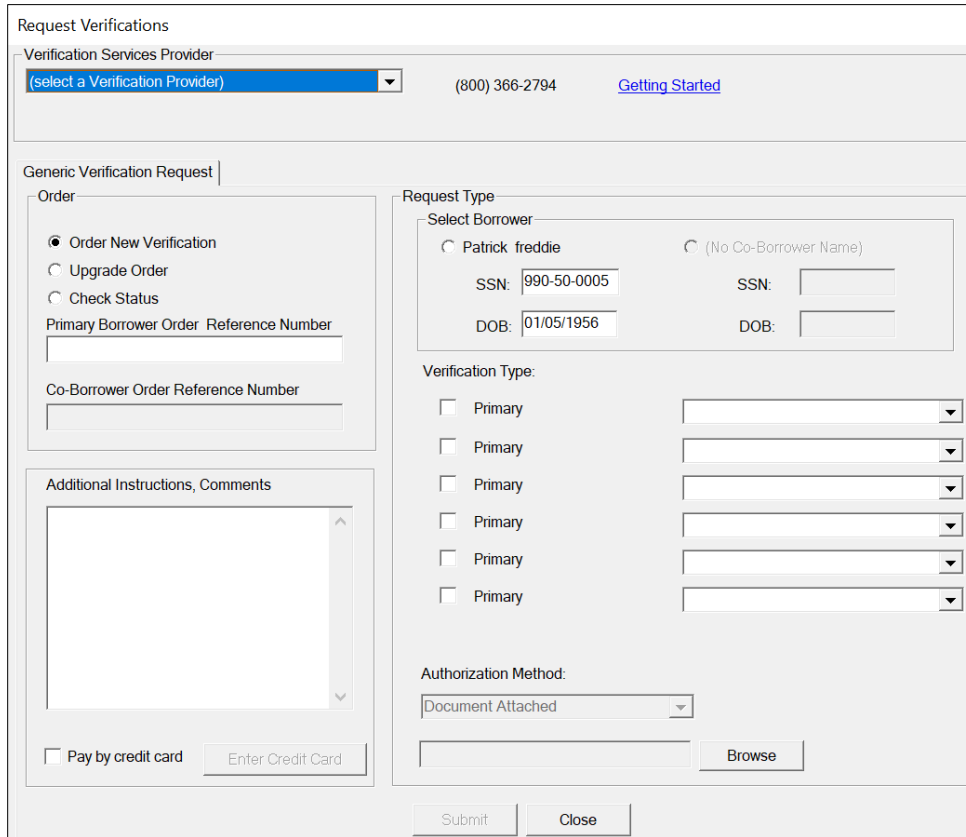

**Note:** See [Verification Services](#) to request the verifications from vendor websites.

## Request Verifications

1. Select **Verifications** from the **Services** menu.
2. Select Request Verifications

### 3. Select the Verification Services Provider.

The dialog box is titled "Request Verifications". It contains the following sections:

- Verification Services Provider:** A dropdown menu with the text "(select a Verification Provider)", a phone number "(800) 366-2794", and a link "Getting Started".
- Generic Verification Request:** A section with two tabs: "Order" and "Request Type".
  - Order Tab:** Contains radio buttons for "Order New Verification" (selected), "Upgrade Order", and "Check Status". Below these are input fields for "Primary Borrower Order Reference Number" and "Co-Borrower Order Reference Number". At the bottom is a checkbox for "Pay by credit card" and a button "Enter Credit Card".
  - Request Type Tab:** Contains a "Select Borrower" section with radio buttons for "Patrick freddie" (selected) and "(No Co-Borrower Name)". Below these are input fields for "SSN" (with "990-50-0005" entered) and "DOB" (with "01/05/1956" entered). There are also empty input fields for "SSN:" and "DOB:". Below this is a "Verification Type:" section with five rows, each containing a "Primary" checkbox and a dropdown menu. At the bottom is an "Authorization Method:" section with a dropdown menu showing "Document Attached" and a "Browse" button.

At the bottom of the dialog are "Submit" and "Close" buttons.

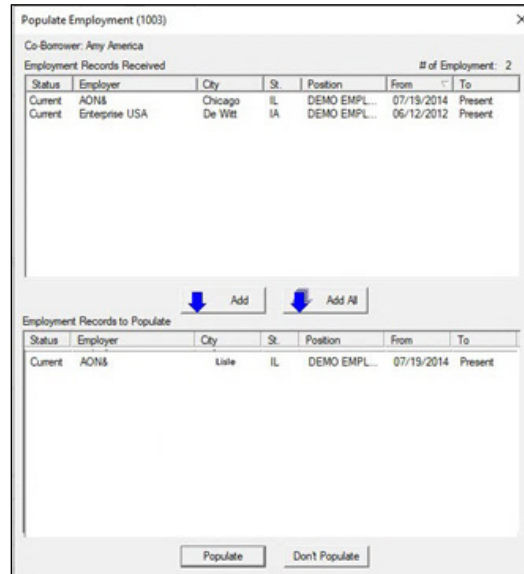

**Figure 498: Request Verification Dialog**

4. Select the appropriate **Order** radio button.
5. Enter the Primary Borrower Order Reference Number if applicable.
6. Enter the Co-Borrower Order Reference Number if applicable.
7. Enter Additional Instructions, Comments if applicable.

**Figure 499: Populate Employment Dialog**

**Note:** Click Add All to move all employment records.

4. Click **Add** to move the records to the **Employment Records to Populate** list.
5. Click **Populate**.

## Correct Service Request Submission Errors

Request information is verified during transmission after the service request is submitted. A dialog displays containing a list of fields with errors if required data is invalid or is missing from the request.

Use the following steps to correct fields containing invalid or missing data.

1. Double-click the field name to go to the field that caused the error.
2. Add or correct the data as needed to correct the error.
3. Click **Refresh** to remove the corrected fields from the list.
4. Click **Refresh** to close the dialog and return to the request dialog after all fields are corrected.

5. Click **Submit** to resubmit the request.

## Check Pending Request Status

Documents are automatically stored in the Document Repository when the request for a service is successful. The ordered and received dates are automatically updated in the loan checklist and third-party documents if those date fields are empty.

Retrieve the status of pending title, escrow, or flood request after opening the loan file.

1. Open the loan file with a pending request.

**Note:** *Pending Orders* dialog displays if a response was received from the provider. The orders with a response from the provider are listed in the dialog.

2. Select the checkboxes for the services to view.
3. Click **OK**.

**Note:** Click **Cancel** to go directly to the loan file.

4. Enter login information for the selected provider.
5. Click **OK** to display the view report dialog.

**Note:** Clicking **Cancel** opens the next provider login dialog. The loan file displays if another provider is not selected.

6. Click **View** to open the report.

**Note:** Click **Close** to proceed to the next vendor.

## View Documents

Retrieve documents from the **Document Repository** to view and print.

1. Select the **View** option for the ordered Service Document to review.
2. Remove the unwanted documents from the list by unchecking the boxes.
3. Select document(s) to view and click **View/Print** to display a PDF file of the selected file(s).
4. Click **Print** to print the file.
5. Click the **Save** icon to save the PDF file to a secured location of choice.
6. Click **Close** when finished with the file.

## Chapter 13: INTERFACES MENU

Use the **Interfaces** menu to order products and services from vendors who have integrated their software to work with Point to exchange data without having to exit the application.

### LoanScoreCard

LoanScorecard is the integration of LoanScorecard.com and Point.

**Note:** A credit report is required before the FHA TOTAL Scorecard can be generated.

### LoanScoreCard Access

## Uniform Collateral Data Portal

The Uniform Collateral Data Portal (UCDP) is used to electronically submit appraisal data (UAD and non-UAD XML) files to Fannie Mae and Freddie Mac. The following XML files are supported:

- MISMO 2.6 GSE
- ACI
- AI Ready

The appraisal XML file to submit to the Government Sponsored Enterprise (GSE) must be stored in the **Document Repository** to access from the **UCDP** screen.

The following table shows the UAD XML and non-UAD XML supported forms.

**Table 10: Supported XML Forms**

UAD XML	Non-UAD XML
1004/70	1004C/70B
1073/465	1025/72
1075/466	2090
2055/2055	2095

The portal is accessible only in borrower files from the **Interfaces** menu and the **Shortcut** menu.

Set up seller identification and login information in the Point utilities prior to use to avoid entering the data each time you submit an appraisal for a new loan file to Fannie Mae or Freddie Mac in the Uniform Collateral Data Portal. The information is permanently stored and retained for future use. (See [Uniform Collateral Data Portal Setup](#) for details.)

## UCDP Submission

Use the following steps to submit an appraisal to Fannie Mae and Freddie Mac through UCDP.

1. Open the borrower file.
2. Select **Uniform Collateral Data Portal** from the *Interfaces* menu.

3. Select a **Form Type** from the dropdown. (See [Table 10: Supported XML Forms](#) for supported forms.)

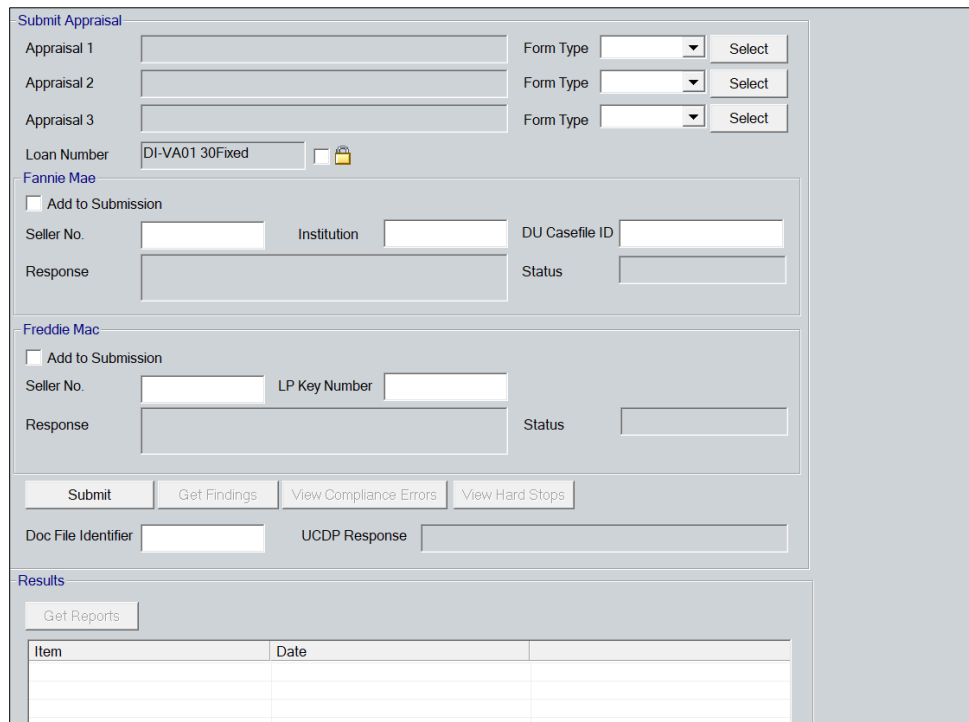

Figure 502: UCDP Screen

4. Click the **Select** button.
5. Select the **appraisal XML** file from the **Document Management File List**. (See [Figure 295](#).)
6. Click **Select** to display the document in the *Uniform Collateral Data Portal* screen  
**Appraisal 1** field is populated with the appraisal name.
7. Repeat Steps 3 – 6 for up to two additional appraisals, if applicable.
8. Click the corresponding **Remove** button and click the **OK** button in response to the confirmation prompt to remove an appraisal.

**Note:** **Appraisal 1** must be replaced another appraisal after the submission is completed to remove.

9. Enter the **Loan Number** if not populated.

**Note:** Use the **Lock** to change a listed **Loan Number** if required.

10. Select the **Fannie Mae Add to Submission** checkbox if applicable and complete the **Fannie Mae** fields.
11. Select the **Freddie Mac Add to Submission** checkbox if applicable and complete the **Freddie Mac** fields.

12. Click **Submit**.

**Note:** Submit additional appraisals to the same investor after the original submission or submit the appraisals to a new investor at any time. An investor cannot be removed from the submission after an appraisal is submitted.

13. Click **OK** in response to the *UCDP Submission Results* dialog.

## View Hard Stops

The *View Hard Stops* dialog displays if a hard stop occurs. The *View Hard Stops* dialog contains the errors that occurred during the submission of the appraisal.

The **Override Status** and **Override Decision** columns are populated with **APPROVED** and the Override request accepted if the submittal is successful.

Some overrides are performed automatically and approved during submission.

The **Override Allowed** column states **Automatic** when an automatic override occurs.

The **Override Decision** column states **Override automatically** approved.

The **Override Allowed** field states Yes when a manual override is allowed.

The **Override Status** column is blank when a manual override is required.

The **Override Allowed** field states **No** when an override is not allowed.

**Note:** The must be corrected and the file re-submitted when the **Override Allowed** field states **No**.

Review each message and determine whether a manual override is allowed.

Use the following steps to perform a manual override.

1. Select the **Error**.
2. Click **Create Override** to open the *Edit Override* dialog.
3. Select a **Reason Code** for the override from the dropdown.

## Uniform Closing DataSet (UCD)

Use the *Uniform Closing Dataset (UCD)* screen to export the Closing Disclosures stored in the Point **Document Repository** to UCD XML format for submission to Fannie Mae and Freddie Mac.

Only the following document types are allowed:

- Closing Disclosure: Standard
- Closing Disclosure: Alternative
- Closing Disclosure: Borrower only
- Closing Disclosure: Seller only

1. Select Uniform Closing Dataset (UCD) from the Interfaces menu.
2. Enter the Fannie Mae or Freddie Mac UCD Case Number.

**Figure 503: Uniform Closing (UCD)**

**Note:** The UCD case number is automatically included in the report when using the Fannie Mae or Freddie Mac AUS in Point and selecting the corresponding **Include in UCD** checkbox in the **Automated Underwriting** section on the *Banker Underwriting* screen.

3. Click the **Add** button to open the Document Repository. (See [Figure 295](#).)
4. Select the document to export to UCD XML.

**Note:** There is potential risk the data will not export to the UCD XML format correctly if the Closing Disclosure being exported was not generated by Point.

5. Click the **Select** button.
6. Repeat Steps 3 – 5 for another document to the export.
7. Click the **Export button** for the XML type to export.
8. Navigate to the directory to store the XML file.
9. Click **Save**.

**Note:** Select a document and click **Delete** to remove from the Export **Closing Disclosure** table.

## WebCaster

WebCaster is a subscription-based website creation program used to promote and conduct mortgage business on the internet. The following options are available with a Calyx WebCaster subscription:

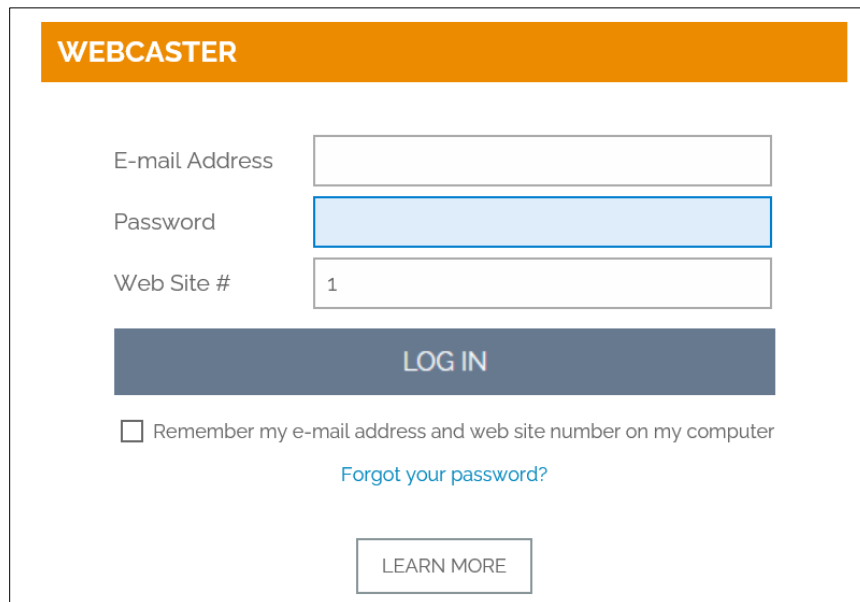

- Transfer loan information from Point to WebCaster.
- Submit online loan applications.
- Access loan status reports.

**Note:** See [Zip/WebCaster Preferences](#) for WebCaster setup.

## WebCaster Administrator Login

Use the **Administrator Login** option to access WebCaster options not available to typical users.

1. Select **WebCaster** from the **Interfaces** menu.
2. Select WebCaster Administrator Login.

The image shows a web form titled "WEBCASTER" in an orange header. Below the header are three input fields: "E-mail Address", "Password" (highlighted with a blue border), and "Web Site #" (containing the number "1"). Below these fields is a dark blue "LOG IN" button. Under the button is a checkbox labeled "Remember my e-mail address and web site number on my computer". Below the checkbox is a blue link that says "Forgot your password?". At the bottom of the form is a "LEARN MORE" button.

**Figure 504: WebCaster Administrator Login**

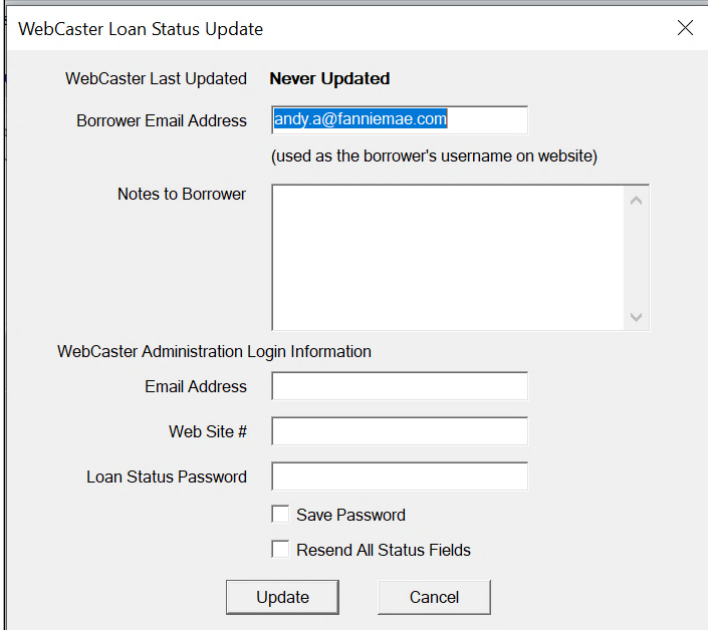

3. Enter Log In Credentials.
4. Click **Log In**.

## Update Loan Status

WebCaster sends emails to borrowers stating the loan status has been updated and is now available when WebCaster is configured for the option. Borrowers can log into the site and view the loan application status.

Use the following steps to update WebCaster loan statuses.

1. Select the Borrower file.
2. Select **WebCaster** from the **Interfaces** menu.
3. Select Update Loan Status.
4. Enter the Borrower Email Address field.

The dialog box titled "WebCaster Loan Status Update" contains the following fields and options:

**Note:** Select **Refinance** to create an **Escrow Refinance** table.

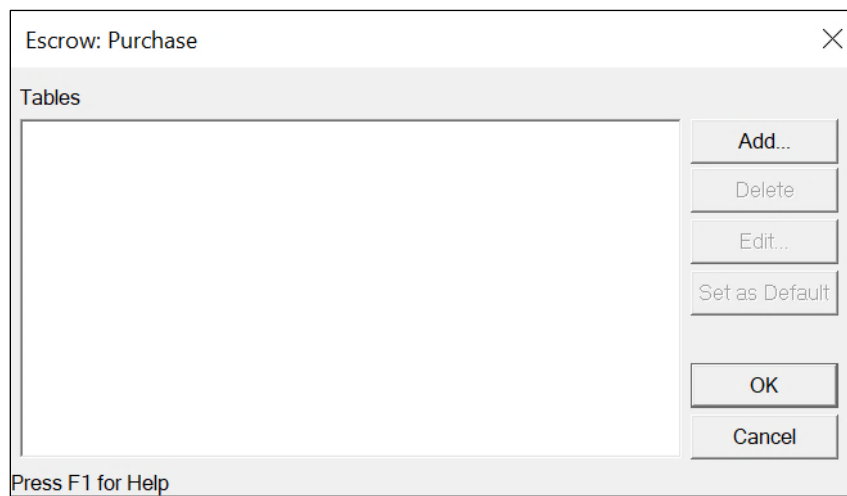

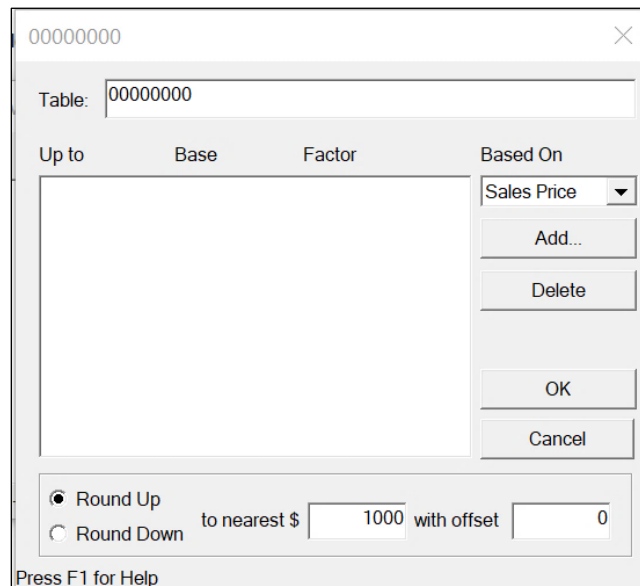

Figure 569: Escrow Purchase Dialog

3. Click the **Add**.

4. Enter a **Table Name** to override the default table name.

**Figure 570: Table Dialog**

**Note:** Tables are numbered automatically when they are created.

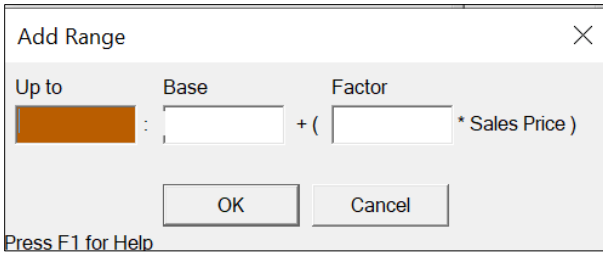

5. Select one of the following fee calculations from the **Based On** dropdown list:
  - **Sales Price:** Fees are calculated based on the property sale price
  - **Loan Amount:** Fees are calculated based on the loan amount
  - **Appraisal Val:** Fees are calculated based on the property appraised value
6. Select the **Round Up** or **Round Down** radio button.
7. Enter a value in the **To nearest \$** field.
8. Enter the offset amount in the **Offset** field o offset the amount by a specific value.

## Add Fee Range

The fees are calculated cumulatively (the base fee from each previous tier is added to the total fees). Subtract the previous tier base fee from the base fee of the tier currently being added to determine the amount to enter in the **Base** field when entering multiple-tiered fees.

**Example:** Enter \$250 in the **Base** field if the base fee for the first tier of a fee structure is \$250 for a sales price of up to \$250,000. Subtract the first-tier base fee (\$250) from the second-tier base fee (\$500) and enter the result (\$250) in the Base field if the second-tier base fee is \$500 for a sales price between \$250,001 and \$500,000.

1. Click **Add** on the *Table* dialog. (See [Figure 570.](#))

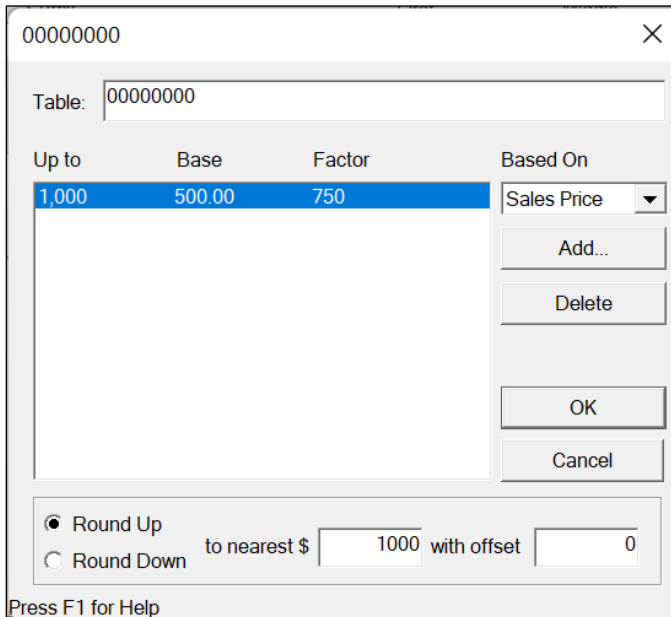

**Figure 571: Add Range Dialog**

2. Enter the maximum tier amount for selected **Based On** option in the **Up to** field.
3. Enter the base fee for the tier in the **Base** field.
4. Enter the fee percentage for the tier in the **Factor** field.

**Note:** The fee percentage must be entered in decimal format.

5. Click **OK** after the fee tier is entered.
6. Repeat Steps 2 – 5 for additional tiers.
7. Click **OK** on the *Table* dialog when the fee tiers are complete.

The completed fee table looks like the following figure based on the example:

**Figure 572: Fee Table**

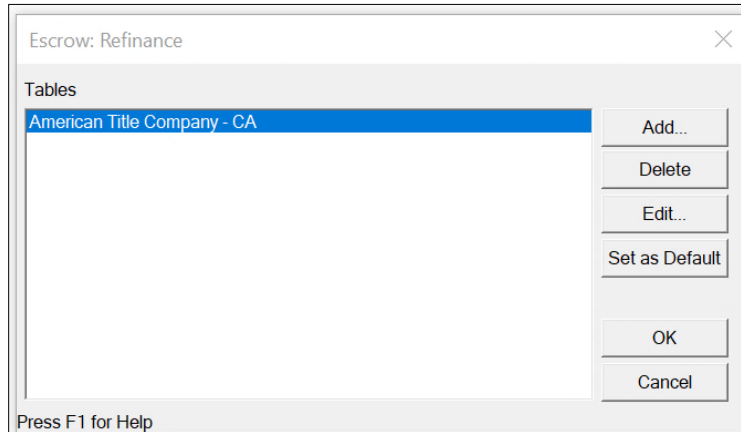

**Note:** The escrow fee value is not calculated when a sales, loan, or appraisal amount not defined in one of the tiers is entered in the loan application.

## Edit Escrow Table

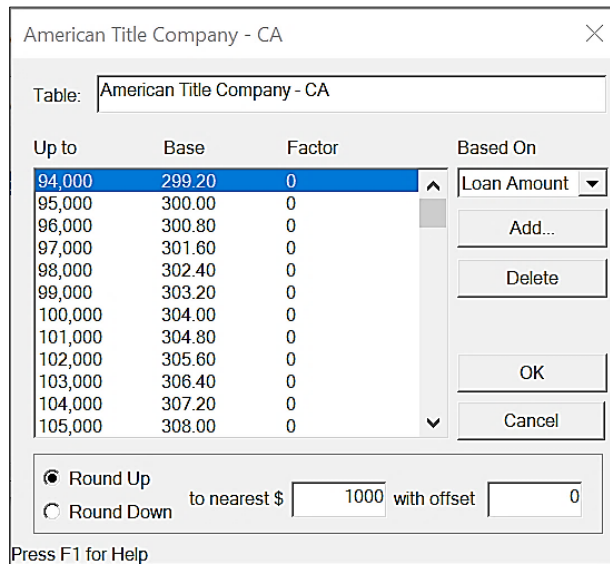

Use the following steps to edit a **Purchase or Refinance Escrow** table.

1. Select Escrow Tables from the Utilities menu.
2. Select **Purchase**.
3. Select the table to edit.

Closing Costs from New First Mortgage	Sum of costs from the first mortgage. The sum in the Closing Cost box equals prepaids, plus closing cost, plus PMI/MIP/Funding Fee, plus Discount, minus Closing Cost paid by Seller and PMI/MI financed.
Loan Amt, excl. fee financed (m)	Second mortgage amount
Loan Amount (o)	The total second mortgage amount (m + n).

6. Open page 2 of the Loan Application and verify the **Proposed Monthly Housing Expenses**, including the **First Mtg, Other Fin, HazIns, Taxes** and **other fee** fields, **match** the values in the first mortgage file.
7. Verify information in the **Cash-to-Close** screen.

## Construction Loans

Three types of construction loans are supported in Point:

- Construction
- Construction-to-permanent
- Construction with Required Reserve

Construction loans do not include a payment schedule on the printed *Truth-in-Lending Disclosure form* based on the terms entered.

The loans state **“Repayment: One payment of principal of [the entire loan amount] on [the end of the amortization period specified]”**.

Refer to **Subpart E (Special Rules for Certain Home Mortgage Transactions)** on the Reg. Z for additional information.

The *Truth-In-Lending Disclosure* reflects the construction loan terms completing the *Loan Application*.

## Create Construction Loan

Complete the *Loan Application* as other loans. The following exceptions apply to all construction loans.

1. Select either the **Construction or Construction – Permanent** checkbox on the *Borrower Information* screen.
2. Complete the following fields for the loan:
  - Sales Price
  - Appr Value
  - Loan Amt
  - Note Rate
  - Term/Due

**Note:** The transaction and the associated fields in the loan file are -processed as a purchase if a value is entered in the **Land** field in the Cash-to-Close screen. The loan is processed as a non-purchase loan if **0** is entered or the field is left empty.

3. Select the **Customize** checkbox on the *Truth-In -Lending Disclosure* to indicate draws in the payment schedule and enter the information there.
4. Click the **Calculate** button again.
5. Open page 1 of the Loan Application and complete the **If Construction Loan** section.
6. Enter the **Estimated Construction Duration**, in months, in the **Period** field.
7. Enter the interest rate and required reserves in the **Int Rate and Req Rsv** fields if the values are known.
8. Complete the Yr Aqd (year acquired), Original Cost, Existing Lien, Lot Value (a), and Impvmts (b) (Improvements) fields.

**Note:** The Total (a+b) is calculated with these figures

9. Select the **Include MI during the Construction Period** checkbox to include mortgage insurance in the construction phase of the payment schedule
10. Select the **Include Escrow during the Construction Period** checkbox to include the calculated escrow amount in the construction phase of the payment schedule
11. Open the *Fees Worksheet* and enter the loan fees.
12. Open the *Truth-In-Lending* screen and complete the **Date Prepared** and the **1st Pmt Date** fields.

13. Click Calculate.

## Construction-to-Permanent Loan

Complete the *Loan Application* as other loans. The following exceptions apply for construction-to-permanent loans

1. Open page 1 of the *Loan Application*.
2. Enter the loan term in months after the construction is complete in the **Term mths** field in the **Type of Mortgage and Terms of Loan** section.

**Example:** Enter 360 for a 30 -year term. Do not include the construction period as part of the term.

3. Select the **Construction-Permanent** checkbox in the **Purpose of Loan** section.
4. Enter the estimated construction duration, in months, in the **Period** field in the **If Construction Loan** section.
5. Enter the amount of the reserve in the **Req Rsv** field if the loan requires a reserve.

**Note:** Leave the field blank if a reserve is not required.

## Construction Loan Required Reserves

Complete the *Loan Application* as other loans. The following exceptions apply for construction loans requiring reserves.

**Note:** Required reserves increase the APR calculation.

1. Open **page 1** of the *Loan Application*.
2. enter the loan term in months after the construction is complete in the **Term mths** field in the **Type of Mortgage and Terms of Loan** section.

**Example:** Enter 360 for a 30 -year term. Do not include the construction period as part of the term.

3. Select the **Construction** checkbox in the **Purpose of Loan** section.
4. Enter the estimated construction duration, in months, in the **Period** field **If Construction Loan** section.
5. Enter the amount of the required reserve in the **Req Rsv** field.

## Investment Loans

Use the following steps to complete a loan for investment property:

1. Create a new borrower fil.

2. Complete the Borrower Information screen as normal with the following exceptions:
3. Select Investment in the Purpose of Loan section.
4. Enter the applicable values for the property in the **Gross Rent** and **Occ Rate** fields.
5. Complete the Sales Price, Loan Amt, Note Rate, and Term/Due fields.
6. Complete the **Appr Value** field if the loan is a refinance and leave the **Sales Price** field blank.

**Note:** The **Net Rent** amount transfers to the **Pos Cash Flow (Subj Property)** field or **Neg Cash Flow (Subj Prop)** in the **Underwriting** section in the *Transmittal Summary (1008)*.

7. Open page 2 of the *Loan Application* and complete the following information in the **Monthly Income and Combined Housing Expense Information** section:

**Note:** The amount in the **Total** field for the **Housing Expenses** represents the **Principal, Interest, Tax and Insurance (PITI)** of the subject property. The amount in the **Net Rent** field equals the **Gross Rent** field times the **Occ Rate** field minus the **PITI**. The **Net Rent** field shows the positive cash flow or negative cash flow for the subject property.

8. Complete the **Gross Monthly Income** section for the borrower and the coborrower but exclude the **Net Rent** field.

**Note:** **Net Rent** is populated from the **Schedule of Real Estate Owned** section on page 3 if net rent is a positive amount.

9. Enter the housing expenses for the borrower owner-occupied residence in the **Present** column in the **Monthly Housing Expenses** section regardless of the loan type.

**Note:** Point calculates the proposed monthly payment

10. Complete the **HazIns**, **Taxes**, and **MtgIns** fields.
11. Open page 3 of the *Loan Application* and complete the following information in the **Liabilities** section:
  - Enter an **M** in the **R/L(I)/M** field to calculate the amount as a negative value
  - Mark that an existing mortgage on the investment property is being paid off if applicable
  - Indicate second homes and land loans as liabilities (**L**)
12. Complete the following information on page 3 of the *Loan Application* in the **Schedule of Real Estate Owned** section:
  - The subject property must be listed first if the loan is for a refinance,
  - Enter an occupancy rate (typically 75%) in the Investment **Property Occupancy Rate** field to automatically calculate the net rent for additional rental properties
13. Select the Subject Property.

14. Click **Edit**.
15. Select the property and enter an **R** in the **S/PS/R** field to indicate the property is a rental.
16. Enter the primary residence and any additional real estate.
17. Leave the **S/PS/R** field blank for these properties.

**Note:** Investment properties are calculated into the ratios by using the amount in the **Net Rent** field in the **Schedule of Real Estate Owned** section on page 3 of the *Loan Application*.

18. Open the *Transmittal Summary (1008)* and verify the following information:
  - The Proposed Monthly Payment column should reflect the borrower primary residence (owner-occupied) regardless of the loan type
  - The amount automatically populates the 1008 from the Present Monthly Housing Expenses section on page 2 of the *Loan Application*
  - The rental income is populated in the Pos Cash Flow (Subj Prop) field if the subject property net rent is positive
  - The negative value populates the **Neg Cash Flow (Subj Prop)** field if the net rent is negative

**Note:** The calculation comes from the fields accessed by clicking the **Investment** button on a *Borrower Information* or *Prospect Information* screen

19. Open the *Transmittal Summary (1008)* in each co-borrower file and click the **Other Obligations Lock** to enable the fields If non-married co-borrowers are sharing the loan.
20. Delete the information in the **Neg Cash Flow (Subj Prop)** field.

**Note:** The **Other Prop** field contains the total negative net rents from the REO section of the Loan Application. The **All Other Pmts** field contains a total of all liabilities, except mortgages, from the **Liabilities** section of the *Loan Application*. The **Total Payments** field contains the total monthly payments, including any negative cash flow on rental properties.

  - **Preserve:** Retain the original file name.
  - **Auto Filename:** Use the automatic file naming convention specified for the selected data folder.
  - **Manual Naming:** Enter a name of choice in the Rename File dialog, which is displayed when copy is clicked.
7. Click **Copy**.
8. Click **OK** in the *PCF Copy Results* dialog.
9. Click **Close**.

## Store Files

Use the following steps to create and save PDF documents of selected forms.

1. Select Store from the File menu.
2. Click the Forms tab on the Borrower Forms dialog. (See Figure 606.)
3. Select the forms to include in the PDF file in the forms list
4. Select Save as PDF File from the Output Option dropdown.
5. Click Save As.
6. Select the password protection option on the Set PDF Password dialog. (See Figure 609.)
7. Navigate to the location to save the file.

8. Enter a file name.
9. Click Save.

## Import From

Point provides data import options from the **File** menu.

## Other App Using Import Template

ASCII data can be imported into new and existing loan files.

Use the following steps to import data using a predefined import template.

An import template with mappings to the fields is required to import the data. See [Template Management](#) for template creation details.

1. Convert the import file to an ASCII delimited file (.txt) before initiating the import.
2. Open or create the loan file to receive the imported data.
5. Select Import From on the File menu.
6. Select **Other App** (using import template).
7. Use the **Choose a Data Import Template To Use** dialog to browse to and open the appropriate import template.
8. Select a template.
9. Click **Open**.
10. Enter the full file name and path in the **File Name** field (or locate and select the file) on the *Specify an Input Data File* dialog.

**Note:** The import is automatically initiated when clicking **Open** if an input data file (the file containing the data to be imported) was specified in the selected template.

11. Click **OK** to import that data.

## Borrower Master File

Apply master file templates to a new loan file during creation or import the master file template into an existing loan file.

See [Template Management](#) for template creation details.

1. Open a new or existing prospect or borrower file.
2. Select **Import From** on the **File** menu.
3. Select Borrower Master File.

4. Use the **Import Data from Borrower Master File** dialog to browse to and open the appropriate import template.
5. Click **OK** to import that data.

## Fannie Mae DO/DU

Only Fannie Mae version 3.0 and 3.2 files (.fnm files) may be imported. A template is not required to convert the files because the field mappings are built into Point.

**Note:** The social security numbers must match when importing Fannie Mae data into an existing prospect or borrower file.

1. Select **Import From** on the **File** menu.
2. Select Fannie Mae DO/DU.
3. Use the *Import 1003 data from Fannie Mae DO/DU* dialog to browse to the file.
4. Select the file.
5. Click Open to initiate the import process.

## Fannie Mae 3.4 MISMO

Importing a Fannie Mae 3.4 file into the Loan Application is possible. Some data components from a Fannie Mae 3.4 file will not import into the New Loan Application due to the introduction of new fields and methods for capturing the information on the 1003 (such as: Employment and Income).

1. Open a New blank loan.

**Figure 611: Fannie 3.4 MISMO**

2. Select **Import From** on the **File** menu.
3. Select **Fannie Mae 3.4 MISMO**.

4. Browse to the **Fannie Mae 3.4** XML file.
5. Complete the **import**.
6. Re-enter the information into the following screens:
  - *Borrower Information* screen: **Monthly Housing Expenses** fields
  - *Loan Application Section 1* screen: **Citizenship, Employment**, and **Income** fields
  - *Loan Application Section 2 -3* screen: **Assets, Liabilities**, and **Owned Properties** fields
  - *Lender Loan Information Pg 2* screen: **Closing Costs** and **Credits** fields

**Note:** Use the following link for additional information:

<https://customers.calyxsoftware.com/aspx/HomeCustomer>

## Export To

Point provides some data export options from the **File** menu, including:

[Other App Using Export Template](#)

[Fannie Mae 3.0 DO/DU](#)

[Fannie Mae 3.2 DO/DU](#)

[Fannie Mae 3.4 MISMO](#)

[Uniform Loan Data Delivery](#)

## Other App Using Export Template

An Export Template is required to complete the following steps. (See [Template Management](#) for template details.)

1. Open the prospect, borrower, or co-borrower file containing the information to export.
2. Select **Export to** from the **File** menu.
3. Select Other App (Using Export Template).
4. Use the *Choose a Data Export Template* dialog to browse to the template folder.
5. Select the appropriate template.
6. Click **Open**.
7. Enter the full file name and path or locate the file in the *Output Data File* dialog.

**Note:** The export automatically initiates when clicking **Open** if an output data file was setup in the selected template.

8. Click **Save** to initiate the export process.

## Fannie Mae 3.0 DO/DU

Use the Fannie Mae 3.0 DO/DU option to export Classic Loans in the Fannie Mae 3.0 file format.

**Note:** See [Fannie Mae 3.4 MISMO](#) for exporting loan in the New Format.

1. Verify the *Classic Loan Application* is complete.
2. Verify the *Fannie Mae Addendum* screen is complete.
3. Verify the *Fannie Mae Government* screen is complete. ([Fannie Mae Government](#).)
4. Select **Export To** from the **File** menu.
5. Select Fannie Mae 3.0 DO/DU.
6. Use the *Export 1003 Data to Fannie Mae DO/DU* dialog to browse to the file location.
7. Click **Save**.

## Fannie Mae 3.2 DO/DU

Use the Fannie Mae 3.2 DO/DU option to export Classic Loans in the Fannie Mae 3.2 file format.

Use the steps in [Fannie Mae 3.2 DO/DU](#) to export the file selecting **Fannie Mae 3.2 DO/DU Export To** option.

## Fannie Mae 3.4 MISMO

Use the Fannie Mae 3.4 MISMO option to export New Loan types in the Fannie Mae 3.4 MISMO format.

1. Verify the *New Loan Application* is complete.
2. Verify the *Fannie Mae Addendum* screen is complete. (See [Fannie Mae Addendum](#).)
3. Verify the *Fannie Mae Government* screen is complete. (See [Fannie Mae Government](#).)
4. Select **Export To** from the **File** menu.
5. Select Fannie Mae 3.4 MISMO.
6. Use the *Export 1003 Data to Fannie Mae 3.4 MISMO* dialog to browse to the file location.
7. Click **Save**.

## Uniform Loan Data Delivery

The Uniform Loan Delivery Dataset (ULDD) is a data format governing loan data delivery. ULDD improve loan quality referred to as the Uniform Mortgage Data Program (UMDP). Fannie Mae and Freddie Mac require the ULDD for single-family loan deliveries.

Point is set up to create the ULDD files required by Fannie Mae and Freddie Mac. Point also creates a combined ULDD file that is accepted by both Fannie Mae and Freddie Mac. Use the following steps to export to Fannie Mae or Freddie Mac ULDD files.

1. Select **Export To** from the **File** menu.
2. Select one of the following:
  - Fannie Mae ULDD
  - Freddie Mac ULDD
  - Combined ULDD
3. Use the *Save As* dialog to browse to the location to store the ULDD file.
4. Name the file.
5. Click **Save**.

**Note:** Use the **Uniform Loan Delivery Dataset** file to the Fannie Mae or Freddie Mac when required.

## Rebuild List

Use the following steps to rebuild the index after changes.

**Note:** Loan files must be closed for the option to be available.

1. Select **Rebuild List** from the **File** menu.
2. Select the **Data Folder** in which the list is stored.

**Figure 612: Rebuild List**

3. Select the **Loan List(s)** to include in the rebuild.
4. Select the **Tasks** checkbox to include tasks in the rebuild.

5. Click **Start**.

## Change Name

Use the **Change Name** option to change the logged in user name without losing the associated loan files.

**Note:** Loan files must be closed for the option to be available.

1. Select **Change Name** from the **File** menu.
2. Enter the user **First** and **Last Name**.

Figure 613: Set Name Dialog

3. Click **OK**.
4. Restart Point if required.

## Login

Use the Login option to log into Point if applicable.

1. Select **Login** from the **File** menu.
2. Enter user credentials to log in.

## Change Password

Use the **Change Password** option to change the user password when company security requires passwords to access Point.

1. Select **Change Password** from the **File** menu.
2. Follow the prompts to change the user password.
3. Restart Point if required.

## Chapter 17: DATA MANAGEMENT

Use the Point Administrator tool to manage the following:

- Create data folders
- Copy data folders
- Establish data folder access rights for users
- Change the directory where templates are stored
- PointCentral settings

### Access Point Administrator

Use the following steps to access the Point Administrator

1. Close Point.
2. Select the Windows **Start** menu.
3. Select All Programs.
4. Select Point Administrator.

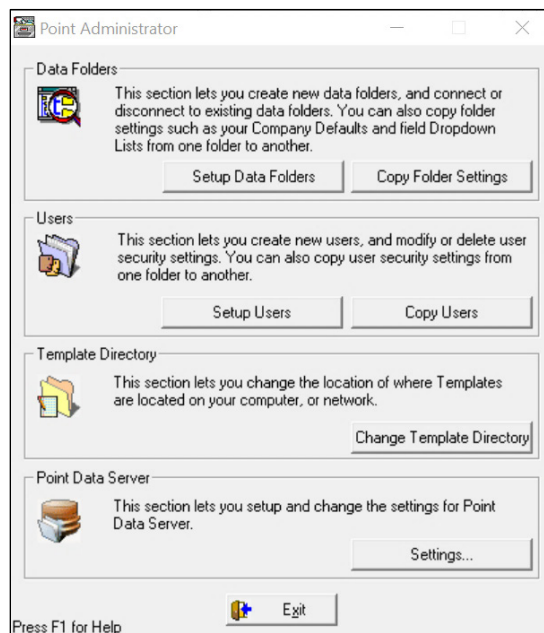

Figure 614: Point Administrator Dialog

### Manage Data Folders

Use the **Data Folder** function for the following:

- Create new data folders
- Connect existing data folders
- Disconnect existing data folders
- Manage folder owners
- Modify folder properties
- Change the order in which the folders are listed in the dropdown lists

**Note:** Do not store more than 1500 files in a single data folder. Storing more files causes slower performance during searches.

## Setup Data Folders

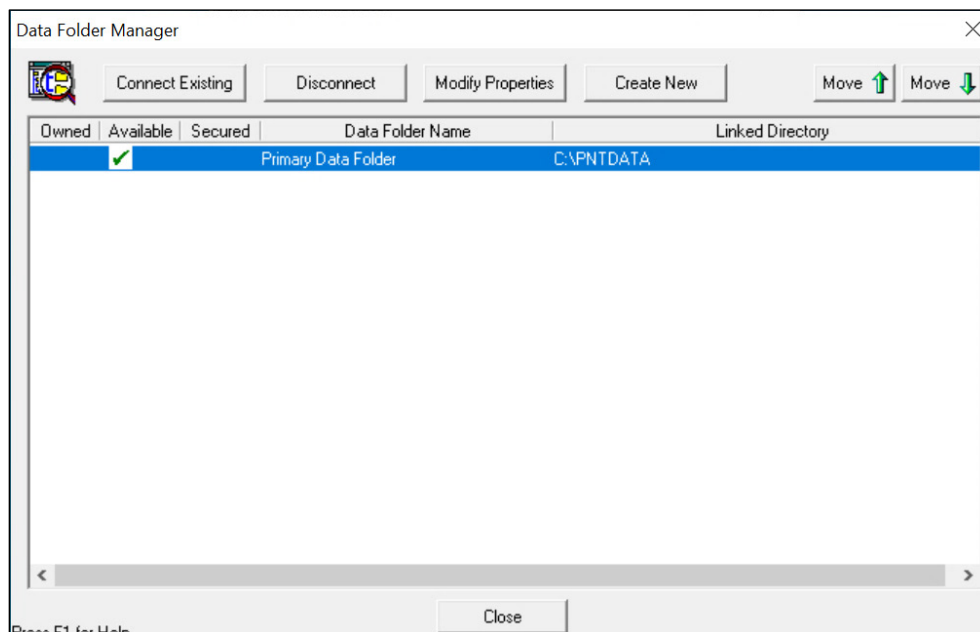

The following sections discuss setting up the Point Data folders.

### Set Primary Data Ownership

Set initial ownership of the **Primary Data** folder to ensure more data security and file control. Click **Setup Data Folders** on the Point Administrator dialog.

**Note:** The **Owned** column in the *Data Folder Manager* dialog displays a check mark if a data folder has an owner.

1. Select the Primary Data Folder.

**Figure 615: Data Folder Manager Dialog**

2. Click Modify Properties.
3. Enter the **Password** on the *Folder Supervisor Login* dialog.

4. Click **OK**.
5. Re-enter the password in the *Password Verification* dialog.
6. Click **Close**.

## Create New Data Folder

Create new data folders to manage the loan files and organize your workflow.

1. Open the *Data Folder Manager* dialog. (See [Figure 615.](#))
2. Click Create New.
3. Enter the **Supervisor** password in the **Password** field on the *Verify Password* prompt.
4. Click **OK**.
5. Re-enter the password if prompted.
6. Enter the Directory Name in the Field 1.

**Figure 616: Create New Data Folder Dialog**

**Note:** Use the **Browse** button to browse to the folder storage location.

7. Enter Folder Name in Field 2.
8. Select a folder from the **Copy From** dropdown to copy the folder settings.
9. Select the **Include User Security Settings** checkbox to include the security settings.
10. Click **Create**.
11. Proceed to Modify Data Folder Properties to set up the folder properties.

## Modify Data Folder Properties

Use the following steps to modify data folder properties.

1. Select the data folder to modify from the *Data Folder Manager* dialog. (See [Figure 615.](#))
2. Click Modify Properties.
3. Enter a **Data Folder Name** if applicable.

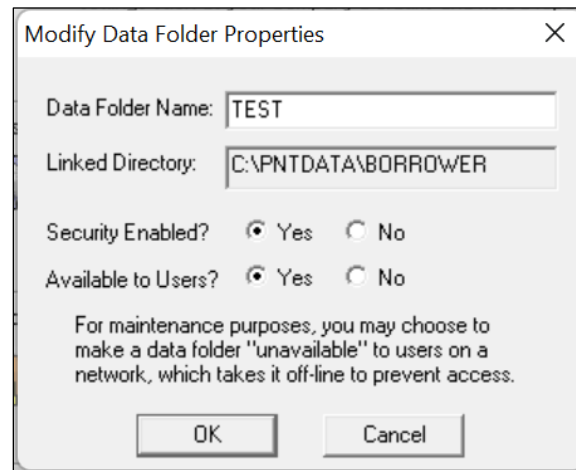

Figure 617: Modify Data Folder Properties

**Note:** Do not change the **Data Folder Name** if data has already been saved to the folder.

4. Select the **Security Enabled Yes** radio button to require a user password to modify folder contents.
5. Select the **Available to User Yes** radio button to make the available to users on the network.
6. Click **OK**.

## Connect Existing Data Folders

Use the following steps to connect an external data folder to the Point data folder.

1. Access the *Data Folder Manager* dialog. (See [Figure 615.](#))
2. Click Connect Existing.

3. Click **Browse** to navigate to the folder to connect.

**Figure 618: Connect to Existing Folder Dialog**

4. Click **OK** to add the data folder to the *Data Folder Manager* dialog.

## Disconnect Data Folders

Use the following steps to remove a data folder from Point. Disconnection from Point does not delete the folder from the original location.

1. Access the *Data Folder Manager* dialog. (See [Figure 615](#).)
2. Select the data folder to disconnect.
3. Click Disconnect.
4. Click **Yes** on the *Disconnect Confirmation* dialog.

## Reorder Data Folders

It is possible to arrange the order of folders in the data folder dropdown lists by changing the order in the *Data Folder Manager*.

1. Access the *Data Folder Manager* dialog. (See [Figure 614](#).)
2. Select a data folder.
3. Use the Move arrows to reposition the folder in the list.

## Copy Folder Settings

Use the following steps to copy folder settings between data folders.

1. Access the *Point Administrator* dialog. (See [Figure 614](#).)
2. Click Copy Folder Settings.

3. Select the folder to copy **From**.

**Figure 619: Copy Data Folder Settings**

4. Select the folder to copy **To**.
5. Click **Copy**.

## Manage Users

Use the following sections to set up and manage data folder users. The user name must match exactly as it was created in the Processor or Originator dropdown list using the dropdown list utility.

### Add Users

Use the following steps to add new data folder users.

1. Access the *Point Administrator* dialog. (See [Figure 614](#).)
2. Click Setup Users.

3. Click **New User**.

Figure 620: User Manager Dialog

4. Enter the user **Full Name** on the *Modify User Properties* dialog.

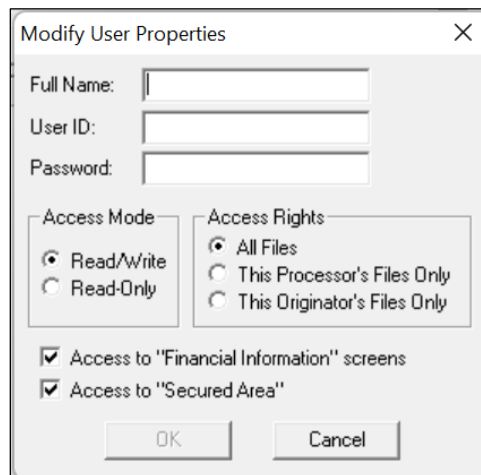

Figure 621: Modify User Properties Dialog

5. Enter **User ID**.
6. Enter user **Password**.
7. Select the appropriate **Access Mode** radio button.
8. Select the appropriate **Access Rights** radio button.
9. Select the **Access to Financial Information Screens** checkbox to enable access to financial screens.

10. Select the **Access to Secured Area** checkbox to enable access to Point secured folders. (See [Table 17: Point Secure Areas](#) for the Point secure areas.)
11. Click **OK** to add the user to the *User Manager* dialog.
12. Proceed to

## Modify Users

Use following steps to modify data folder user access.

1. Access the *User Manager* dialog. (See [Figure 620](#).)
2. Select the user to modify.
3. Click **Modify User**.
4. Make appropriate changes on the *Modify User Properties* dialog.
5. Click **OK**.

## Delete Users

Use the following steps to delete a data folder user from Point.

1. Access the *User Manager* dialog. (See [Figure 620](#).)
2. Select the user to delete.
3. Click **Delete**.
4. Click **OK**.

**Table 17: Point Secure Areas**

Secure access is required to move, copy, and delete loan files.	
Secure access is required to delete or print the conversation log entries.	
Secure access is required to edit <i>Credit Score</i> fields.	

## Copy User Settings

Copy user settings from folder to folder to prevent repeating the setup process for each folder a user can access.

1. Access the *Point Administrator* dialog. (See [Figure 614](#).)
2. Click Copy Users.
3. Enter the **Supervisor** password if prompted.
4. Select the **Data Folder** to copy the settings **From**.

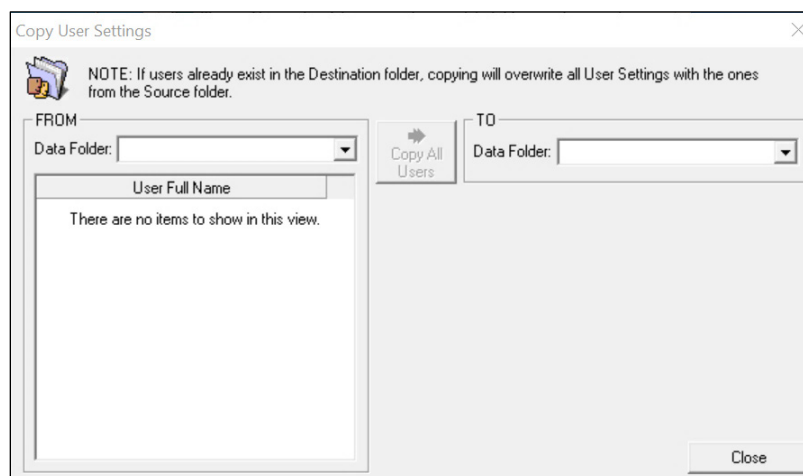

Figure 622: Copy User Settings Dialog

5. Select the **Data Folder** to copy the setting **To**.
6. Click **Copy All Users** to copy all users.
7. Click **Yes** to confirm the copy in the *Copy User Settings Confirmation* dialog.

**Outcome:** The *Copy User Settings* dialog is displayed with a message the users were copied successfully and click Close.

## Modify Data Folder Users

You can modify a user's ID password, and access rights at any time.

1. Access the *User Manager* dialog. (See [Figure 620](#).)

2. Click Setup Users.
3. Enter **Password** on the Folder Supervisor Login dialog.
4. Click **OK**.
5. Click the **User** to modify.
6. Click Modify User.
7. Make the necessary changes and click **OK**.

## Remove Data Folder Access

Use the following steps to remove user access to a data folder.

1. Access the *User Manager* dialog. (See [Figure 620](#).)
2. Select the data folder.
3. Select the user to modify.
4. Click Delete User.
5. Click **Yes** on the Delete User Confirmation.

## Change Template Location

The default template directory is c:\PNTTEMPL. Use the following steps to change the template directory.

1. Access the *Point Administrator* dialog. (See [Figure 614](#).)
2. Click Change Template Directory.
3. Click **Browse** to navigate to the new template location.
4. Click **OK**.

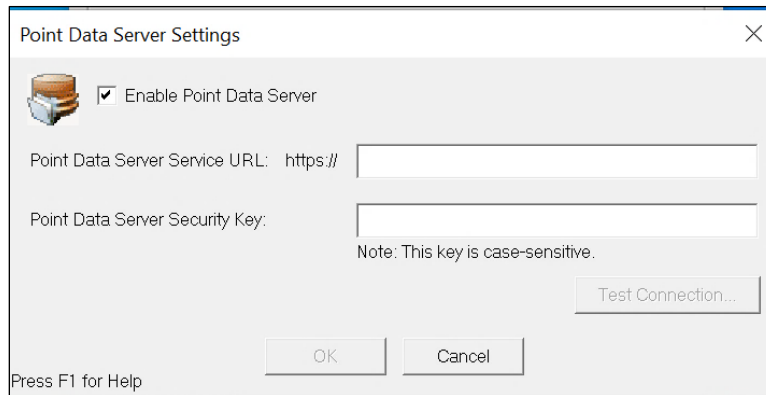

## Point Data Server

PointCentral is the centralized data server that provides access to organization loan files, templates, reports, and Cardex. The Point files are accessible from any location. Generate management reports that include information from different offices and provide a consolidated view of the entire organization loan pipeline.

## Configure Client Connection

Use the Point Data Server Settings dialog to configure the client to connect to the PointCentral server.

1. Access the *Point Administrator* dialog. (See [Figure 614](#).)
2. Click **Settings**.
3. Select the **Enable Point Data Server** checkbox.

**Figure 623: Point Data Server Settings**

4. Enter the PointCentral URL.
5. Enter the PointCentral Security Key.
6. Click **Test Connection** to verify the parameters are correct and network connectivity to the PointCentral server is functioning.
7. Click **OK** to save the configuration.

## Combined Field IDs

Point includes the most common fields in the Field Name dropdown on the *Reports Template* screen. The **Field ID** column is automatically populated with the field ID when the field name is selected. Enter the field name and ID manually when not available from the dropdown.

Individual user controls, such as checkboxes and radio buttons, are each assigned unique field IDs. Field IDs for groups of controls are established running macros that extract the selected option and insert it into the report.

Field IDs with macros were also created to extract information from a single screen containing multiple fields for the same information.

To include this type of data in the report, you must use the ID assigned to that group of fields or controls rather than the unique ID for the selected field or option.

## Data Import

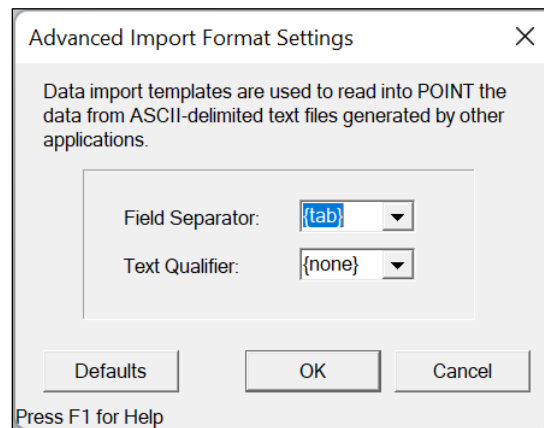

### Text Files Batch Import

Use batch importing to import multiple files from a single txt file. The loan files must be contained in a single ASCII delimited text file before import.

The **Auto File Naming Utility** must be enabled to import batch files. (See [Auto File Naming](#) for details.)

An import template is required to import txt files. (See [Template Management](#) for details.)

1. Click the **Templates** tab. (See [Figure 13](#).)
2. Select the **Data Import** radio button.
3. Select the import template to use.
4. Click **Open**.
5. Select <custom ASCII format> from the Import Format dropdown.
6. Click the Advanced button to open the Advanced Import Format Settings dialog.

**Figure 624: Advanced Import Format Settings**

7. Select the Field Separator:
  - **Tab:** Uses a tab as the field delimiter
  - **Comma** Uses a comma as the field delimiter
8. Select the **Text Qualifier** to indicate the text contained within the qualifier characters is imported as one value:
  - **None:** No text qualifier is used
  - **Double quotation mark:** Uses double quotation marks as the text qualifier (Text contained within double quotation marks is considered one value)

- **(single quotation mark):** Uses single quotation marks as the text qualifier (Text contained within single quotation marks is considered one value)
9. Select the **Field Name Header in First Row** checkbox if the file to be imported has column headers in the first row.
  10. Select the **Update Existing Files** checkbox to overwrite any existing files with the same name.
  11. Click Batch Import.

**Note:** The *Batch Data Import* dialog is displayed if the **Update Existing Files** checkbox is not selected.

12. Select Prospect or Borrower.
13. Click **OK**.
14. Navigate to the directory containing the txt file to import or enter the file name In the *Specify an Input Data File* dialog.
15. Click **Open** to initiate the import process.

## Import Multiple Fannie Mae Files

Use batch import to import multiple Fannie Mae files, including Fannie Mae .

The **Auto File Naming Utility** must be enabled to import batch files. (See [Auto File Naming](#) for details.)

1. Click the **Templates** tab. (See [Figure 13](#).)
2. Select **Data Import**.
3. Select the import template to use.
4. Click **Open**.
5. Select the appropriate **Fannie Mae file format** from the **Import Format** dropdown.
6. Click **Batch Import**.

**Note:** Fannie Mae 3.4 MISMO XML files can be batch imported into Point.

7. Click on the **Browse** button.
8. Navigate to the directory containing the files to import.
9. Enter the file name to import.

**Note:** Use an asterisk (\*) as a wild card and the file extension (\*.fnm) to import all files in that directory with the fnm extension.

10. Select the **Loan Type**.
11. Click **Start Import** to import the files.

## Import Fannie Mae 3.2 File

The Fannie Mae 3.2 file captures data components from the *Classic Loan Application (1003)*. The *New Loan Application* mandated for March 1, 2021 introduces new fields and methods that do not exist in Fannie Mae 3.2 classic files.

Importing a Fannie Mae 3.2 file into the New Loan Application is possible. Some data components from a Fannie Mae 3.2 file do not import into the *New Loan Application* due to the introduction of new fields and methods for capturing the information on the 1003 (such as: Employment and Income).

Use the following steps to import the Fannie Mae 3.2 file to a *New Loan Application*.

1. Select the **Loan** tab.
2. Click **New**.
3. Select the **New** radio button on the *Create New Loan File* dialog. (See [Figure 17](#).)
4. Select **Import From** on the **File** menu.
5. Select Fannie Mae DO/DU.
6. Browse to the **Fannie Mae 3.2** file.
7. Complete the import.
8. Update the following information when the import is complete:
  - *Borrower Information Screen*: **Monthly Housing Expenses** information
  - *Loan Application Section 1*: **Citizenship, Employment, and Income** information
  - *Loan Application Section 2 – 3*: **Assets, Liabilities, and Owned Properties** information
  - *Lender Loan Information Pg 2*: Closing Costs and Credits (such as: cash deposit on sales contract)

Use the following link for additional information:

## Chapter 18: PIPELINE MANAGEMENT

The pipeline provides a view of the latest status of active loans in a single screen.

The pipeline setup is either Automated or Manual. The *Pipeline* screen is updated by clicking the **Refresh** button.

### Pipeline Descriptions

#### Automated

The **Pipeline** includes the loans with the most recent loan status that match the defined the criteria. Loans are automatically added to the Pipeline after meeting the defined criteria.

#### Manual

Manual setup includes selecting the loans to include in the **Pipeline**.

### Pipeline Change

The following sections provide information for what occurs when the pipeline status changes.

#### Manual to Automated

- Pipeline displays only the loans that meet the automated selection criteria.
- Loans in the Manual pipeline are preserved, but not displayed in the automated pipeline.
- Manual pipeline loans are visible again when **Manual** is selected from the *Pipeline Setup* dialog.

#### Automated to Manual

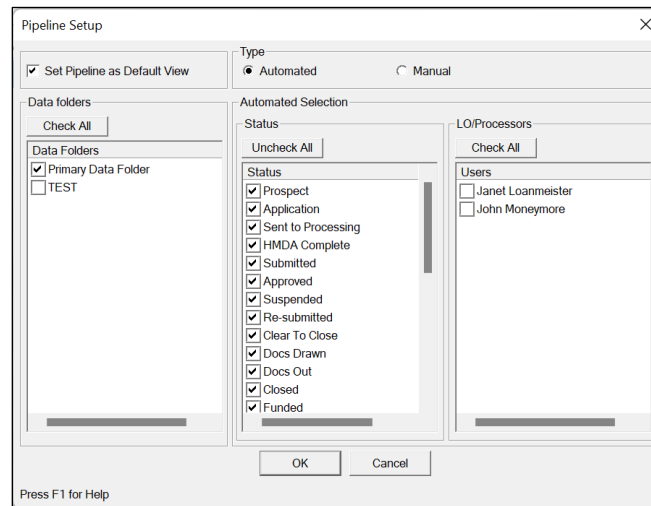

- loans in the Automated pipeline are removed from the pipeline.
- Loans with the specified criteria are displayed in the pipeline after switching back to automated.
- The loans in the previous Manual pipeline are displayed.

## Pipeline Setup

The following sections provide details for setting up pipelines.

### Automated Pipeline Setup

1. Select the **Pipeline** tab. (See [Figure 10](#))
2. Click **Pipeline Setup**.

**Figure 625: Pipeline Setup**

3. Select the **Set Pipeline as Default View** checkbox to set the **Pipeline** view as the default view.

**Note:** Default views opens the **Pipeline** tab when Point is launched.

4. Select the **Automated** radio button.
5. Select the **Data Folders** containing the loan files to include in the pipeline.

**Note:** Local folders are not displayed for PointCentral users.

6. Select the **Statuses** to include the pipeline.
7. Select **Other Status** to include all loans with a custom status set in the *Track Status* screen.
8. Select **Loan Originator/Processors** to provide pipeline access.
9. Click **OK**.

### Manual Pipeline Setup

1. Select the **Pipeline** tab. (See [Figure 10](#).)

2. Click **Pipeline Setup**. (See [Figure 625](#).)
3. Select the **Set Pipeline as Default View** checkbox to set the **Pipeline** view as the default view.
4. Select the **Manual** radio button.
5. Click **OK** on the *Proceed with caution to rebuild the index* dialog to acknowledge the message if the dialog opens.

**Note:** Rebuilding the index prevents Point users who have not updated to version 8.0 (or later) from accessing the data folders indexed.

6. Click the **Loans** tab.
7. Perform a search to locate the loan files to include in the pipeline.
8. Select the files to add to the pipeline.
9. Click Add to Pipeline.
10. Click **YES** in the *Add to Pipeline* dialog.
11. Click **OK** to close the confirmation dialog.
12. Select the **Pipeline** tab to view the loans in the pipeline.

## Remove Loans from Pipeline

Only loans in a manually created pipeline can be removed.

1. Select the **Pipeline** tab. (See [Figure 10](#).)
2. Select the files to remove from the pipeline.
3. Click Remove from Pipeline.
4. Click **Yes** on the *Remove from Pipeline* dialog to confirm the removal.

## Chapter 19: TASK MANAGEMENT

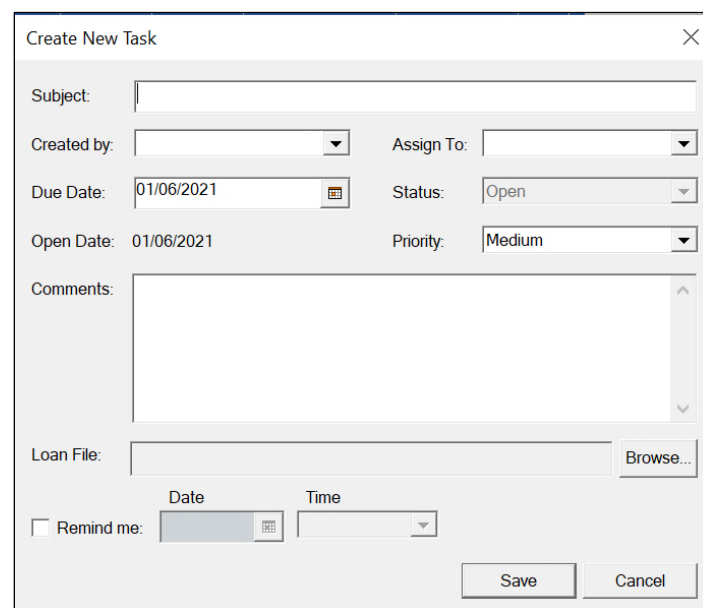

The Task Manager is accessible from the **Tasks** tab in the **Navigation** panel. Use tasks to document actions required to process loans. A permanent record of the task is kept with the loan file.

### Create Tasks

Tasks are created from the **Tasks** tab or while in a loan file. Both methods require association to a loan file.

Use the following steps to create tasks.

1. Select the **Tasks** tab. (See [Figure 11.](#))
2. Click **New** to access the *Create New Task* dialog.

The 'Create New Task' dialog box contains the following fields and controls:

- Subject:** A text input field.
- Created by:** A dropdown menu.
- Assign To:** A dropdown menu.
- Due Date:** A date picker showing 01/06/2021.
- Status:** A dropdown menu showing Open.
- Open Date:** A text input field showing 01/06/2021.
- Priority:** A dropdown menu showing Medium.
- Comments:** A large text area for notes.
- Loan File:** A text input field with a 'Browse...' button.
- Remind me:** A checkbox.
- Date:** A date picker.
- Time:** A time picker.
- Buttons:** 'Save' and 'Cancel' buttons at the bottom right.

Figure 626: Create New Task Dialog

**Note:** Access the *Create New Task* dialog from an open loan file by clicking the **New Task** icon or selecting **Show Tasks** from the **Utilities** menu and clicking the **New** button.

3. Enter a brief task description (60 characters or less) in the **Subject** field.
4. Select Created by.
5. Select the person responsible for completing the task from the **Assign To** dropdown.

**Note:** The **Created by** and **Assign To** fields automatically populate from the originator and processor lists established in the dropdown list utility in an unsecured environment.

6. Select the task **Due Date**.
7. Select the Task Priority.
8. Enter **Comments** if applicable.
9. Click **Browse** to locate the loan file to associate with the task.

**Note:** Skip Step 9 when creating the task from an open loan file.

10. Select the **Remind Me** options to enter reminder criteria.
11. Click to **Save** the task.

## Task Reminders

The *Reminders* dialog displays as a task reminder according to the **Remind Me** options set during task creation.

The *Reminders* dialog remains open until all reminders are dismissed.

**Figure 627: Manage Task Reminders**

The following options are available for managing tasks:

- **Dismiss:** Removes the selected reminder from the dialog and clears the reminder from the *Task Details* dialog for the selected task. The *Reminders* dialog closes after dismissing the last reminder.
- **Dismiss All:** Closes the *Reminders* dialog and clears the reminders from the *Task Details* dialog for all tasks in *Reminders* dialog.
- **Open Task:** Opens the *Task Details* dialog. Edit the reminder or any task data as needed. Click **Close** to return to the *Reminders* dialog.
- **Open Loan:** Opens the loan associated with the selected task.

## Search Tasks

Use the **Search** function to locate tasks.

## Basic Search

A basic task search locates open or overdue tasks in the selected data folder or all data folders.

1. Select the **Tasks** tab. (See [Figure 11.](#))
2. Select the appropriate **Search For** from the dropdown.

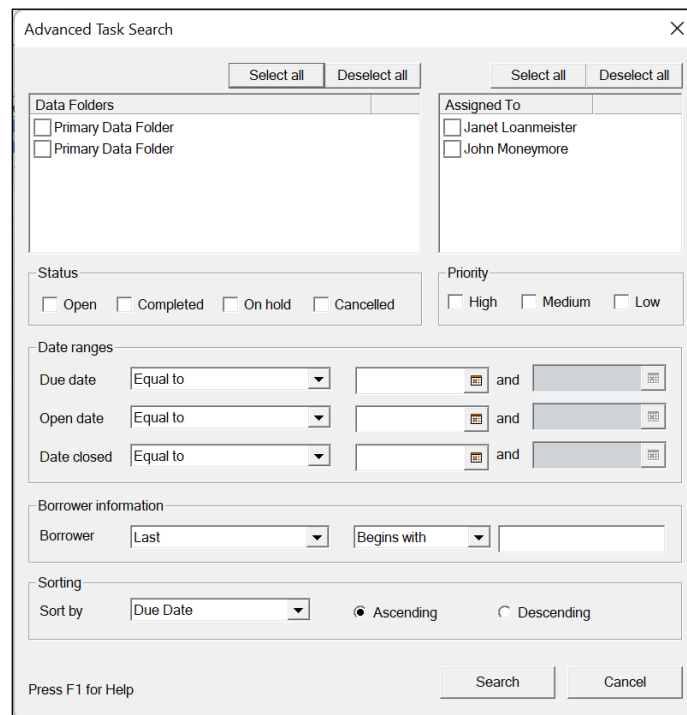

**Note:** The current folder is determined by the folder selected in the **Data Folder** dropdown on the **Loans** tab. Change the **Loans** tab selection in the **Data Folder** dropdown.

3. Select All Folders or Current Folder from the in-dropdown list and click Search.

## Advanced Search

Use the **Advanced Search** function to define more specific search criteria to further refine the search.

## HMDA Reports

HMDA requires lending institutions to report public loan data for monitoring purposes.

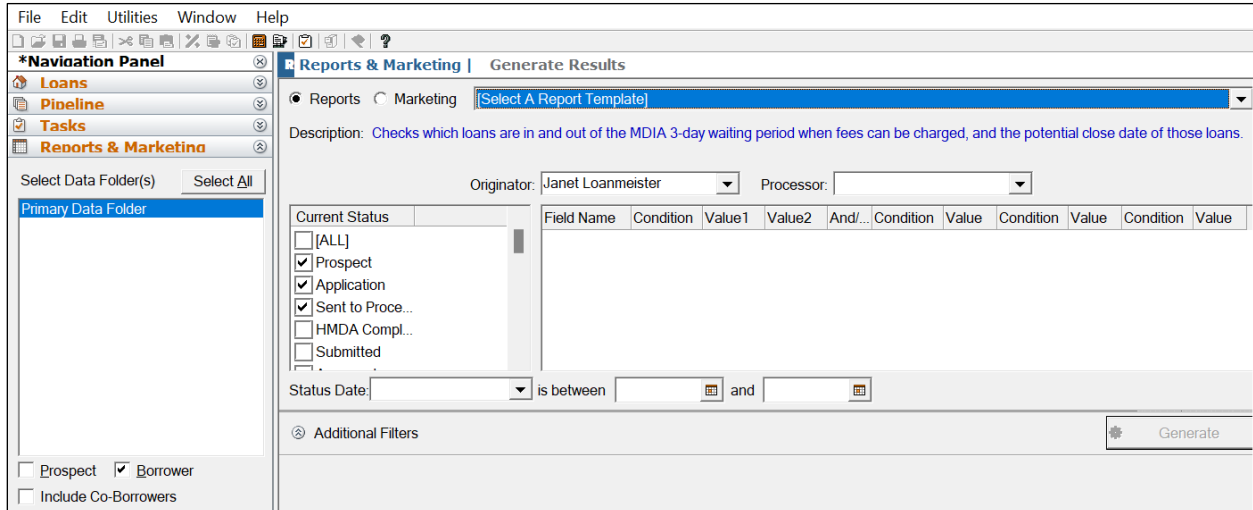

The 2017 and 2018 screens are not running archives of loan data for each year. The 2017 tracking option reflects the CFPB's 48 data points for 2017. The 2018 tracking option reflects the updated 110 data point for 2018. Generate a report to view current and previous year HMDA data.

The HMDA Reporting (2018) screen is available from the Tracking menu in every prospect and borrower file. This screen contains most of the information the CFPB requires for HMDA reporting.

The report can be generated after the HMDA Reporting (2018) screen is completed.

**Note:** The maximum number of characters allowed in a file name is 25. Point truncates any file names exceeding the limit.

1. Select the Reports & Marketing tab.

## Chapter 21: MARKETING MANAGEMENT

Use Marketing tools for the following:

- Store information about prospects and borrower.
- Customize marketing documents.
- Produce custom documents to assist prospects and borrowers in making mortgage decisions.

### Standard Marketing Documents

The Marketing documents feature are like Report features. Use the predefined templates included in Point to send form letters and emails and print labels.

**Table 21: Predefined Marketing Templates**

Document	Description
Address Labels (Property Address)	Generates address labels for the property address
ARM Refinance Notification Email	Generates emails to inform homeowners that new loan programs are available to save money
ARM Refinance Notification Letter	Generates letters to inform homeowners that new loan programs are available to save money
Borrower Address Labels (Mailing Address)	Generates address labels for borrower mailing addresses
Borrower Interests	Generates a list of borrowers interested in specific activities
Co-Borrower Address Labels (Mailing Address)	Generates address labels for the co-borrower mailing addresses
Post-Closing Letter	Generates follow-up letters to send after a loan is closed

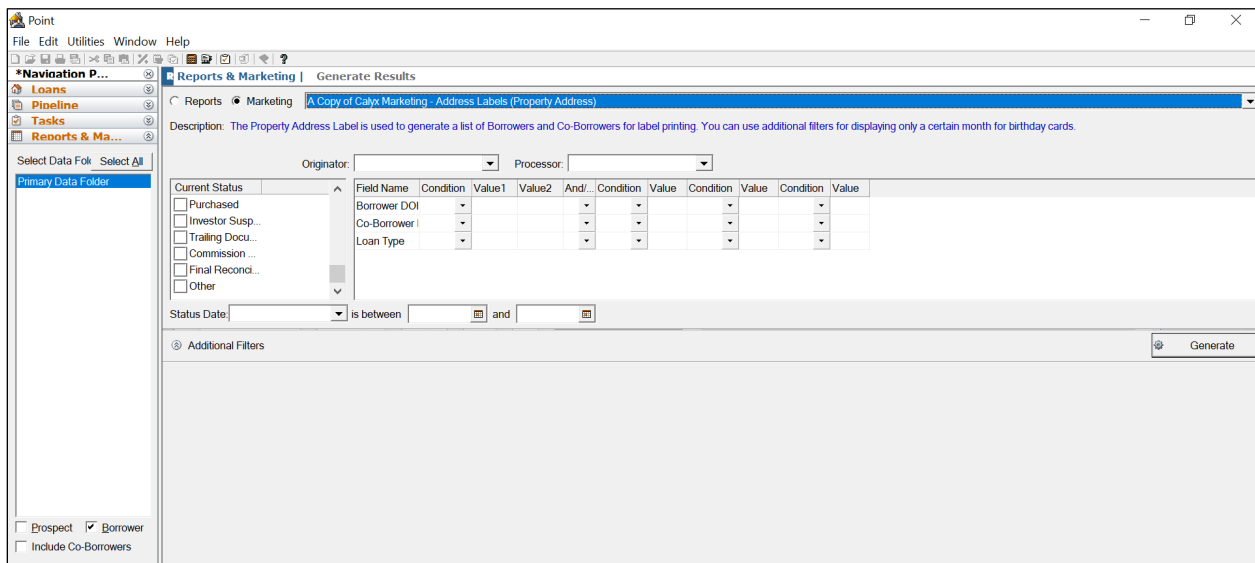

## Address Labels

Use the standard mailing label templates to generate mailing labels for a select group of clients or prospects. The labels output to a PDF document formatted for the size selected.

## Generate Labels

Use the following steps to generate address labels.

1. Click the Reports & Marketing tab.
2. Select the appropriate **Data Folders**.

The screenshot shows the 'Point' software interface. The 'Reports & Marketing' tab is active, displaying a 'Generate Results' window for 'A Copy of Calyx Marketing - Address Labels (Property Address)'. The window includes a description: 'The Property Address Label is used to generate a list of Borrowers and Co-Borrowers for label printing. You can use additional filters for displaying only a certain month for birthday cards.' Below the description is a table for field selection with columns: Field Name, Condition, Value1, Value2, And..., Condition, Value, Condition, Value, Condition, Value. The table lists fields like Current Status, Borrower DOI, Co-Borrower, and Loan Type. There are also checkboxes for 'Purchased', 'Investor Susp...', 'Trailing Docu...', 'Commission...', 'Final Recond...', and 'Other'. A 'Status Date' dropdown is set to 'is between' with date range inputs. An 'Additional Filters' section is at the bottom with a 'Generate' button. The sidebar on the left has options for 'Select Data Folders' and 'Select All', with 'Primary Data Folder' selected. At the bottom left, there are checkboxes for 'Prospect', 'Borrower' (checked), and 'Include Co-Borrowers'.

## Customize Marketing Documents

The following forms on the **Marketing** menu can be customized to include company-specific information using the buttons provided on the screen.

- Amortization Schedule
- Cash-to-Close
- Loan Comparison
- Rent vs. Own
- Prequalification

**Note:** The *Company Information* dialog must be completed o include the company information on a printed form. (See [Company Information](#) for dialog details.)

## Chapter 22: TEMPLATE MANAGEMENT

Use templates in Point to create boilerplate loan files and loan information to reuse multiple times.

The following types of templates can be created:

- Reports & Marketing
- Loan program
- Closing cost scenarios
- Prospect and borrower files
- Importing and exporting data
- Forms, letters, and emails

See [Reports Management](#) for custom reports.

See [Marketing Management](#) for customer marketing document.

**Note:** Do not change the file extension of templates. File names cannot contain any of the following characters: \ / : \* ? " < > .

### Loan Program Templates

PointCentral users with Calyx Pricer enabled cannot use loan program templates. Click the **Loan Program** button to directly access to Calyx Pricer without populating a loan program template.

Use loan programs templates to populate detailed loan information on the following screens:

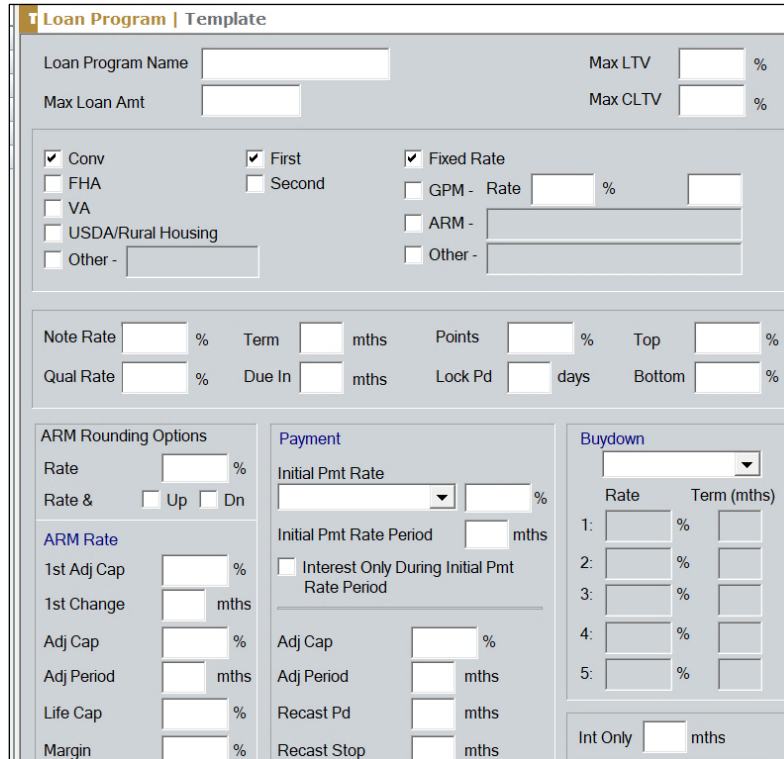

- Amortization
- Debt Consolidation
- CA MLDS, Non-Traditional
- Fees Worksheet
- Loan Comparison
- Prequalification
- Prospect Information/Borrower Information
- Truth-in-Lending

Populate screens with a loan program template by clicking the **Loan Prog/Loan Prg** button and selecting a loan program from the list of templates.

1. **Templates** tab. (See [Figure 13](#).)
2. Select **Loan Program** radio button. See [Figure 647](#).)
3. Select the appropriate loan program template.
4. Click **New**.

5. Name the template in the **Loan Program Name** field.

**Note:** The name displays in the **List of Loan Programs**.

**Figure 651: Loan Program Template**

6. Complete the applicable fields.
7. Select **Save** from the **File** menu when complete.
8. Close the template.

## Closing Cost Scenario Templates

Closing costs are calculated on the *Fees Worksheet*. Use a closing cost scenario template to avoid repeat data entry for regular loan costs. Closing cost scenario templates are useful for marketing loans to prospects.

Access the templates by clicking the **CC Scen/CC Scenario** buttons after creating the templates.

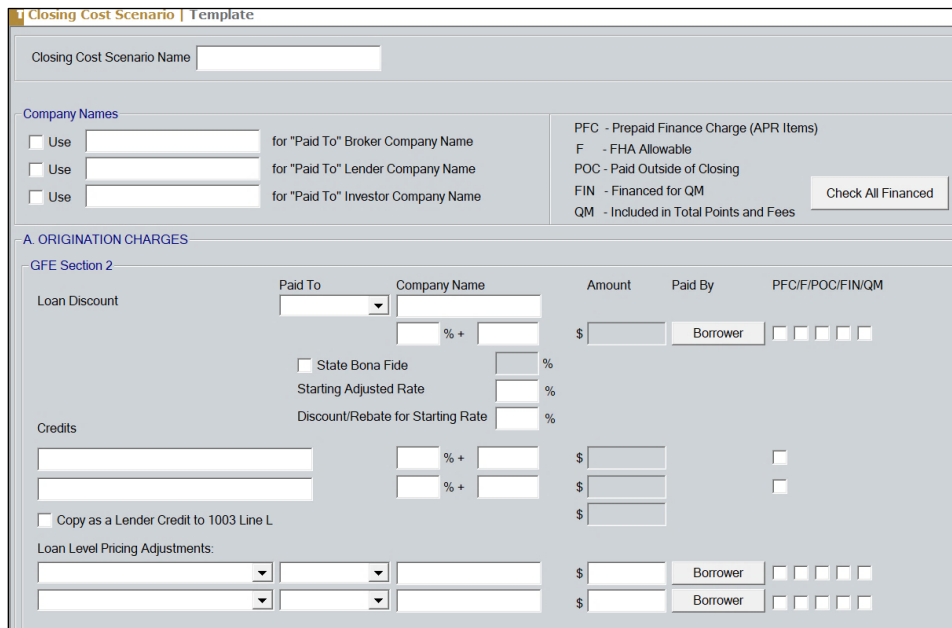

Closing cost scenarios are available in prospect and borrower files in the following screens:

- Debt Consolidation
- Fees Worksheet
- Loan Comparison
- Prequalification

- Prospect Information/Borrower Information

Changes made to one screen populate the others. Point re-calculates all figures and ratios automatically. The template is immediately available to apply to Point files and populate the GFE or the MLDS after creation.

1. **Templates** tab. (See [Figure 13.](#))
2. Select **Closing Cost Scenario** radio button. See [Figure 647.](#))
3. Select the appropriate closing costs template.
4. Click **New**.
5. Enter the template name in the **Closing Cost Scenario Name** field.

**Figure 652: Closing Costs Template**

6. Complete the applicable fields.
7. Select **Save** from the **File** menu when complete.
8. Close the template.

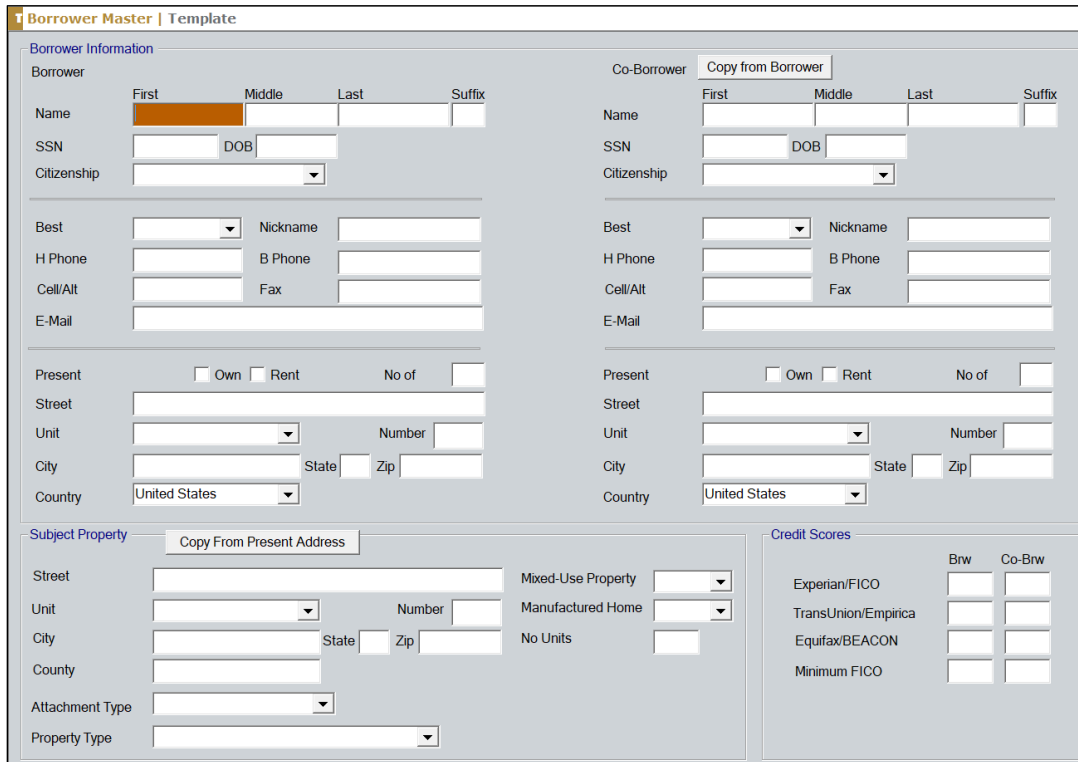

## Master File Templates

Use the master file templates to create a complete loan file containing information identical for different loans.

**Note** Most information in the *Prospect Information* screen is general and varies from file to file. Leave most of the information blank in the prospect master file template.

1. **Templates** tab. (See [Figure 13.](#))

2. Select a **Master Template** radio button. (See [Figure 647](#).)
3. Select the appropriate master borrower/prospect template.
4. Click **New**.
5. Complete the **Borrower Information** for the master template.

**Figure 653: Master Template**

6. Use the menu options and screen buttons to add forms and data to the master template.
7. Click **Save**.
8. Close the template.

## Master File Template Usage

Import the Master File Template into an existing loan file. (See [Import From](#) for details.)

Select the **Master Template** option on the *Create New Loan File* dialog to use the master template while creating a new loan. (See [Create Loans](#) for details.)

## Edit Templates

1. Click the **Templates** tab from the navigation panel.
2. Click the appropriate **Select a Template Category** radio button.
3. Select the template to modify.
4. Click **Open**.
5. Make the required changes.
6. Click **Save**.
7. Close the template.

## Delete Templates

1. Click the **Templates** tab from the navigation panel.
2. Click the appropriate **Select a Template Category** radio button.
3. Select the template to delete.
4. Click **Delete**.
5. Click **Yes** on the *Delete Confirmation* dialog.

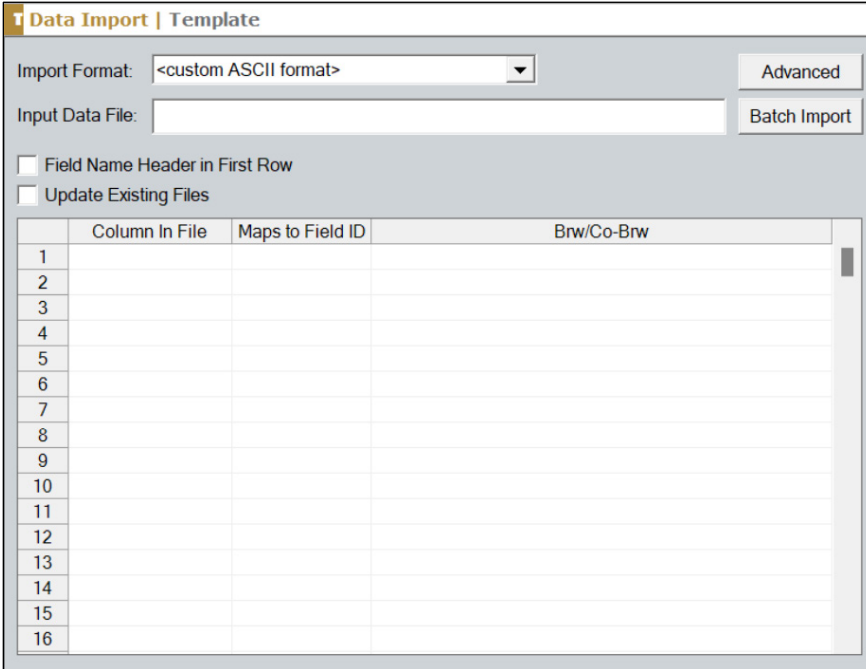

## Import Templates

Create templates to import files from other applications.

**Note:** It is not necessary to create a template to convert files from Fannie Mae format 3.2 (.fnm).

1. **Templates** tab. (See [Figure 13](#).)
2. Select **Data Import**. See [Figure 647](#).)
3. Click **New**.

4. Select the **Import Format** from the dropdown.

4. Use **FIELD ID** Excel file (FieldID.xls) to identify field IDs when defining templates.

**Note:** The Excel file is in the WINPOINT folder.

5. Enter a **0** for a prospect or borrower file in the **Brw/Co-Brw** column.
6. Enter a **1** through **5** to correspond to a co-borrower associated with the loan file.

7. Click to **Save** the file.

**Note:** Point saves all data import template files with the .imp extension. Do not change the extension or Point will not recognize the template.

## Re-Sequence Rows

Change the template prior to import to match the row sequence to the data being imported.

1. **Templates** tab. (See [Figure 13.](#))
2. Select **Data Import**. See [Figure 647.](#))
3. Select the template.
4. Click **Open**.
5. Select the row to move.
6. Select **Cut** from the **Edit** menu.
7. Select the row number to place the cut row.
8. Select Paste from the **Edit** menu.

## Data Export Templates

Point interfaces applications used by the following types of companies:

- Credit
- Document preparation
- Other mortgage service companies

Use export templates to export data from multiple files.

**Note:** The **File Export** function exports data from one file at a time. (See [Export To](#) for details.)

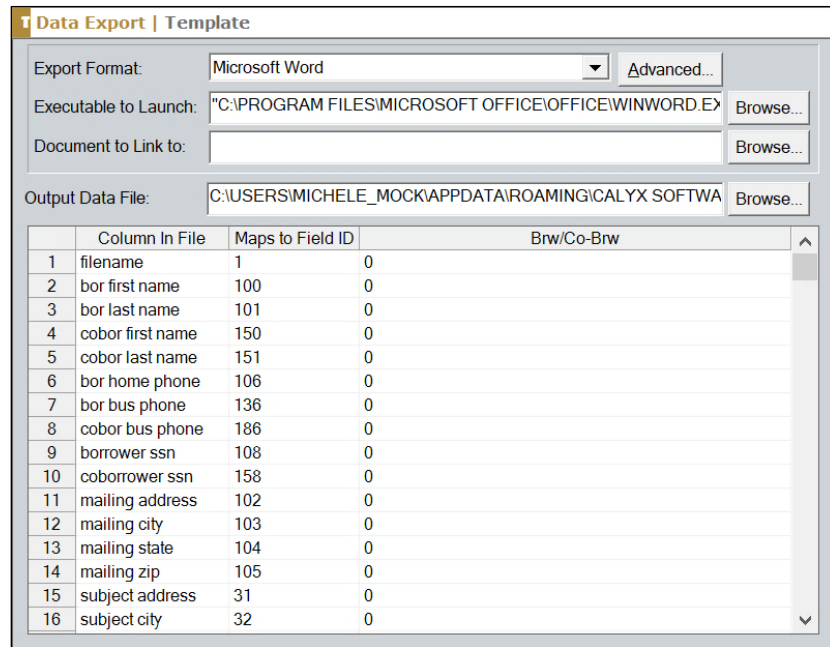

The data export function sends Point data to lenders that offer automated underwriting systems. Point includes a data export template (called sample) containing more than 70 of commonly used fields for data export. Use this template as the base for building new data export templates.

A sample export template is provided with Point. You can use this template as a base for creating new templates.

**Note:** The default name and path for the output data file is C:\WINPOINTWORK\pointexp.dat.

1. Select the **Templates** tab. (See [Figure 13.](#))
2. Select **Data Export**. See [Figure 647.](#))

3. Select the **Sample file**.

## Appendix D - Tool Bars and Hot Keys

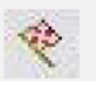

The following sections provide details for Point tool bars and hot keys used for navigation.

### Toolbar Icons

The Point software integrates many of the standard Microsoft Windows operating system icons to complete the most common functions (such as: printing and saving). Point also has icons unique to the application. The following table provides descriptions for the unique Point icons.

**Table 53: Point Toolbar Icons**

Icon	Name	Function
	Document	Opens new loan file
	Email	Emails files or forms
	Ratios	Displays top, bottom, Loan to Value (LTV), Combined Loan to Value (CLTV) ratios for loans
	Conversation Log	Displays conversation logs for the selected loan
	Show Tasks	Displays tasks associated with the selected loan
	Calculator	Launches Microsoft Windows calculator
	Cardex	Opens Cardex database
	New Task	Creates new task
	Document Storage	Opens <i>Document Storage</i> dialog

Icon	Name	Function
	Flag	Displays vendor interface notification messages
	Help	Launches Point <i>Help</i>

## Key Combinations

Point uses conventional Windows operating system key combinations to accomplish various tasks.

## Activating Keys

Use **Activating** keys to close, cancel, or activate a task. The following activating keys are available in Point:

**Table 54: Activating Keys**

Key	Description
<b>Enter</b>	Activates the highlighted command.
<b>Esc</b>	Closes a dialog or cancels a command.
<b>Space bar</b>	Activates the highlighted button.

## Function Keys

**Function** keys are the **F** keys located at the top of the keyboard. Use **Function** keys to access the following functions in Point.

**Table 55: Function Keys**

Key	Description
<b>F1</b>	Help
<b>F2</b>	Loans tab

Key	Description
<b>F3</b>	Tasks tab
<b>F4</b>	Reports tab
<b>F5</b>	Templates tab

## Hot Keys

Hot keys provide shortcuts for completing frequently used functions in Point. Press and hold down the **Ctrl** key and press the specified letter to activate the item. The following hot keys are used in Point.

**Table 56: Hot Keys**

Key	Description
<b>Ctrl+C</b>	Edit > Copy
<b>Ctrl+D</b>	Edit > Paste Date
<b>Ctrl+G</b>	Current view (toggle between tabs)
<b>Ctrl+L</b>	Conversation log
<b>Ctrl+N</b>	File > New

<b>Ctrl+S</b>	File > Save
<b>Ctrl+T</b>	Display ratios
<b>Ctrl+U</b>	Launch Calculator
<b>Ctrl+V</b>	Edit > Paste
<b>Ctrl+W</b>	Show tasks
<b>Ctrl+X</b>	Edit > Cut

Key	Description
<b>Ctrl+Z</b>	Edit > Undo

## Movement Keys

Use movement keys to navigate quickly through Point when entering data. Use the following keys to navigate in Point.

**Table 57: Movement Keys**

Key	Description
<b>Tab</b>	Moves forward one field.
<b>Shift+Tab</b>	Moves backward one field.
<b>Alt+Forward Arrow</b>	Moves forward one section.
<b>Alt+Backward Arrow</b>	Moves backward one section.

## Scrolling Keys

Use scrolling keys (without using the mouse) to navigate the screen when it exceeds the window boundaries. Use the following keys to scroll in the Point screens.

**Table 58: Scrolling Keys**

Key	Description
<b>Ctrl+Page Down</b>	Scrolls down one page
<b>Ctrl+Page Up</b>	Scrolls up one page
<b>Ctrl+Home</b>	Scrolls to top of form
<b>Ctrl+End</b>	Scrolls to bottom of form
<b>Ctrl+Forward Arrow</b>	Scrolls to the right.
<b>Ctrl+Backward Arrow</b>	Scrolls to the left
<b>Ctrl+Down Arrow</b>	Scrolls down one line
<b>Ctrl+Up Arrow</b>	Scrolls up one line
